PREFACE

> It is believed that in these figures lay the foundations of a nationwide system of uniform crime statistics. As the months and years pass, the accumulation of such data will acquire steadily increasing importance and value... [T]he extent and incidence of known offenses [are] given a factual basis in the United States *for the first time*.
>
> — *Uniform Crime Report*, Vol. 1, No. 1, January 1, 1930

Since 1930, state and local law enforcement agencies have worked cooperatively with the FBI to provide the Nation with a reliable set of criminal statistics through the Uniform Crime Reporting (UCR) Program. Initially, only 400 cities covering a population of about 20 million participated in the Program. Now, over 16,000 jurisdictions serving 249 million inhabitants, or 96 percent of the U.S. population, voluntarily supply information from their records systems for compilation in *Crime in the United States*. Through the intervening years, America's emerging crime problems have been reflected in this annual report, and although primarily produced in the interest of law enforcement, the report has become a useful tool to the general public, the media, legislators, academicians, and others with an interest in studying the social conditions of the Nation.

With every issue in the past 65 years, the UCR staff and contributors have continually made improvements in the gathering and aggregation of information into a quality published form. While *Crime in the United States* has fulfilled its founders' vision that it become a publication of "importance and value," it must continue its evolution to meet the ever-expanding demands of law enforcement for this vital information into the next century.

As the Information Technology Age progresses, society and law enforcement face new challenges in fighting crime. The FBI, along with state UCR Programs and the law enforcement community overall, is continuing its efforts at implementing the National Incident-Based Reporting System (NIBRS) as the 21st Century approaches. NIBRS offers new avenues in data analysis and publication, with the goal of providing more accurate, reliable, and comprehensive crime data as well as an indispensable resource for developing strategies to address crime.

CRIME FACTORS

Each year when *Crime in the United States* is published, many entities—news media, tourism agencies, and others with an interest in crime in our Nation—compile rankings of cities and counties based on their Crime Index figures. These simplistic and/or incomplete analyses often create misleading perceptions which adversely affect cities and counties, along with their residents. Assessing criminality and law enforcement's response from jurisdiction to jurisdiction must encompass many elements, some of which, while having significant impact, are not readily measurable nor applicable pervasively among all locales. Geographic and demographic factors specific to each jurisdiction must be considered and applied if crime assessment is to approach completeness and accuracy. There are several sources of information which may assist the responsible researcher. The U.S. Bureau of the Census data, for example, can be utilized to better understand the makeup of a locale's population. The transience of the population, its racial and ethnic makeup, its composition by age and gender, education levels, and prevalent family structures are all key factors in assessing and better understanding the crime issue.

Local chambers of commerce, planning offices, or similar entities provide information regarding the economic and cultural makeup of cities and counties. Understanding a jurisdiction's industrial/economic base, its dependence upon neighboring jurisdictions, its transportation system, its economic dependence on nonresidents (such as tourists and convention attendees), its proximity to military reservations, etc., all help in better gauging and interpreting the crime known to and reported by law enforcement.

The strength (personnel and other resources) and the aggressiveness of a jurisdiction's law enforcement agency are also key factors. While information pertaining to the number of sworn and civilian law enforcement employees can be found in this publication, assessment of the law enforcement emphases is, of course, much more difficult. For example, one city may report more crime than a comparable one, not because there is more crime, but rather because its law enforcement agency through proactive efforts identifies more offenses. Attitudes of the citizens toward crime and their crime reporting practices, especially concerning more minor offenses, have an impact on the volume of crimes known to police.

It is incumbent upon all data users to become as well educated as possible about how to categorize and quantify the nature and extent of crime in the United States and in any of the over 16,000 jurisdictions represented by law enforcement contributors to this Program. Valid assessments are only possible with careful study and analysis of the various unique conditions affecting each local law enforcement jurisdiction.

Historically, the causes and origins of crime have been the subjects of investigation by varied disciplines. Some factors which are known to affect the volume and type of crime occurring from place to place are:

Population density and degree of urbanization with size of locality and its surrounding area.
Variations in composition of the population, particularly youth concentration.
Stability of population with respect to residents' mobility, commuting patterns, and transient factors.
Modes of transportation and highway system.
Economic conditions, including median income, poverty level, and job availability.
Cultural factors and educational, recreational, and religious characteristics.
Family conditions with respect to divorce and family cohesiveness.
Climate.
Effective strength of law enforcement agencies.
Administrative and investigative emphases of law enforcement.
Policies of other components of the criminal justice system (i.e., prosecutorial, judicial, correctional, and probational).
Citizens' attitudes toward crime.
Crime reporting practices of the citizenry.

The Uniform Crime Reports give a nationwide view of crime based on statistics contributed by state and local law enforcement agencies. Population size is the only correlate of crime utilized in this publication. While the other factors listed above are of equal concern, no attempt is made to relate them to the data presented. *The reader is, therefore, cautioned against comparing statistical data of individual reporting units from cities, counties, metropolitan areas, states, or colleges and universities solely on the basis of their population coverage or student enrollment.*

Data users are cautioned against comparisons of crime trends presented in this report and those estimated by the National Crime Victimization Survey (NCVS), administered by the Bureau of Justice Statistics. Because of differences in methodology and crime coverage, the two programs examine the Nation's crime problem from somewhat different perspectives, and their results are not strictly comparable. The definitional and procedural differences can account for many of the apparent discrepancies in results from the two programs.

SECTION I

Summary of the Uniform Crime Reporting Program

The Uniform Crime Reporting (UCR) Program is a nationwide, cooperative statistical effort of over 16,000 city, county, and state law enforcement agencies voluntarily reporting data on crimes brought to their attention. During 1994, law enforcement agencies active in the UCR Program represented over 249 million United States inhabitants or 96 percent of the total population as established by the Bureau of the Census. The coverage amounted to 97 percent of the United States population in Metropolitan Statistical Areas (MSAs), 91 percent of the population in cities outside metropolitan areas, and 88 percent of the rural population.

Since 1930, the FBI has administered the Program and issued periodic assessments of the nature and type of crime in the Nation. While the Program's primary objective is to generate a reliable set of criminal statistics for use in law enforcement administration, operation, and management, its data have over the years become one of the country's leading social indicators. The American public looks to UCR for information on fluctuations in the level of crime, while criminologists, sociologists, legislators, municipal planners, the press, and other students of criminal justice use the statistics for varied research and planning purposes.

Historical Background

Recognizing a need for national crime statistics, the International Association of Chiefs of Police (IACP) formed the Committee on Uniform Crime Records in the 1920s to develop a system of uniform police statistics. Establishing offenses known to law enforcement as the appropriate measure, the Committee evaluated various crimes on the basis of their seriousness, frequency of occurrence, pervasiveness in all geographic areas of the country, and likelihood of being reported to law enforcement. After studying state criminal codes and making an evaluation of the recordkeeping practices in use, the Committee in 1929 completed a plan for crime reporting which became the foundation of the UCR Program.

Seven offenses were chosen to serve as an Index for gauging fluctuations in the overall volume and rate of crime. Known collectively as the Crime Index, these offenses included the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, and motor vehicle theft. By congressional mandate, arson was added as the eighth Index offense in 1979.

During the early planning of the Program, it was recognized that the differences among criminal codes precluded a mere aggregation of state statistics to arrive at a national total. Further, because of the variances in punishment for the same offenses in different state codes, no distinction between felony and misdemeanor crimes was possible. To avoid these problems and provide nationwide uniformity in crime reporting, standardized offense definitions by which law enforcement agencies were to submit data, without regard for local statutes, were formulated. The definitions used by the Program are set forth in Appendix II of this publication.

In January 1930, 400 cities representing 20 million inhabitants in 43 states began participating in the UCR Program. Congress enacted Title 28, Section 534, of the United States Code authorizing the Attorney General to gather crime information that same year. The Attorney General, in turn, designated the FBI to serve as the national clearinghouse for the data collected. Since that time, data based on uniform classifications and procedures for reporting have been obtained from the Nation's law enforcement agencies.

Advisory Groups

Providing vital links between local law enforcement and the FBI in the conduct of the UCR Program are the IACP and the National Sheriffs' Association (NSA). The IACP's Committee on Uniform Crime Records, as it has since the Program began, represents the thousands of police departments nationwide. The NSA's Committee on Uniform Crime Reporting, established in June 1966, encourages sheriffs throughout the country to participate fully in the Program. Both committees serve in advisory capacities concerning the UCR Program's operation.

To function in an advisory capacity concerning UCR policy and provide suggestions on UCR data usage, a Data Providers' Advisory Policy Board (APB) was established in August 1988. The Board operated until 1993 when a new Board to address all FBI criminal justice information services was approved. The new Board will continue the work of the former APB but will also consider policy issues concerning the National Crime Information Center and FBI identification services. A UCR subcommittee of the Board will ensure continuing emphasis on UCR-related issues.

The Association of State Uniform Crime Reporting Programs and committees on UCR within individual state law enforcement associations are also active in promoting interest in the UCR Program. These organizations foster widespread and more intelligent use of uniform crime statistics and lend assistance to contributors when the needs arise.

Redesign of UCR

While throughout the years the UCR Program remained virtually unchanged in terms of the data collected and disseminated, a broad utility had evolved for UCR by the 1980s.

Recognizing the need for improved statistics, law enforcement called for a thorough evaluative study that would modernize the UCR Program. The FBI fully concurred with the need for an updated Program and lent its complete support, formulating a comprehensive three-phase redesign effort. The Bureau of Justice Statistics (BJS), the Department of Justice agency responsible for funding criminal justice information projects, agreed to underwrite the first two phases. Conducted by an independent contractor, these phases were structured to determine what, if any, changes should be made to the current Program. The third phase would involve implementation of the changes identified. Abt Associates Inc. of Cambridge, Massachusetts, overseen by the FBI, BJS, and a Steering Committee comprised of prestigious individuals representing a myriad of disciplines, commenced the first phase in 1982.

During the first phase, the historical evolution of the Program was examined. All aspects of the Program, including the objectives and intended user audience, data items, reporting mechanisms, quality control, publications and user services, and relationships with other criminal justice data systems, were studied.

Early in 1984, a conference on the future of UCR, held in Elkridge, Maryland, launched the second phase of the study, which would examine potential futures for UCR and conclude with a set of recommended changes. Attendees at this conference reviewed work conducted during the first phase and discussed the potential changes that should be considered during phase two.

Findings from the evaluation's first phase and input on alternatives for the future were also major topics of discussion at the seventh National UCR Conference in July 1984. Overlapping phases one and two was a survey of law enforcement agencies.

Phase two ended in early 1985 with the production of a draft "Blueprint for the Future of the Uniform Crime Reporting Program." The study's Steering Committee reviewed the draft report at a March 1985, meeting and made various recommendations for revision. The Committee members, however, endorsed the report's concepts.

In April 1985, the phase two recommendations were presented at the eighth National UCR Conference. While various considerations for the final report were set forth, the overall concept for the revised Program was unanimously approved. The joint IACP/NSA Committee on UCR also issued a resolution endorsing the Blueprint.

The final report, the "Blueprint for the Future of the Uniform Crime Reporting Program," was released in the summer of 1985. It specifically outlined recommendations for an expanded, improved UCR Program to meet informational needs into the next century. There were three recommended areas of enhancement to the UCR Program. First, reporting of offenses and arrests would be made by means of an incident-based system. Second, collection of data would be accomplished on two levels. Agencies in level one would report important details about those offenses comprising the current Crime Index, their victims, and arrestees. Law enforcement agencies covering populations of over 100,000 and a sampling of smaller agencies would be included in level two, which would collect expanded detail on all significant offenses. The third proposal involved introducing a quality assurance program.

One of the first actions taken by the FBI to begin implementation was to award a contract for the development of new offense definitions and data elements for the redesigned system. The work involved: (a) revision of the definitions of certain Index offenses; (b) identification of additional significant offenses to be reported; (c) refining definitions for both; and (d) development of data elements (incident details) for all UCR offenses in order to fulfill the requirements of incident-based reporting versus the current summary reporting.

Concurrent with the preparation of the data elements, the FBI studied the various state systems to select an experimental site for implementation of the redesigned Program. In view of its long-standing incident-based Program and well-established staff dedicated solely to UCR, the South Carolina Law Enforcement Division (SLED) was chosen. The SLED agreed to adapt its existing system to meet the requirements of the redesigned Program and collect data on both offenses and arrests relating to the newly defined offenses.

To assist SLED in conducting the pilot project, offense definitions and data elements developed under the private contract were put at the staff's disposal. Also, FBI automated data processing personnel developed "Automated Data Capture Specifications" for use in adapting the state's data processing procedures to incorporate the revised system. The BJS supplied funding to facilitate software revisions needed at the state level. Testing of the new Program was completed in late 1987.

Following the completion of the pilot project conducted by SLED, the FBI produced a draft set of guidelines for an enhanced UCR Program. Law enforcement executives from around the country were then invited to a conference in Orange Beach, Alabama, where the guidelines were presented for final review.

During the conference, three overall endorsements were passed without dissent. First, that there be established a new, incident-based national crime reporting system; second, that the FBI manage this Program; and third, that an Advisory Policy Board composed of law enforcement executives be formed to assist in the direction and implementation of the new Program.

Information about the redesigned UCR Program, called the National Incident-Based Reporting System, or NIBRS, is contained in four documents produced subsequent to the Orange Beach Conference. Volume 1, *Data Collection Guidelines,* contains a system overview and descriptions of the offenses, offense codes, reports, data elements, and data values used in the system. Volume 2, *Data Submission Specifications,* is for the use of state and local systems personnel who are responsible for preparing magnetic tapes/floppy disks/etc., for submission to the FBI. Volume 3, *Approaches to Implementing an Incident-Based Reporting (IBR) System,* is for use by computer programmers, analysts, etc., responsible for developing a state

or local IBR system which will meet NIBRS' reporting requirements. Volume 4, *Error Message Manual*, contains designations of mandatory and optional data elements, data element edits and error messages.

A NIBRS edition of the *UCR Handbook* has been produced to assist law enforcement agency data contributors implementing NIBRS within their departments. This document is geared toward familiarizing local and state law enforcement personnel with the definitions, policies, and procedures of NIBRS. It does not contain the technical coding and data transmission requirements presented in Volumes 1 through 4.

NIBRS will collect data on each single incident and arrest within 22 crime categories. For each offense known to police within these categories, incident, victim, property, offender, and arrestee information will be gathered when available. The goal of the redesign is to modernize crime information by collecting data presently maintained in law enforcement records; the enhanced UCR Program is, therefore, a by-product of current records systems. The integrity of UCR's long-running statistical series will, of course, be maintained.

It became apparent during the development of the prototype system that the level one and level two reporting proposed in the "Blueprint" may not be the most practical approach. Many state and local law enforcement administrators indicated that the collection of data on all pertinent offenses could be handled with more ease than could the extraction of selected ones. While "Limited" participation, equivalent to the "Blueprint's" level one, will remain an option, it appears that most reporting jurisdictions, upon implementation, will go immediately to "Full" participation, meeting all NIBRS data submission requirements.

The implementation of NIBRS will be at a pace commensurate with the resources, abilities, and limitations of the contributing law enforcement agencies. The FBI was able to accept NIBRS data as of January 1989, and nine state-level UCR Programs (Colorado, Idaho, Iowa, Massachusetts, North Dakota, South Carolina, Utah, Vermont, and Virginia) are now supplying data in the NIBRS format. An additional 20 state agencies and two federal agencies (the Department of Commerce and the FBI) have submitted test tapes or disks containing the expanded data. Fourteen other state agencies, agencies in the District of Columbia and Guam, and one federal agency (the Department of Defense) are in various stages of planning and development. Test tapes from four of these states, the District of Columbia, and Guam are expected during 1995.

Recent Developments

CRIMINAL JUSTICE INFORMATION SERVICES (CJIS) ADVISORY POLICY BOARD — The CJIS Advisory Policy Board, established in December 1994, is composed of 29 representatives of criminal justice agencies throughout the Nation. The Board is responsible for reviewing policy issues, UCR reports, and appropriate technical/operational issues related to CJIS systems; and for making appropriate recommendations to the Director of the FBI. Five working groups review operational and technical issues related to CJIS systems/policies and also make appropriate recommendations to the Board. The Board has four subcommittees: the UCR Subcommittee, the NCIC Subcommittee, the Identification Services Subcommittee, and the Sanctions Subcommittee. Through the CJIS Board and in cooperation with the International Association of Chiefs of Police, the National Sheriffs' Association, and the Association of State Uniform Crime Reporting Programs, the UCR Program continues to be refined so as to be more responsive to users.

UCR SUBCOMMITTEE — The UCR Subcommittee of the CJIS Advisory Policy Board met for the first time in June 1995. Among the topics addressed by the Subcommittee was the status of NIBRS reporting. Specifically, the group will further study the overall cost effectiveness of NIBRS reporting and the direction it should take.

CRIME ACT — The Violent Crime Control and Law Enforcement Act of 1994 (Crime Act) contains the following provisions for stalking, domestic violence, gang violence, and hate crime that will affect the UCR Program:

National Stalker and Domestic Violence Reduction—Designates the Attorney General, in accordance with States, to compile data regarding domestic violence and intimidation (including stalking) as part of the National Incident-Based Reporting System (NIBRS). In NIBRS, stalking is included under the offense of intimidation, and domestic violence is captured through the reporting of the relationships of victims to offenders who have perpetrated robberies or crimes against persons, e.g., homicide, assault, kidnaping/abduction, sex offenses. Currently, the various state laws are being reviewed regarding these issues.

Gang Violence—The Crime Act states that the FBI shall collect information on incidents of gang violence for inclusion in an annual report. Currently, possible methods for collecting this information are being considered.

Hate Crime Statistics Act—The Crime Act amended the Hate Crime Statistics Act to include crimes against the disabled. Specifically, the first section of the Act is amended by inserting "disability" after the word "religion." Definitions for "disability bias," "disabled," and related terms are currently being developed.

The Crime Clock should be viewed with care. Being the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

SECTION II

Crime Index Offenses Reported

CRIME INDEX TOTAL

DEFINITION

The Crime Index is composed of selected offenses used to gauge fluctuations in the overall volume and rate of crime reported to law enforcement. The offenses included are the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault and the property crimes of burglary, larceny-theft, motor vehicle theft, and arson.

TREND

Year	*Number of offenses*[1]	*Rate per 100,000 inhabitants*[1]
1993	14,144,794	5,484.4
1994	13,991,675	5,374.4
Percent change	-1.1	-2.0

[1]Does not include arson. See page 57.

The Crime Index total dropped 1 percent to less than 14 million offenses in 1994, the third consecutive year of decline. A 2-percent decrease reported in the Nation's cities collectively was accounted for by the largest cities, those with populations over 25,000. Within this group, the largest decrease, 7 percent, was reported in cities having a million or more inhabitants.

The smallest cities in the country, those with populations under 25,000, collectively recorded a 1-percent increase. Serious crime also increased in the Nation's counties. It was up 2 percent in the rural counties and 1 percent in the suburban counties.

Five- and 10-year percent changes showed the 1994 national total was 3 percent lower than the 1990 level but 13 percent higher than in 1985.

Geographically, the largest volume of Crime Index offenses was reported in the most populous Southern States, which accounted for 38 percent of the total. Following were the Western States with 25 percent, the Midwestern States with 21 percent, and the Northeastern States with 16 percent. The Northeast and South showed Crime Index decreases of 6 and 1 percent, respectively, during 1994 as compared to 1993. In the West, the 1994 Index total showed virtually no change from the 1993 level, while the Midwest's total was up 1 percent. (See Table 4.)

As in previous years, Crime Index offenses occurred most frequently in August and least often in February.

Table 2.1—Crime Index Total by Month, 1990-1994
[Percent distribution]

Months	1990	1991	1992	1993	1994
January	8.3	7.9	8.3	8.0	7.6
February	7.4	7.4	7.8	6.9	7.1
March	8.2	8.1	8.2	8.1	8.2

October	8.7	8.7	8.5	8.6	8.8
November	8.2	8.0	8.0	8.1	8.3
December	8.6	8.3	8.1	9.1	7.9

Rate

Crime rates relate the incidence of crime to population. In 1994, there were an estimated 5,374 Crime Index offenses for each 100,000 in United States population. The Crime Index rate was highest in the Nation's metropolitan areas and lowest in the rural counties. (See Table 2.) The national 1994 Crime Index rate fell 2 percent from 1993 and 8 percent from the 1990 level. It was 3 percent above the 1985 rate.

Regionally, the Crime Index rates ranged from 6,152 in the West to 4,344 in the Northeast. Two-year percent changes (1994 versus 1993) showed declines of 6 percent in the Northeast; 2 percent in the South; and 1 percent in the West. Virtually no change was reported in the Midwest. (See Table 4.)

Nature

The Crime Index is composed of violent and property crime categories, and in 1994, 13 percent of the Index offenses reported to law enforcement were violent crimes and 87 percent, property crimes. Larceny-theft was the offense with the highest volume, while murder accounted for the fewest offenses. (See Chart 2.4.)

Property estimated in value at $15.6 billion was stolen in connection with all Crime Index offenses, with the largest losses due to thefts of motor vehicles; jewelry and precious metals; and televisions, radios, stereos, etc. Law enforcement agencies nationwide recorded a 34-percent recovery rate for dollar losses in connection with stolen property. The highest recovery percentages were for stolen motor vehicles, livestock, consumable goods, clothing and furs, and firearms. (See Table 24.)

Law Enforcement Response

Law enforcement agencies nationwide recorded a 21-percent clearance rate for the collective Crime Index offenses in 1994 and made an estimated 2.9 million arrests for Index crimes. Crimes can be cleared by arrest or by exceptional means when some element beyond law enforcement control precludes the placing of formal charges against the offender. The arrest of one person may clear several crimes, or several persons may be arrested in connection with the clearance of one offense.

The Index clearance rate has remained relatively stable throughout the past 10-year period. As in 1994, the clearance rate was 21 percent in 1985; it was 22 percent in 1990.

The number of persons arrested for Index crimes increased 1 percent in 1994 when compared to 1993. Juvenile arrests for Index crimes increased 6 percent, while those of adults were down 1 percent. Arrests of females increased 4 percent for the 2-year period, while those of males showed virtually no change. (See Tables 36 and 37.)

Between 1993 and 1994, the number of persons arrested for the individual offenses comprising the Index increased for arson, 5 percent; aggravated assault, 3 percent; and larceny-theft, 2 percent. Arrest volumes for the remaining Index offenses decreased during the same 2-year period. The declines were 6 percent for murder and forcible rape; 4 percent for burglary; 2 percent for robbery; and 1 percent for motor vehicle theft.

As in past years, larceny-theft accounted for the highest volume of Crime Index arrests at 1.5 million. (See Table 29.)

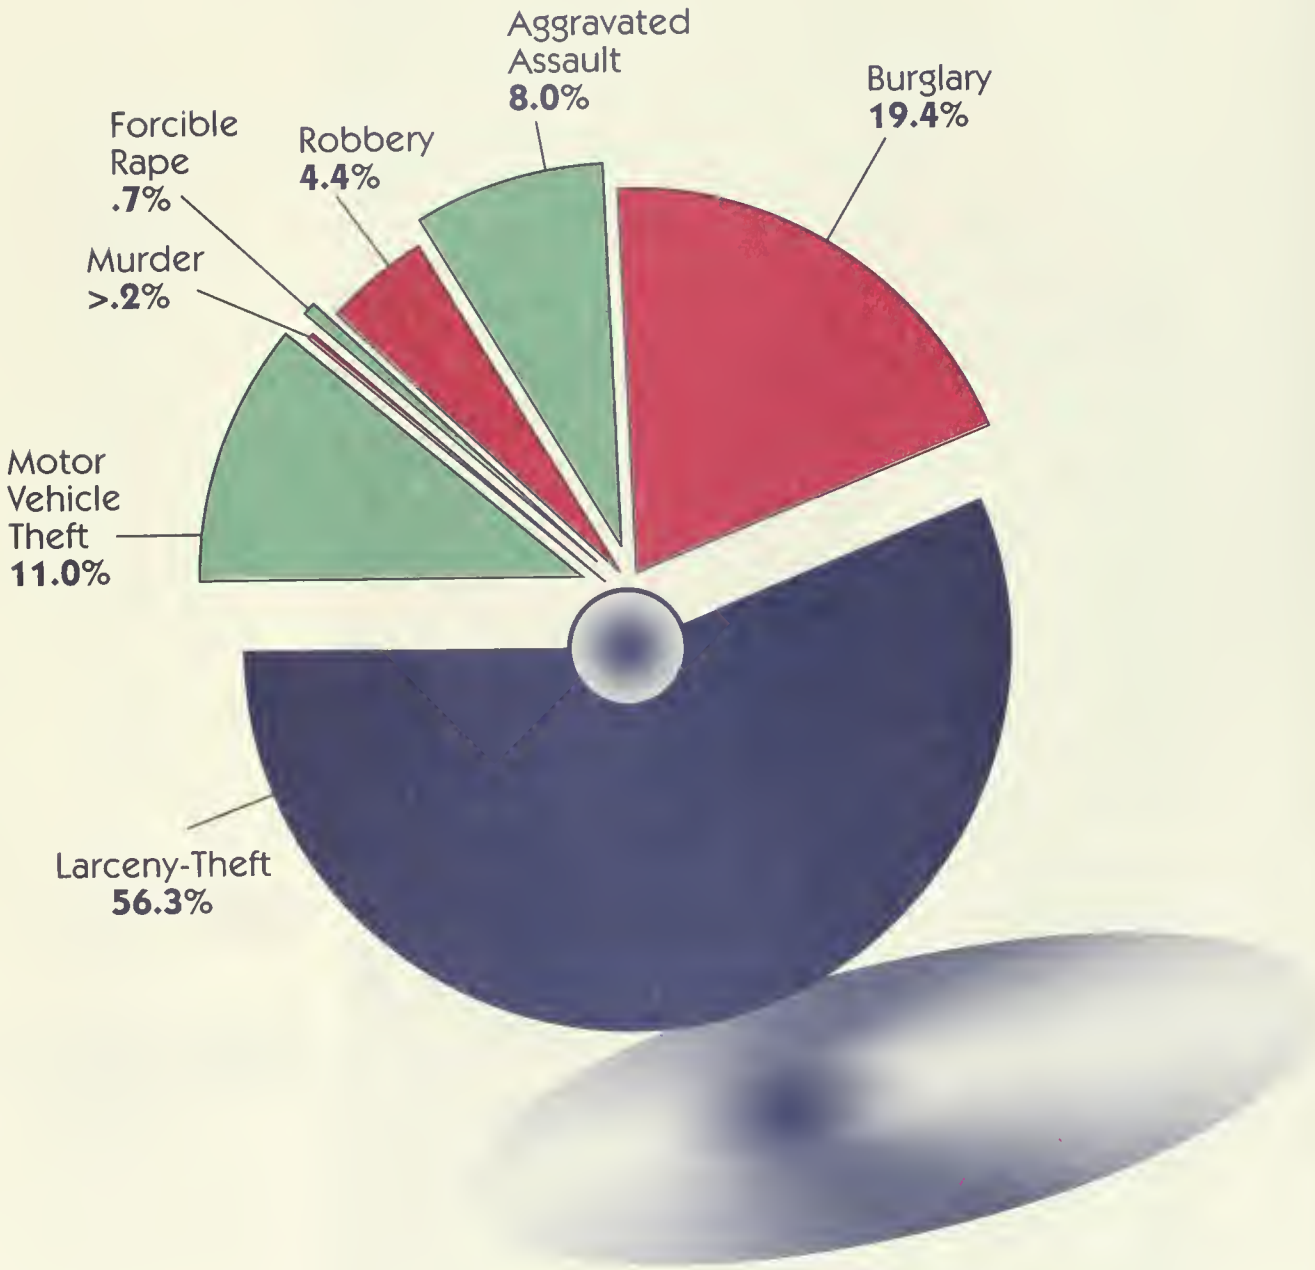

CHART 2.4

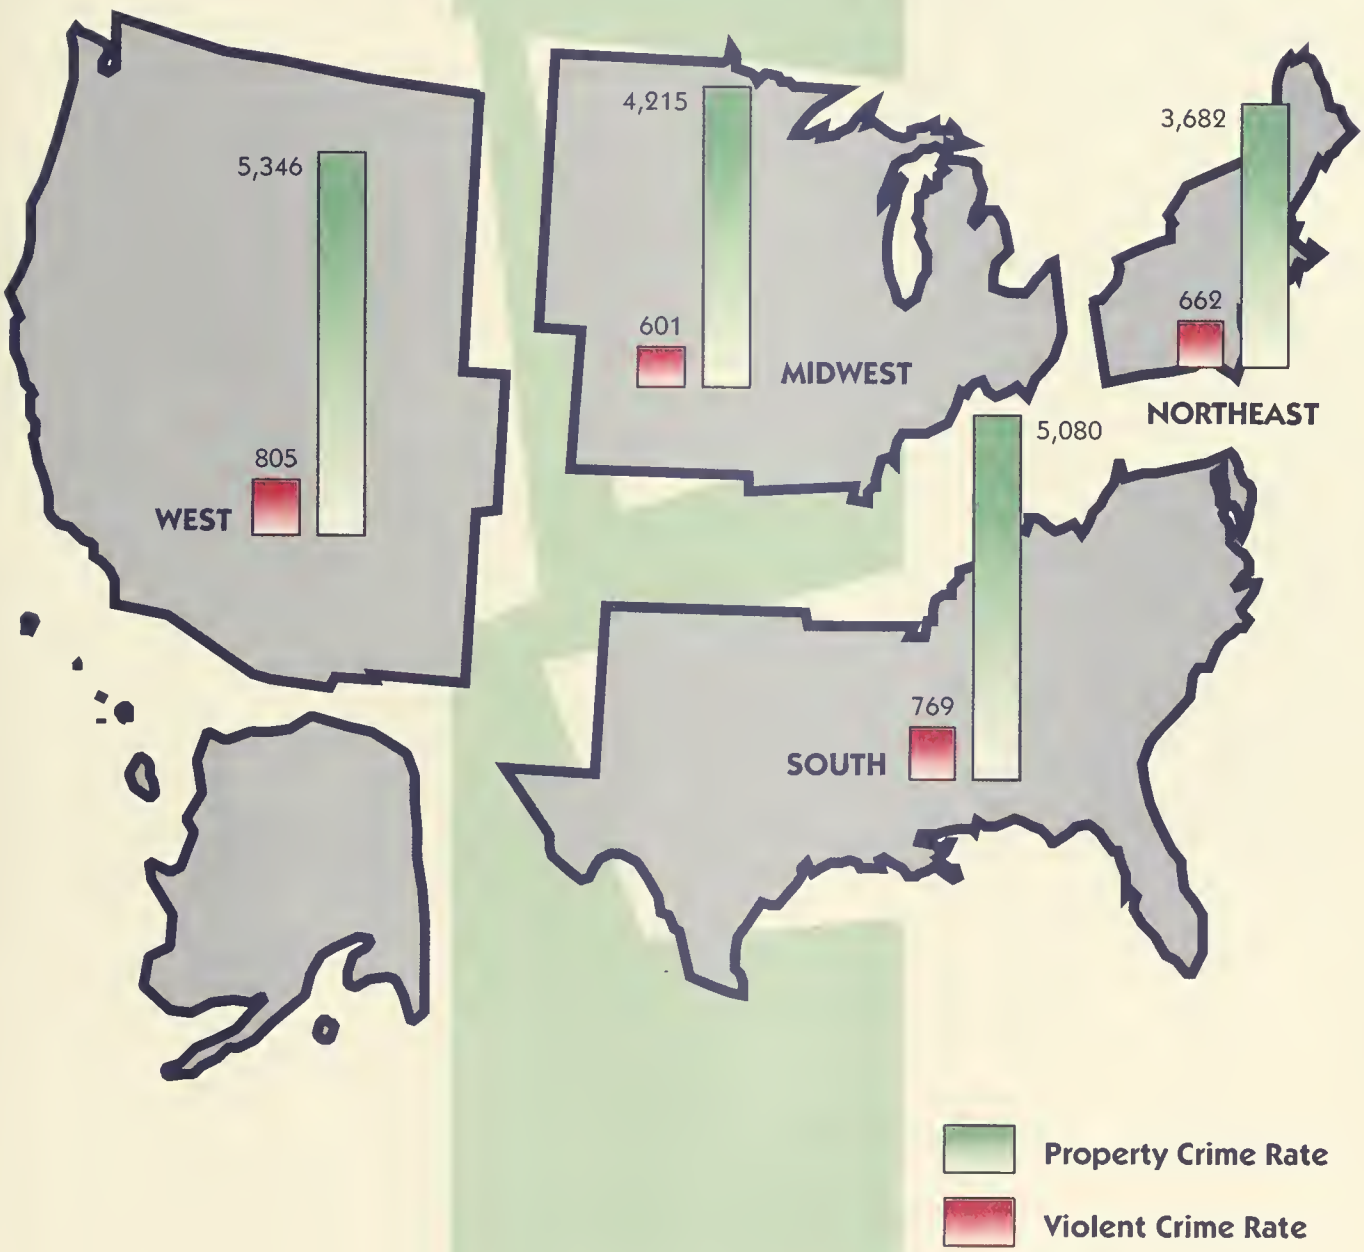
REGIONAL VIOLENT AND PROPERTY CRIME RATES

1994

per 100,000 inhabitants



VIOLENT CRIME TOTAL

DEFINITION

Violent crime is composed of four offenses: murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. All violent crimes involve force or threat of force.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1993	1,926,017	746.8
1994	1,864,168	716.0
Percent change	-3.2	-4.1

The number of violent crimes reported to law enforcement during 1994 dropped below 1.9 million offenses for the first annual period since 1990. The 1994 total was down 3 percent from 1993, but was 2 percent above the 1990 level and 40 percent above that of 1985. From 1993 to 1994, the Nation's cities recorded a 4-percent decrease in violent crime, while suburban counties experienced virtually no change and rural counties, a 4-percent increase.

Regionally, the South, the most populous region, accounted for 37 percent of all violent crimes reported to law enforcement in 1994. Lesser volumes of 25 percent for the West, 20 percent for the Midwest, and 18 percent for the Northeast were recorded. While the Midwest experienced virtually no change in the number of violent crimes reported from 1993 to 1994, the other three regions recorded decreases. The Northeast registered a 7-percent decline, and both the South and the West, 3-percent decreases. (See Table 4.)

Violent crimes occurred most frequently in August. The lowest total was experienced in the month of February.

Table 2.2—Violent Crime Total by Month, 1990-1994
[Percent distribution]

Months	1990	1991	1992	1993	1994

November	7.9	8.0	7.8	7.8	7.8
December	8.4	8.2	8.0	8.9	7.6

Rate

A violent crime rate of 716 per 100,000 inhabitants was registered nationally in 1994. Two- and 5-year trends showed the 1994 rate was 4 percent lower than in 1993 and 2 percent below the 1990 rate. It was, however, 29 percent above the 1985 figure. The 1994 violent crime rate was highest in the Nation's metropolitan areas, which collectively registered 812 offenses per 100,000 population. The rate in cities outside metropolitan areas was 500, and for rural counties, it was 237.

The Western States registered the highest overall violent crime rate per 100,000 inhabitants, 805, and the Midwestern States the lowest, 601. Among the geographic regions, the Northeast experienced a rate decline of 7 percent; the West, 5 percent; the South, 4 percent, and the Midwest, 1 percent. (See Table 4.)

Nature

Aggravated assaults accounted for 60 percent of the violent crimes reported to law enforcement during 1994. Robberies comprised 33 percent; forcible rapes, 5 percent; and murders, 1 percent.

While data concerning weapons used in connection with forcible rape are not collected, firearms were the weapons used in 31 percent of all murders, robberies, and aggravated assaults, collectively, in 1994. Knives or cutting instruments were used in 15 percent; other dangerous weapons in 24 percent; and personal weapons (hands, fists, feet, etc.) in 31 percent. The proportion of violent crimes committed with firearms has remained relatively constant in recent years. During the past 5 years, the proportions ranged from 29 percent in 1990 to 32 percent in 1993.

Law Enforcement Response

The overall violent crime clearance rate was 45 percent in 1994. The rate varied little from the 1993 rate of 44 percent and equalled the 1992 rate of 45 percent. Among the violent offenses, the 1994 clearance rates ranged from 64 percent for murder to 24 percent for robbery. Over half of all forcible rapes and aggravated assaults were cleared.

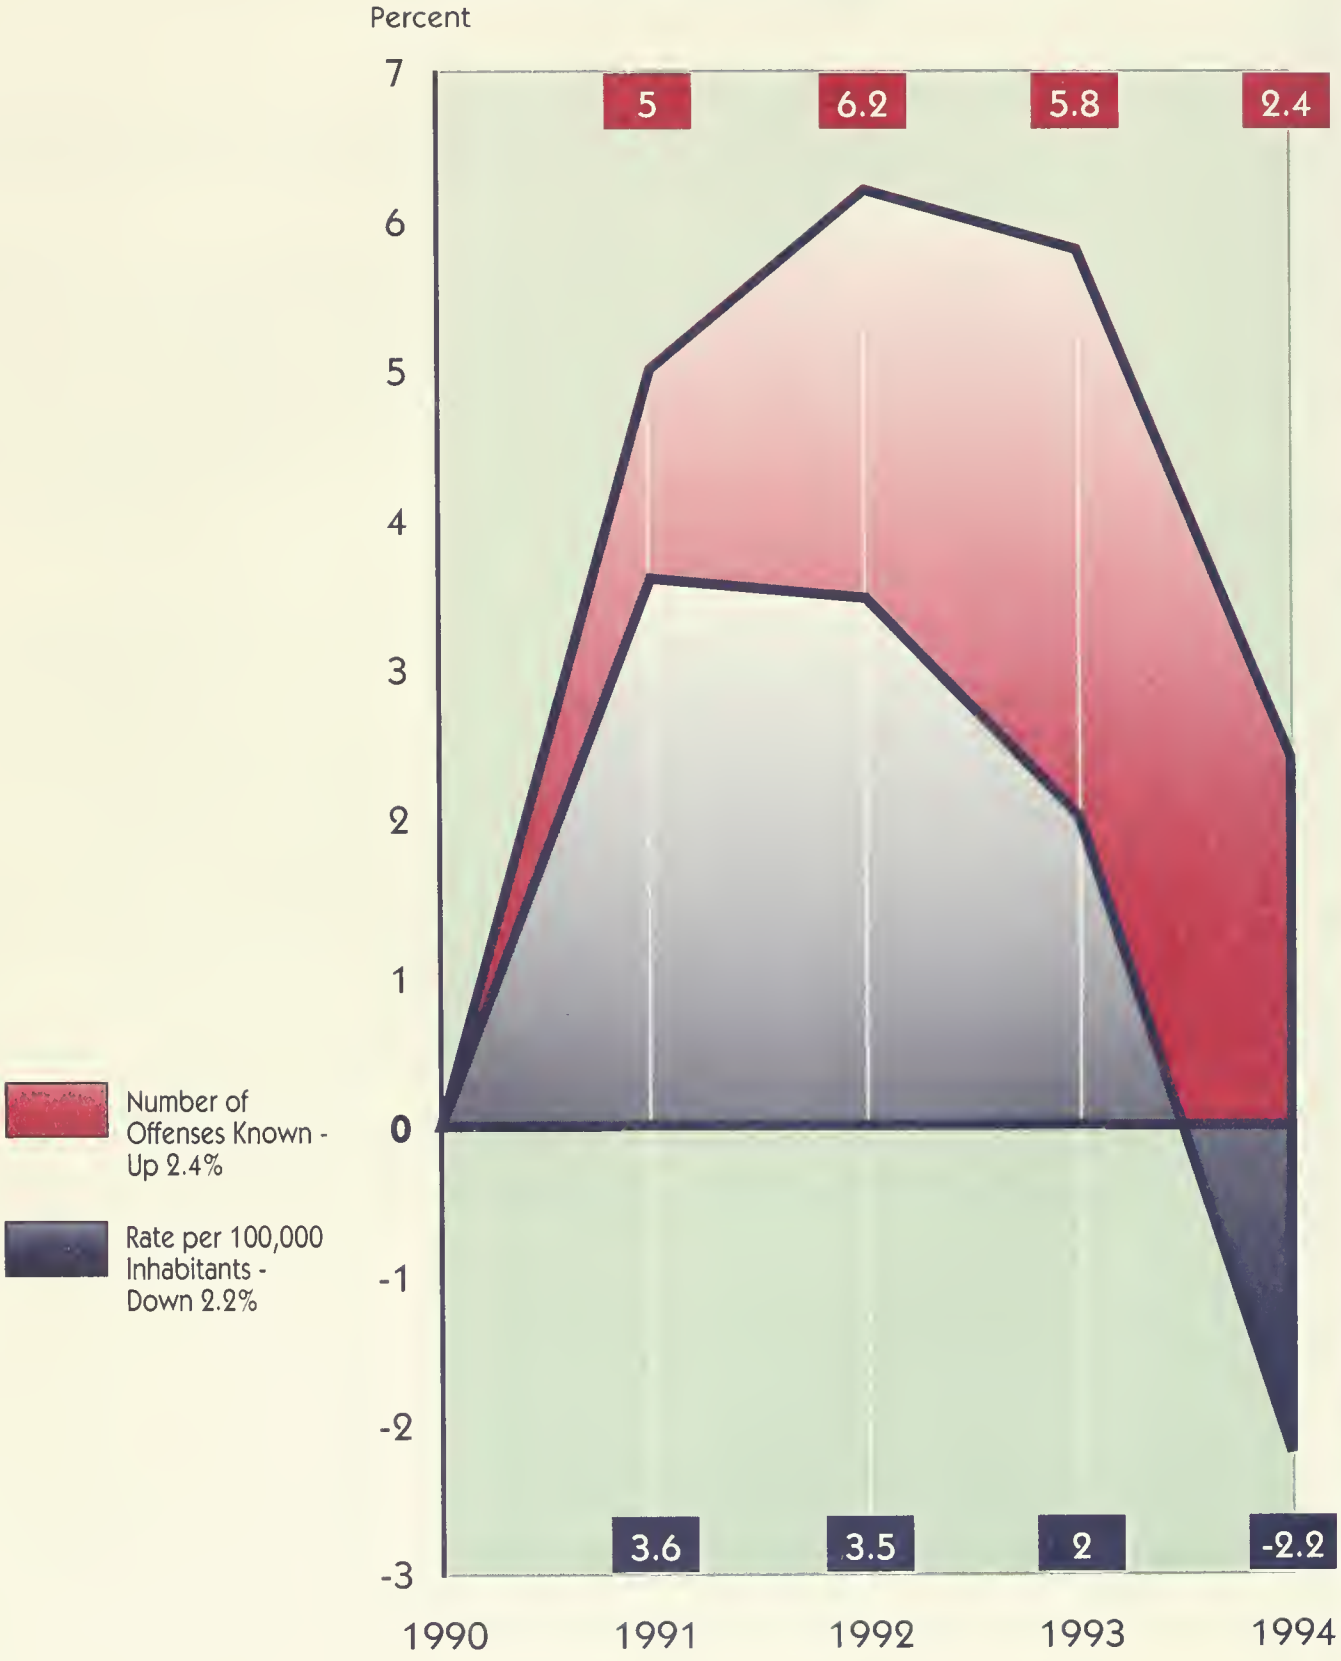
There were an estimated 778,730 persons arrested for violent crimes in 1994. Violent crime arrests accounted for 5 percent of the arrests for all offenses and 27 percent of those for Index crimes. Males made up 86 percent of all violent crime arrestees; whites, 53 percent; and adults, 81 percent. (See Tables 38, 42, and 43.)

Total arrests for violent crimes rose 1 percent from 1993 to 1994. Juvenile arrests (under age 18) increased 7 percent, while adult arrests showed virtually no change. Similar to the national experience, overall violent crime arrests rose 1 percent in the Nation's cities. A 2-percent rise was recorded in suburban counties, while the rural counties showed virtually no change from 1993 to 1994. (See Section IV, Persons Arrested.)

VIOLENT CRIME

CHART 2.5

PERCENT CHANGE FROM 1990



MURDER AND NONNEGLIGENT MANSLAUGHTER

DEFINITION

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1993	24,526	9.5
1994	23,305	9.0
Percent change	-5.0	-5.3

The number of persons murdered in 1994 was estimated at 23,305, the lowest total since 1989. The 1994 total was 5 percent lower than the 1993 count and 1 percent below the 1990 total. It was, however, 23 percent above the 1985 level. (See Table 1.)

Monthly figures show that more persons were murdered in the month of August in 1994, while the fewest were killed in February. (See Table 2.3.)

The suburban counties recorded a 2-percent decrease in their murder volumes and the rural counties, a 10-percent decline in 1994 from 1993. In the Nation's cities overall, murder decreased 5 percent for the 2-year period. The greatest decrease — 12 percent — was registered in cities with populations of 500,000 to 999,999.

When viewing the four regions of the Nation, the Southern States, the most populous region, accounted for 42 percent of the murders. The Western States reported 23 percent; the Midwestern States, 20 percent; and the Northeastern States, 16 percent. All the regions showed declines in the number of murders reported from 1993 to 1994. The Northeast experienced a 13-percent decrease, the South and West each showed 4-percent declines, and the Midwest showed the smallest decline, 1 percent. (See Table 4.)

Table 2.3—Murder by Month, 1990-1994
[Percent distribution]

Months	1990	1991	1992	1993	1994
January	7.9	8.0	8.1	8.1	8.2

October	8.8	8.6	8.0	8.4	8.5
November	7.6	7.8	8.1	8.2	7.9
December	8.8	9.0	8.8	9.8	8.0

Rate

Down 5 percent from 1993, the national murder rate in 1994 was 9 per 100,000 inhabitants. Five- and 10-year trends showed the 1994 rate was 4 percent lower than in 1990 but 14 percent above the 1985 rate.

On a regional basis, the South averaged 11 murders per 100,000 people; the West, 9 per 100,000; the Midwest, 8 per 100,000; and the Northeast, 7 per 100,000. Compared to 1993, murder rates in 1994 declined in all of the four geographic regions, with the Northeast experiencing the largest change, a decrease of 13 percent. (See Table 4.)

The Nation's metropolitan areas reported a 1994 murder rate of 10 victims per 100,000 inhabitants. In the rural counties and in cities outside metropolitan areas, the rate was 5 per 100,000.

Nature

Supplemental data were provided by contributing agencies for 22,076 of the estimated 23,305 murders in 1994. Submitted monthly, the data consist of the age, sex, and race of both victims and offenders; the types of weapons used; the relationships of victims to the offenders; and the circumstances surrounding the murders.

Based on this information, 79 percent of the murder victims in 1994 were males; and 88 percent were persons 18 years of age or older. Forty-seven percent were aged 20 through 34. Considering victims for whom race was known, 51 percent were black, 47 percent were white, and the remainder were persons of other races.

Table 2.4—Murder Victims by Race and Sex, 1994

Race of Victims	Sex of Victims			
	Total	Male	Female	Unknown
Total White Victims	10,191	7,609	2,582	.....
Total Black Victims	11,221	9,226	1,995	.....
Total Other Race Victims	498	373	125	.....
Total Unknown Race	166	101	37	28
Total Victims[1]	22,076	17,309	4,739	28

[1]Total murder victims for whom supplemental data were received.

Supplemental data were also reported for 25,052 murder offenders in 1994. Of those for whom sex and age were reported, 91 percent of the offenders were males, and 84 percent were persons 18 years of age or older. Sixty-nine percent were aged 17 through 34. Of offenders for whom race was known, 56 percent were black, 42 percent were white, and the remainder were persons of other races.

Murder is most often intraracial among victims and offenders. In 1994, data based on incidents involving one victim and one offender showed that 94 percent of the black murder victims were slain by black offenders, and 84 percent of the white murder victims were killed by white offenders. Likewise, males were most often slain by males (88 percent in single victim/single offender situations). These same data showed, however, that 9 of every 10 female victims were murdered by males.

As in previous years, firearms were the weapons used in approximately 7 of every 10 murders committed in the Nation. Of those murders for which weapons were reported, 58 percent were by handguns, 4 percent by shotguns, and 3 percent by rifles. Other or unknown types of firearms accounted for another 5 percent of the total murders. Among the remaining weapons, cutting or stabbing instruments were employed in 13 percent of the murders; blunt objects (clubs, hammers, etc.) in 4 percent; personal weapons (hands, fists, feet, etc.) in 5 percent; and other dangerous weapons, such as poison, explosives, etc., in the remainder. (See Table 2.10.) A state-by-state breakdown of weapons used in connection with murder is shown in Table 20.

Unknown Sex	52	19	12	3	18	30	4	18

[1]Data based on 11,133 incidents.

Historical statistics on relationships of victims to offenders showed that the majority of murder victims knew their killers. However, in the last few years (1991 through 1994) the relationship percentages have changed. In 1994, less than half of murder victims were related to (12 percent) or acquainted with (35 percent) their assailants. Thirteen percent of the victims were murdered by strangers, while the relationships among victims and offenders were unknown for 40 percent of the murders. Among all female murder victims in 1994, 28 percent were slain by husbands or boyfriends. Three percent of the male victims were killed by wives or girlfriends.

Considering circumstances, arguments resulted in 28 percent of the murders during the year. Eighteen percent occurred as a result of felonious activities such as robbery, arson, etc., while another 1 percent were suspected to have been the result of some felonious activity. Five percent were juvenile gang killings, which were up 70 percent over the past 5 years. Table 2.14 shows murder circumstances for the past 5 years.

Table 2.9—Murder, Type of Weapons Used, 1994

[Percent distribution by region]

Region	Total all weapons[1]	Firearms	Knives or cutting instruments	Unknown or other dangerous weapons	Personal weapons (hands, fists, feet, etc.)

Law Enforcement Response

The clearance rate for murder is higher than for any other Crime Index offense. Law enforcement agencies nationwide recorded a 64-percent clearance rate for 1994 as compared to 66 percent in 1993. Eighty percent of murders in rural counties, 68 percent of those in suburban counties, and 63 percent in the Nation's cities were cleared in 1994. Among the city population groups, those with populations under 10,000 reported the most successful clearance rate, 75 percent. (See Table 25.)

Geographically, the South, the region with the highest murder count, also registered the highest murder clearance rate, 71 percent. Following were the Northeastern States with 68 percent, the Western States with 60 percent, and the Midwestern States with 53 percent.

The proportion of juvenile involvement, as measured by clearances, was lower for murder than for any other Index crime. Persons under 18 years of age accounted for 11 percent of the willful killings cleared by law enforcement nationally in 1994. Only persons in this young age group accounted for 11 percent of clearances in the Nation's cities, 9 percent of those in the suburban counties, and 8 percent of the rural county clearances.

Law enforcement agencies made an estimated 22,100 arrests for murder in 1994. Fifty-eight percent of the arrestees in 1994 were under 25 years of age, with the 18- to 24-year age group accounting for 41 percent of the total. (See Table 38.)

Ninety percent of those arrested for murder in 1994 were males and 10 percent, females. Blacks comprised 56 percent of the total; whites, 42 percent; and the remainder, other races.

Compared to the 1993 levels, the 1994 murder arrest total and the number of persons aged 18 and over arrested for murder decreased 6 percent. During the same 2-year period, arrests of juveniles also declined, 3 percent, and female arrests were down 1 percent. Arrests of males for murder increased 6 percent.

Long-term trends indicate the 1994 murder arrest total was 6 percent below the 1990 level but 23 percent higher than the 1985 figure.

Justifiable Homicide

Certain willful killings are classified as justifiable or excusable, based on law enforcement investigation. In Uniform Crime Reporting, justifiable homicide is defined as and limited to the killing of a felon by a law enforcement officer in the line of duty, or the killing of a felon, during the commission of a felony, by a private citizen. These offenses are tabulated independently and are not included in the murder counts.

The 1994 justifiable homicide total was 816, up slightly from the 1993 total of 812. Compared to the 1990 count of 713, however, the 1994 total was up 14 percent. In 1994, 463 of justifiable homicides involved law enforcement officers and 353 were by private citizens. Handguns were the weapons used most often. (See Tables 2.16 and 2.17.)

Table 2.16—Justifiable Homicide by Weapon, Law Enforcement,[1] 1990-1994

FORCIBLE RAPE

DEFINITION

Forcible rape, as defined in the Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1993	106,014	41.1
1994	102,096	39.2
Percent change	-3.7	-4.6

The 102,096 forcible rapes reported to law enforcement agencies across the Nation during 1994 represented the lowest total since 1989. The 1994 count was 4 percent lower than in 1993.

Geographically, 39 percent of the forcible rape total in 1994 was accounted for by the most populous Southern States, 26 percent by the Midwestern States, 22 percent by the Western States, and 13 percent by the Northeastern States. Two-year trends showed that all regions experienced declines ranging from 2 percent in the South to 7 percent in the Northeast. (See Table 4.)

As in previous years, monthly totals show most forcible rapes were reported during the summer months of 1994. The lowest volume occurred in December. (See Table 2.18.)

Table 2.18—Forcible Rape by Month, 1990-1994

November	7.7	7.8	7.6	7.5	7.3
December	7.4	6.8	7.0	7.7	6.5

Rate

By Uniform Crime Reporting definition, the victims of forcible rape are always female, and in 1994, an estimated 77 of every 100,000 females in the country were reported rape victims. The 1994 female forcible rape rate was 4 percent lower than both the 1993 and 1990 rates.

The highest rate in 1994 was recorded in the Nation's metropolitan areas where it was 80 victims per 100,000 females. In cities outside metropolitan areas, the rate was 77 per 100,000 females, and in rural counties, it was 51 per 100,000 females. Although metropolitan areas record the highest rape rates, they have shown the only rate decline over the past 10 years, 2 percent. During this same time, the rate increased in cities outside metropolitan areas by 88 percent, and rural counties recorded a 46-percent rate rise.

Geographically, in 1994, the highest female rape rate was in the Southern States, which recorded 85 victims per 100,000 females. The Midwestern States followed closely with a rate of 84; the Western States registered 78; and the Northeastern States, 52. Three of the four regions showed rate declines between 1993 and 1994. In the Midwest, however, the female rape rate increased by 1 percent over the 2-year period.

Over the last 10 years, regional decreases in the female forcible rape rate were 8 percent in the West and 7 percent in the Northeast. Rate increases were reported in the Midwest and South, 29 and 10 percent, respectively, for the same timeframe.

Nature

Rapes by force constitute the greatest percentage of total forcible rapes, 87 percent of the 1994 experience. The remainder were attempts or assaults to commit forcible rape. The number of rapes by force decreased 4 percent in 1994 from the 1993 volume, and attempts to rape decreased 5 percent.

As for all other Crime Index offenses, complaints of forcible rape made to law enforcement agencies are sometimes found to be false or baseless. In such cases, law enforcement agencies "unfound" the offenses and exclude them from crime counts. The "unfounded" rate, or percentage of complaints determined through investigation to be false, is higher for forcible rape than for any other Index crime. In 1994, 8 percent of forcible rape complaints were "unfounded," while the average for all Index crimes was 2 percent.

Law Enforcement Response

Over half of the forcible rapes reported to law enforcement nationwide and in cities were cleared by arrest or exceptional means in 1994. Rural and suburban county law enforcement agencies cleared a slightly higher percentage of the offenses brought to their attention than did city law enforcement agencies. (See Table 25.)

Geographically, forcible rape clearance rates in 1994 were 45 percent in the Midwest, 48 percent in the West, 55 percent in the Northeast, and 57 percent in the South. (See Table 26.)

Of the total clearances for forcible rape in the country as a whole, 15 percent involved only persons under 18 years of age. The percentage of juvenile involvement varied by community type, ranging from 13 percent in the Nation's cities to 20 percent in suburban counties. (See Table 28.)

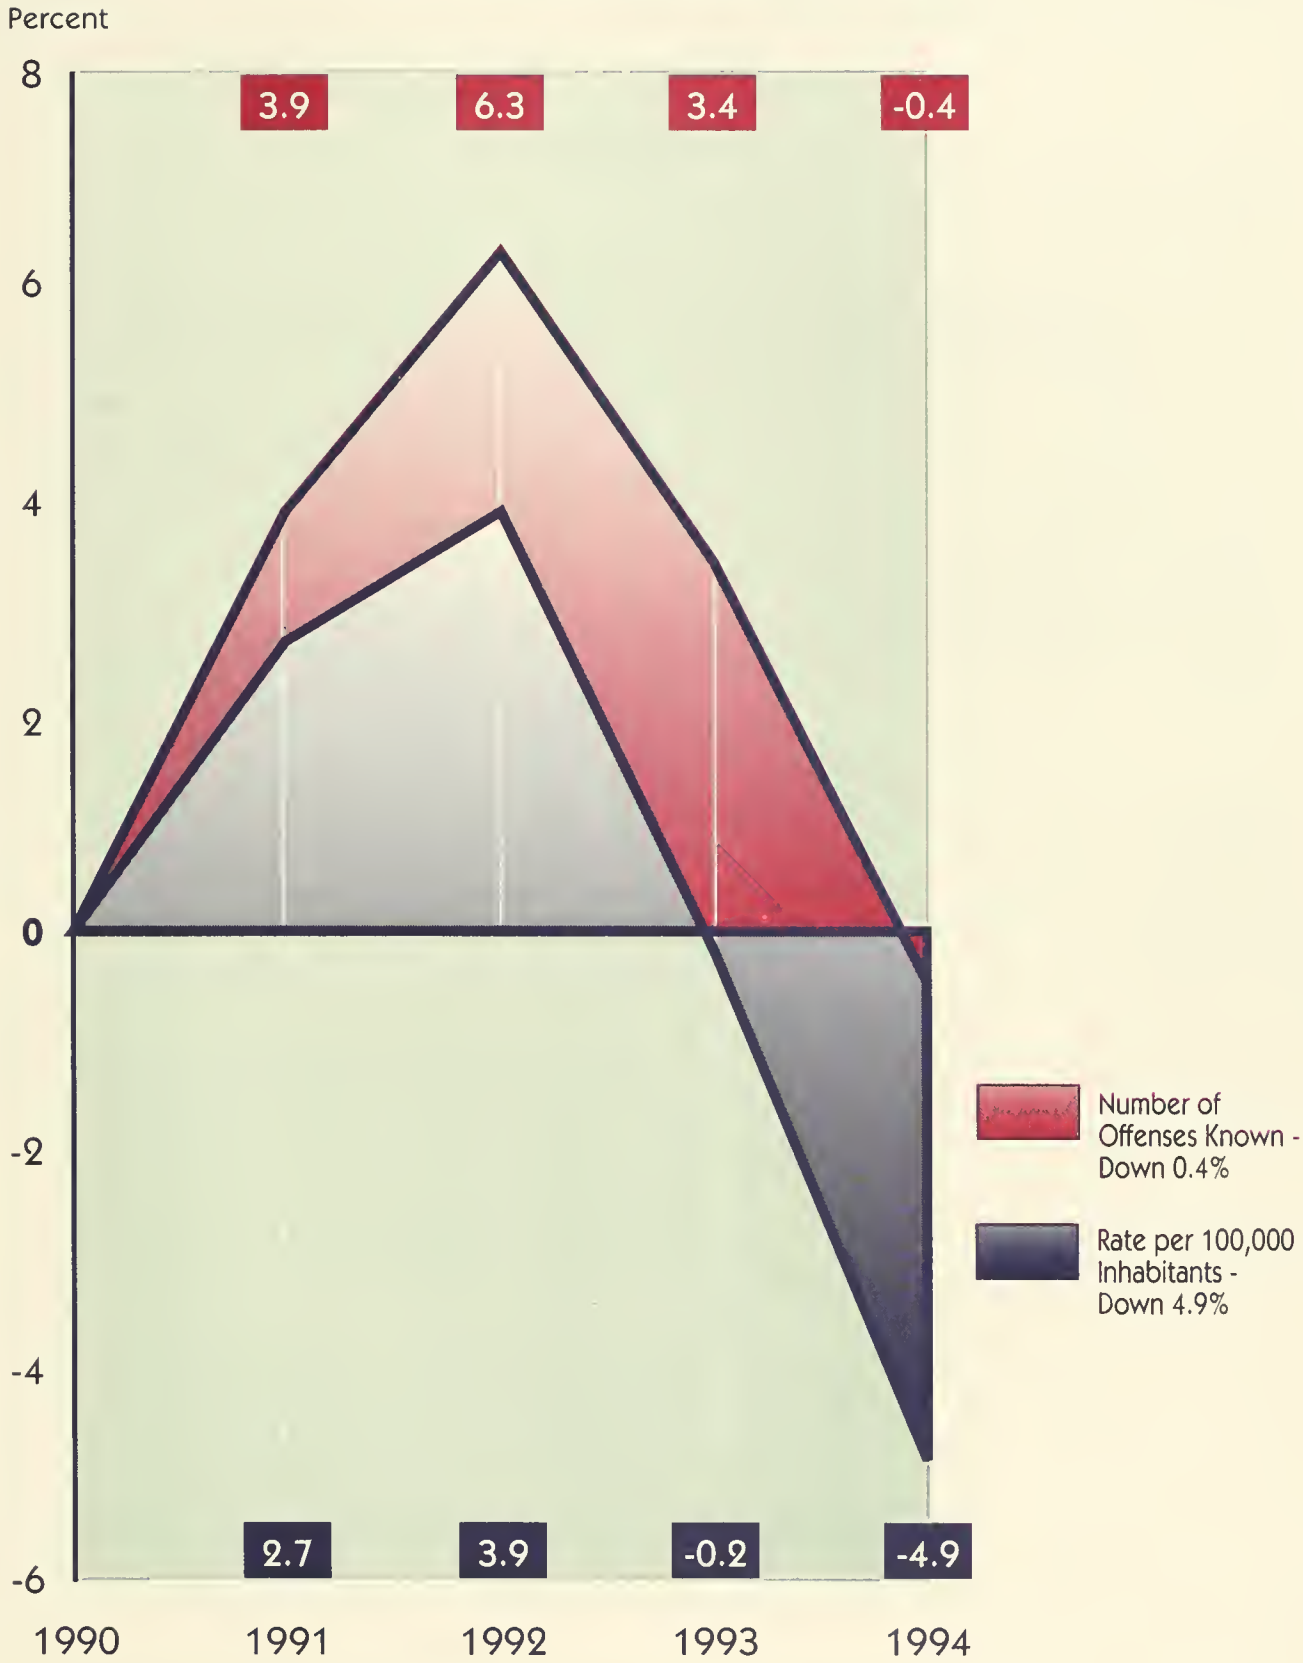
Law enforcement agencies nationwide made an estimated 36,610 arrests for forcible rape in 1994. Of the forcible rape arrestees, about 4 of every 10 were under age 25. Over half of those arrested were white. (See Tables 29, 41, and 43.)

The number of arrests for forcible rape fell 6 percent nationwide from 1993 to 1994. A decrease of 7 percent was experienced in the Nation's cities, and 4-percent declines were recorded in the rural and suburban counties. (See Tables 36, 44, 50, and 56.)

FORCIBLE RAPE

CHART 2.7

PERCENT CHANGE FROM 1990



ROBBERY

DEFINITION

Robbery is the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1993	659,870	255.9
1994	618,817	237.7
Percent change	-6.2	-7.1

Estimated at nearly 619,000 offenses, robberies in 1994 accounted for 4 percent of all Index crimes and 33 percent of the violent crimes. During the year, robberies occurred most frequently in August and October and least often in February.

Table 2.19—Robbery by Month, 1990-1994
[Percent distribution]

Months	1990	1991	1992	1993	1994
January	8.7	8.7	9.0	8.8	8.7
February	7.3	7.5	8.0	7.1	7.7
March	8.1	8.0	8.1	8.3	8.6
April	7.2	7.4	7.8	7.4	8.0
May	7.7	7.8	7.9	7.5	8.0
June	7.8	7.8	7.9	8.1	8.0
July	8.5	8.4	8.4	8.7	8.5
August	8.8	8.8	8.6	8.8	8.8
September	8.6	8.5	8.3	8.4	8.3
October	8.9	9.2	8.7	9.0	8.8
November	8.7	8.7	8.3	8.5	8.2
December	9.6	9.2	9.0	9.4	8.4

The 1994 robbery volume was down 6 percent from 1993 levels nationally and in the Nation's cities. The largest decline—11 percent—was experienced in cities with a million or more inhabitants. During the same period, the robbery volume dropped 4 percent in the suburban counties but increased 4 percent in the rural counties. (See Table 12.)

Regionally, the Southern States, the most populous region, accounted for 32 percent of all reported robberies. The Northeastern and Western States each recorded 24 percent; and the Midwest, 20 percent. (See Table 3.) Two-year trends show the number of robberies in 1994 was down in all regions as compared to 1993. The declines ranged from 10 percent in the Northeast to 1 percent in the Midwest.

Chart 2.8 depicts the national trend in the robbery volume, as well as the robbery rate, for the years 1990-1994. In 1994, the number of robbery offenses was 3 percent lower than in 1990 but 24 percent higher than in 1985.

Rate

The national robbery rate in 1994 was 238 per 100,000 people, 7 percent lower than in 1993. In metropolitan areas, the 1994 rate was 288; in cities outside metropolitan areas, it was 75; and in the rural areas, it was 17. With 877 robberies per 100,000 inhabitants, the highest rate was recorded in cities with a million or more inhabitants. (See Table 16.)

Robbery rates per 100,000 inhabitants declined in all regions from 1993 to 1994. The rates of 291 in the Northeast and 256 in the West were down 10 and 9 percent respectively. The South's rate of 221 was 6 percent lower; and the Midwest's rate of 200 was down 2 percent. (See Table 4.)

Nature

Losses estimated at $496 million were attributed to robberies during 1994. The value of property stolen averaged $801 per robbery, down from $815 in 1993. Average dollar losses in 1994 ranged from $387 taken during robberies of convenience stores to $3,551 per bank robbery. (See Table 23.) The impact of this violent crime on its victims cannot be measured in terms of monetary loss alone. While the object of a robbery is to obtain money or property, the crime always involves force or threat of force, and many victims suffer serious personal injury.

Robberies on streets or highways accounted for more than half (55 percent) of the offenses in this category during 1994. Robberies of commercial and financial establishments accounted for an additional 21 percent, and those occurring at residences, 11 percent. The remainder were miscellaneous types. All robbery types declined in 1994 as compared to 1993 totals. The decreases ranged from 25 percent for bank robberies to 1 percent for residential robberies. (See Table 23.)

[1]Because of rounding, percentages may not add to totals.

Firearms were the weapons used in 42 percent of all robberies in 1994. Strong-armed tactics were used in 39 percent, knives or cutting instruments in 9 percent, and other dangerous weapons in the remainder. A comparison of 1993 and 1994 robbery totals by weapon showed those by knives or cutting instruments dropped 10 percent; those by firearms decreased 8 percent; and those by strong-arm tactics and by other dangerous weapons were each down 3 percent. A state-by-state breakdown of weapons used in robberies in 1994 is shown in Table 21.

Table 2.22—Robbery, Type of Weapons Used, 1994

Western States	100.0	39.3	9.8	11.7	39.3

[1]Because of rounding, percentages may not add to totals.

Law Enforcement Response

The 1994 robbery clearance rate was 24 percent nationally and in the cities collectively. The highest robbery clearance rate—39 percent—was registered by rural county law enforcement agencies. In suburban counties, the rate was 27 percent. (See Table 25.) Regional robbery clearance percentages ranged from 20 percent in the Midwest to 27 percent in the South. (See Table 26.)

Persons under the age of 18, exclusively, were the offenders in 20 percent of all 1994 robbery clearances. This age group accounted for 22 percent of the suburban county clearances, 19 percent of those in the Nation's cities, and 13 percent of those by rural county agencies. (See Table 28.)

Two percent fewer persons were arrested for robbery in 1994 than in 1993. For the 2-year period, arrests of adults for robbery decreased 7 percent, while juvenile arrests were up 11 percent. Robbery arrests decreased 2 percent in the Nation's cities, and the rural counties showed virtually no change. The suburban counties recorded a 2-percent increase.

Considering the 5-year period, 1990-1994, total robbery arrests were down 3 percent. For the same timespan, arrests of males for robbery decreased 4 percent, but female arrests increased 9 percent. Arrests of persons 18 years of age and older decreased 14 percent, while juvenile arrests rose 32 percent.

Sixty-four percent of all robbery arrestees in 1994 were under 25 years of age, and 91 percent were males. Sixty-one percent of those arrested were black, 38 percent were white, and the remainder were of other races.

AGGRAVATED ASSAULT

DEFINITION

Aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1993	1,135,607	440.3
1994	1,119,950	430.2
Percent change	-1.4	-2.3

After increasing steadily since 1983, aggravated assaults dropped 1 percent in 1994 to an estimated 1,119,950 offenses. Aggravated assaults in 1994 accounted for 60 percent of the violent crimes.

Geographic distribution figures show that 40 percent of the aggravated assault volume was accounted for by the most populous Southern Region. Following were the Western Region with 25 percent, the Midwestern Region with 19 percent, and the Northeastern Region with 15 percent. Among the regions, only the Midwest registered an increase in the number of reported aggravated assaults. (See Table 4.)

The 1994 monthly figures show that the greatest number of aggravated assaults was recorded during July, while the lowest volume occurred during February.

Table 2.23—Aggravated Assault by Month, 1990-1994
[Percent distribution]

Months	1990	1991	1992	1993	1994
January	7.4	6.9	7.3	7.5	7.2
February	6.7	6.6	7.3	6.5	7.0
March	7.8	7.7	8.0	8.1	8.3
April	8.2	8.1	8.7	8.3	8.5
May	9.0	9.1	9.2	8.9	8.8
June	9.4	9.3	8.9	9.1	8.9
July	10.1	9.7	9.4	9.6	9.5
August	9.3	9.9	9.1	9.2	9.4
September	8.9	9.0	8.6	8.3	8.9
October	8.3	8.6	8.5	8.5	8.7
November	7.4	7.6	7.6	7.4	7.7
December	7.5	7.6	7.4	8.6	7.3

The Nation's cities collectively experienced a decrease of 2 percent in the aggravated assault volume from 1993 to 1994. Percent changes among the city population groupings ranged from a 4-percent decline in cities with populations over 1 million to a 1-percent increase in cities with 10,000 - 24,999 inhabitants. The suburban counties registered a 1-percent increase in the number of aggravated assaults reported, and the rural counties, a 5-percent rise for the 2-year period. (See Table 12.)

Five- and 10-year trends for the country as a whole showed aggravated assaults 6 percent higher than in 1990 and 55 percent above the 1985 experience. (See Table 1.)

Rate

There were 430 reported victims of aggravated assault for every 100,000 people nationwide in 1994, the lowest rate since 1990. The rate was 2 percent lower than in 1993, 1 percent higher than in 1990, and 42 percent above the 1985 rate.

Higher than the national average, the rate in metropolitan areas was 472 per 100,000 in 1994. Cities outside metropolitan areas experienced a rate of 382, and rural counties, a rate of 189.

Regionally, the aggravated assault rate was 337 per 100,000 people in the Northeast, 350 in the Midwest, 493 in the South, and 500 in the West. Compared to 1993, 1994 aggravated assault rates were down in all regions except the Midwest, which experienced virtually no change. (See Table 4.)

Nature

Thirty-two percent of the aggravated assaults in 1994 were committed with blunt objects or other dangerous weapons. Of the remaining weapon categories, personal weapons such as hands, fists, and feet were used in 26 percent of the assaults; firearms in 24 percent; and knives or cutting instruments in the remainder.

Firearms were used in 6 percent fewer assaults in 1994 than in 1993. Assaults with knives or cutting instruments also decreased, 1 percent. Showing increases were assaults with personal weapons (hands, fists, and feet) and those involving blunt objects or other dangerous weapons, both up 2 percent over 1993. State-by-state totals for weapons used in assaults during 1994 are shown in Table 22.

Table 2.24—Aggravated Assault, Type of Weapons Used, 1994
[Percent distribution by region]

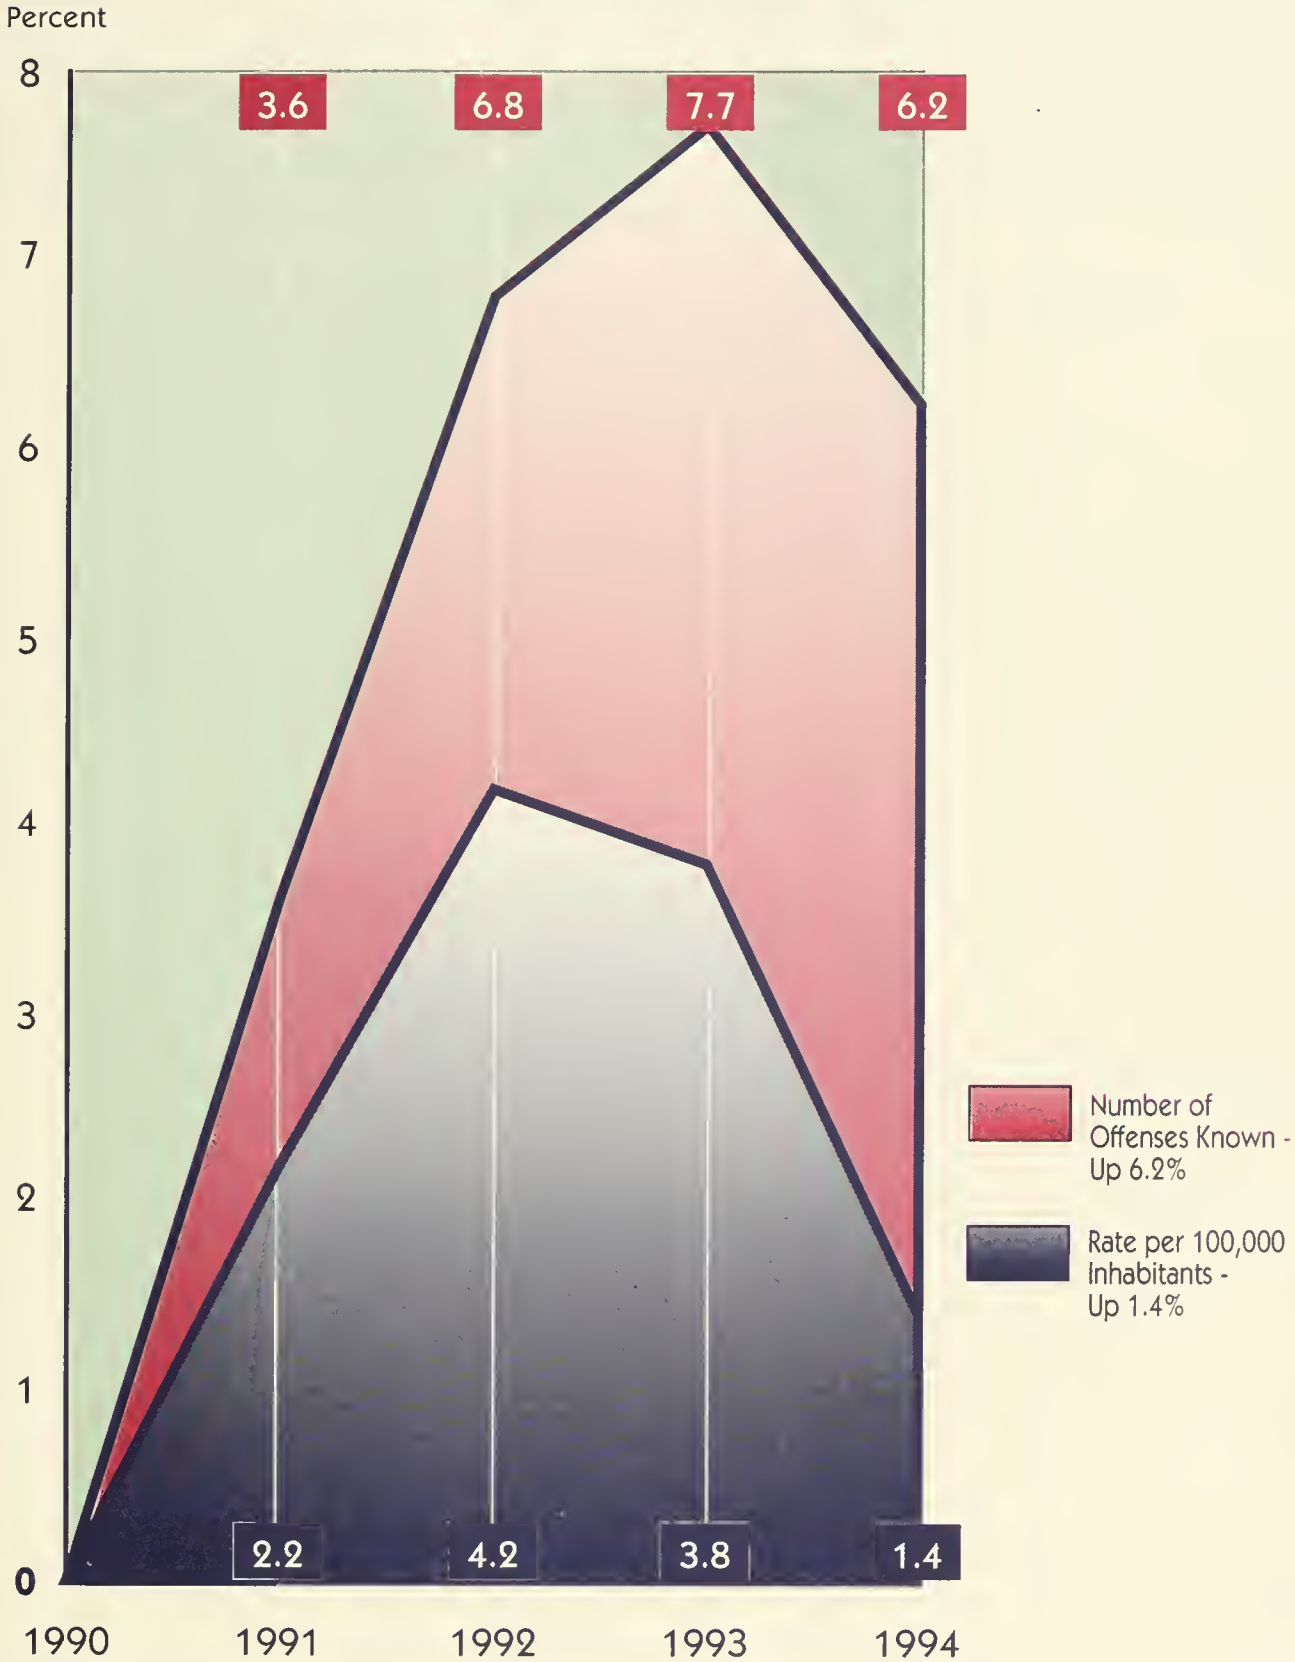
Region	Total all weapons[1]	Firearms	Knives or cutting instruments	Other weapons (clubs, blunt objects, etc.)	Personal weapons
Total	100.0	24.0	17.8	32.0	26.2
Northeastern States	100.0	15.9	20.9	33.7	29.5
Midwestern States	100.0	28.5	18.0	34.2	19.2
Southern States	100.0	26.4	19.1	32.8	21.8
Western States	100.0	22.4	13.8	28.3	35.4

[1]Because of rounding, percentages may not add to totals.

AGGRAVATED ASSAULT

CHART 2.10

PERCENT CHANGE FROM 1990



Law Enforcement Response

Law enforcement agencies nationwide recorded a 56-percent aggravated assault clearance rate during 1994. The cities collectively reported 55 percent cleared, while the suburban and rural county law enforcement agencies cleared 60 and 64 percent, respectively. Among the city groupings, those with populations under 10,000 recorded the highest assault clearance rate, 65 percent. (See Table 25.)

Regional clearance percentages for aggravated assault were 58 percent in the West, 57 percent in both the Northeast and the South, and 51 percent in the Midwest.

Thirteen percent of the clearances reported nationally and in cities involved only persons under age 18. Persons in this age group were identified as the assailants in 15 percent of the clearances in the suburban counties and 10 percent of those in the rural counties.

Seven of every 10 violent crime arrests were for aggravated assault in 1994. Of the over half a million arrestees, whites comprised 59 percent; blacks, 39 percent; and all other races, the remainder. Eighty-three percent of the arrestees were males, and 84 percent, adults.

Aggravated assault arrests were up 3 percent in 1994 above the 1993 total. During this 2-year period, arrests of adults also increased 3 percent, and arrests of persons under age 18 were up 5 percent. A comparison of 1990 and 1994 figures showed increases of 9 percent for total arrests, 25 percent for juvenile arrests, and 6 percent for adult arrests.

PROPERTY CRIME TOTAL

DEFINITION

Property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims. Arson is included since it involves the destruction of property; its victims may be subjected to force.

TREND

Year	*Number of offenses*[1]	*Rate per 100,000 inhabitants*[1]
1993	12,218,777	4,737.6
1994	12,127,507	4,658.3
Percent change	-.7	-1.7

[1]Does not include arson. See page 57.

Estimated property crimes decreased 1 percent to 12.1 million reported offenses in 1994, the lowest total since 1987. Five- and 10-year trends show the 1994 volume was 4 percent lower than the 1990 total but was 9 percent higher than in 1985.

A comparison of 1993 and 1994 property crime volumes showed declines of 5 percent in the Northeast and 1 percent in the South. One-percent increases were experienced in the Midwest and West. The Nation's cities collectively recorded a 1-percent property crime decrease, with the greatest drop (7 percent) in cities with populations of a million or more. Rural and suburban county law enforcement agencies each recorded increases, 2 and 1 percent, respectively. (See Tables 4 and 12.)

As in previous years, 1994 monthly figures show more property crime occurred in August, while the lowest total was recorded in February.

Table 2.25—Property Crime Total by Month, 1990-1994

November	8.2	8.0	8.0	8.1	8.3
December	8.6	8.4	8.1	9.1	7.9

Rate

In 1994, there were an estimated 4,658 property crimes for every 100,000 United States inhabitants. The 1994 property crime rate was almost 2 percent lower than the 1993 rate and 8 percent under the 1990 rate. The property crime rate has declined for 3 consecutive years.

Geographically, the 1994 property crime rate decreased in all regions except the Midwest, whose rate of 4,215 represented an increase of less than 1 percent as compared to 1993. The rate of 3,682 per 100,000 in the Northeast showed the largest decline, 6 percent. The rate of 5,080 in the South represented a 2-percent decrease; and the West's rate of 5,346, 1-percent decline.

Property crime rates for 1994 were 5,082 in metropolitan areas, 4,818 in cities outside metropolitan areas, and 1,794 in rural counties. By population group, the highest rate — 8,424 — was recorded in cities with populations from 250,000 to 499,999. (See Tables 2 and 16.)

Nature

The dollar value of property stolen in connection with property crimes in 1994 was estimated at $15.1 billion, up from $14.8 billion in 1993. The average loss per offense in 1994 was $1,248 as compared to $1,213 in 1993.

Larceny-theft accounted for 65 percent of all property crime in 1994. Burglary accounted for 22 percent and motor vehicle theft for 13 percent. Although arson is excluded from the property crime offense and clearance tabulations because of its limited timespan as an Index offense and lower national coverage, more than 100,000 offenses were reported. The average dollar loss was $9,761 per arson in 1994, based on data from 11,932 law enforcement agencies who provided detailed arson data. The average loss per arson in 1994 declined significantly from 1992 and 1993 averages. Damages in these previous years were influenced by arsons during the Los Angeles riots in 1992 and to forested areas of California in 1993.

Regionally, 38 percent of all property crimes were recorded in the Southern States. Following were the Western States with 25 percent, the Midwestern States with 21 percent, and the Northeastern States with 16 percent.

Law Enforcement Response

Property crimes generally have lower clearance rates than violent crimes, and in 1994, the overall property crime clearance rate was 18 percent, as compared to 45 percent for violent crime. Geographically, the Midwest's and South's 1994 property crime clearance rates equalled the Nation's, 18 percent. Rates of 17 percent were recorded in the Northeast and West. (See Table 26.)

Twenty-five percent of the property crimes cleared by law enforcement nationwide and in cities in 1994 involved only young people under age 18. The juvenile percentage was 26 percent in suburban counties and 22 percent in rural counties. (See Table 28.)

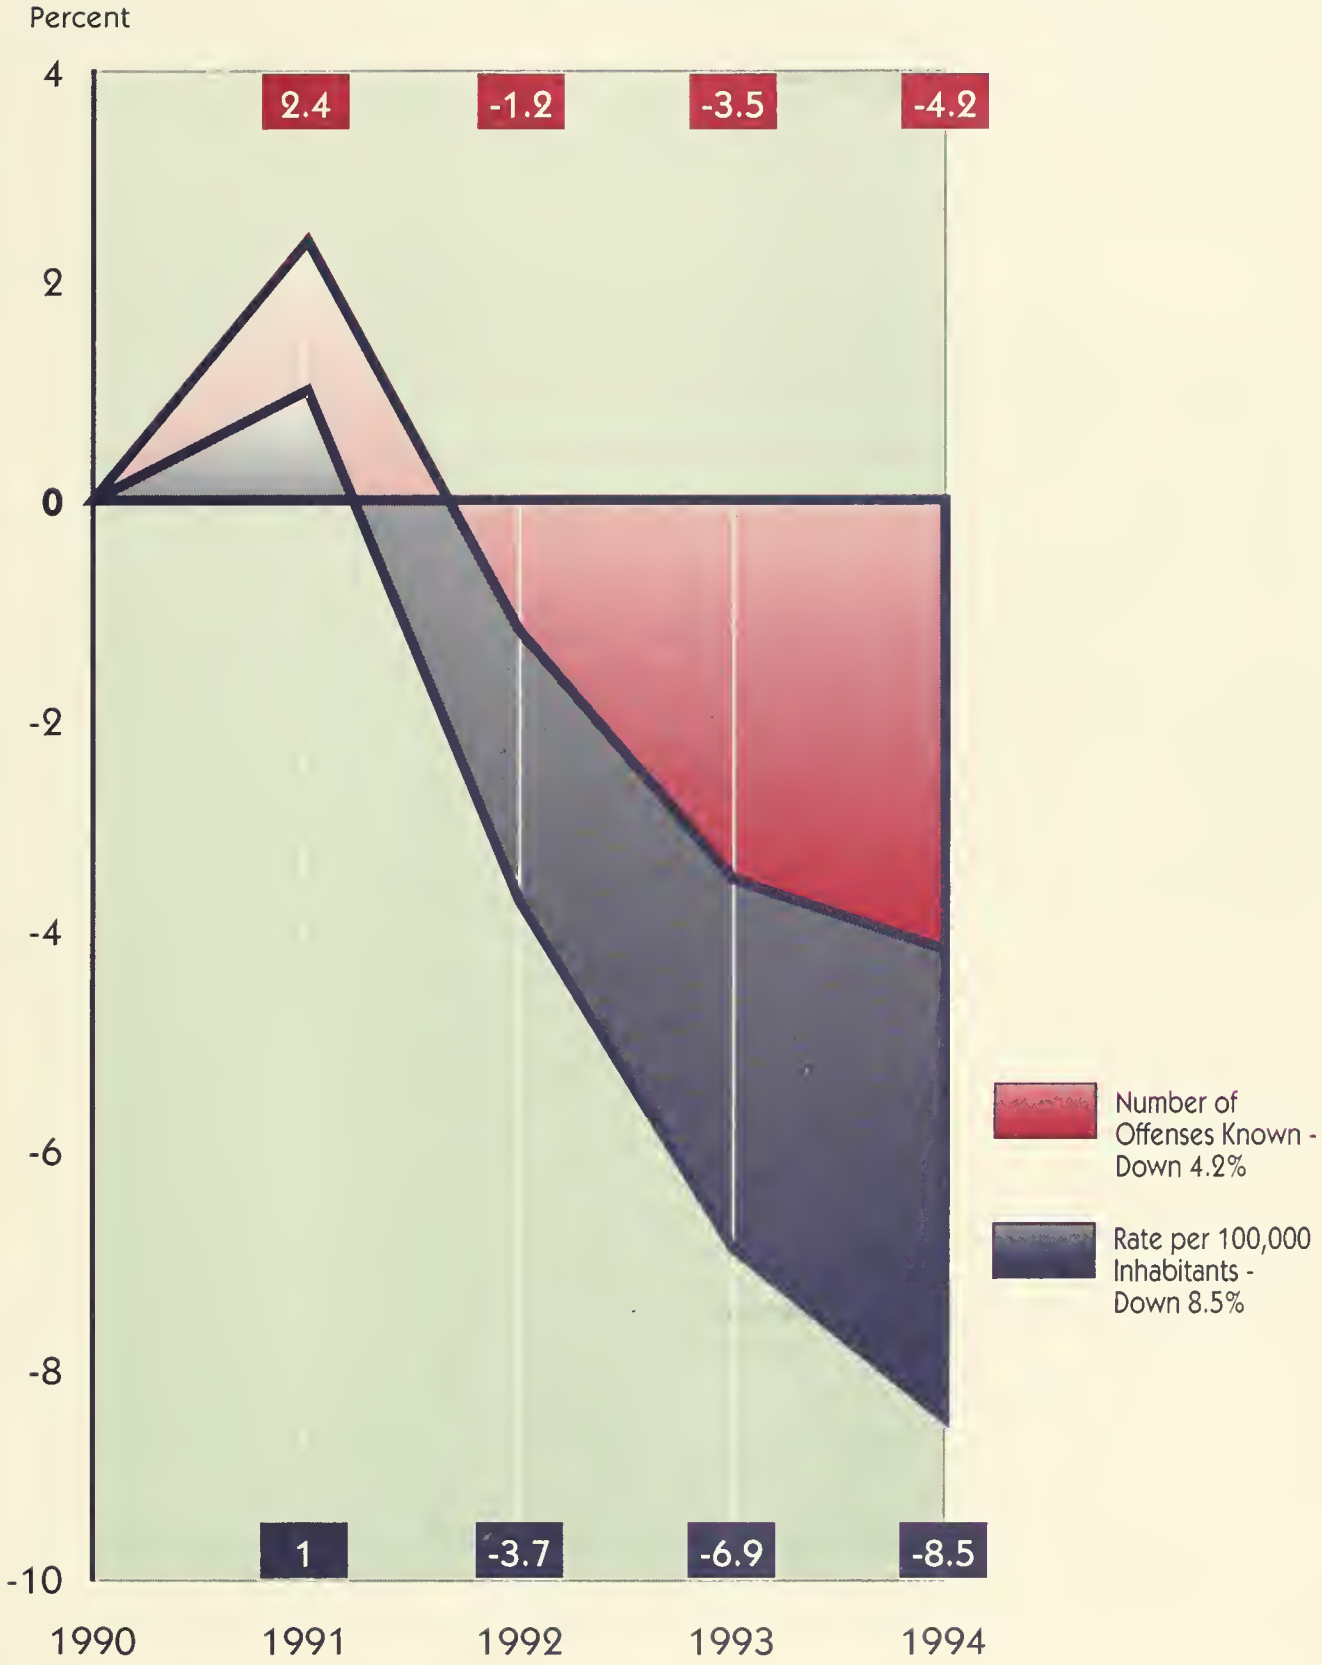
The estimated 2.1 million persons arrested for property crimes in 1994 accounted for 15 percent of all arrestees. Property crime arrests in 1994 were 1 percent above the 1993 total, 6 percent lower than the 1990 total, and 8 percent above the 1985 experience. Compared to 1993 totals, arrests of persons under age 18 for property crimes rose 5 percent in 1994, while adult arrests dropped 2 percent, nationwide. (See Tables 32, 34, and 36.)

In 1994, 73 percent of all property crime arrestees were males, 64 percent of the total were white, and 65 percent were over age 18.

PROPERTY CRIME

CHART 2.11

PERCENT CHANGE FROM 1990



BURGLARY

DEFINITION

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1993	2,834,808	1,099.2
1994	2,712,156	1,041.8
Percent change	-4.3	-5.2

The estimated 2.7 million burglaries in the United States during 1994 accounted for 19 percent of the Crime Index total and 22 percent of the property crimes. Distribution figures for the regions showed that the highest burglary volume (40 percent) occurred in the most populous Southern States. The Western States followed with 24 percent, the Midwestern States with 20 percent, and the Northeastern States with 15 percent. (See Table 3.)

The greatest number of burglaries was recorded during August of 1994, while the lowest count was in February. (See Table 2.26.)

June	7.9	8.2	8.1	8.4	8.3
July	8.9	9.2	9.0	9.0	9.2
August	9.0	9.2	9.0	9.1	9.4
September	8.3	8.6	8.4	8.5	8.6
October	8.5	8.6	8.3	8.4	8.6
November	8.3	8.0	8.2	8.1	8.4
December	8.7	8.6	8.3	9.3	7.9

Nationwide, the burglary volume dropped 4 percent in 1994 from the 1993 total. In the Nation's cities, it decreased 5 percent; in the suburban counties, 3 percent; and in the rural counties, 1 percent. (See Table 12.)

All four regions of the United States reported decreases in burglary volumes during 1994 as compared to 1993. The Northeastern States experienced an 8-percent decline; the Southern States, a 5-percent decrease; and the Western States, a 3-percent drop. The Midwestern States reported the smallest change, a 1-percent decline. (See Table 4.)

Longer term national trends show burglary down 12 percent from both the 1990 and 1985 volumes.

Rate

The burglary rate was 1,042 per 100,000 inhabitants nationwide in 1994. The rate was 5 percent lower than in 1993, down 16 percent from 1990, and 19 percent below the 1985 rate. In 1994, for every 100,000 in population, the rate was 1,113 in the metropolitan areas, 965 in the cities outside metropolitan areas, and 632 in the rural counties.

Regionally, the burglary rate was 1,206 in the Southern States, 1,163 in the Western States, 886 in the Midwestern States, and 804 in the Northeastern States. A comparison of 1993 and 1994 rates showed decreases of 8 percent in the Northeast, 6 percent in the South, 5 percent in the West, and 1 percent in the Midwest. (See Table 4.)

Nature

Two of every 3 burglaries in 1994 were residential in nature. Sixty-seven percent of all burglaries involved forcible entry, 25 percent were unlawful entries (without force), and the remainder were forcible entry attempts. Offenses for which time of occurrence was reported showed that 52 percent of burglaries happened during daytime hours and 48 percent at night. More residential burglaries (59 percent) occurred during the daytime, while 62 percent of nonresidential burglaries occurred during nighttime hours.

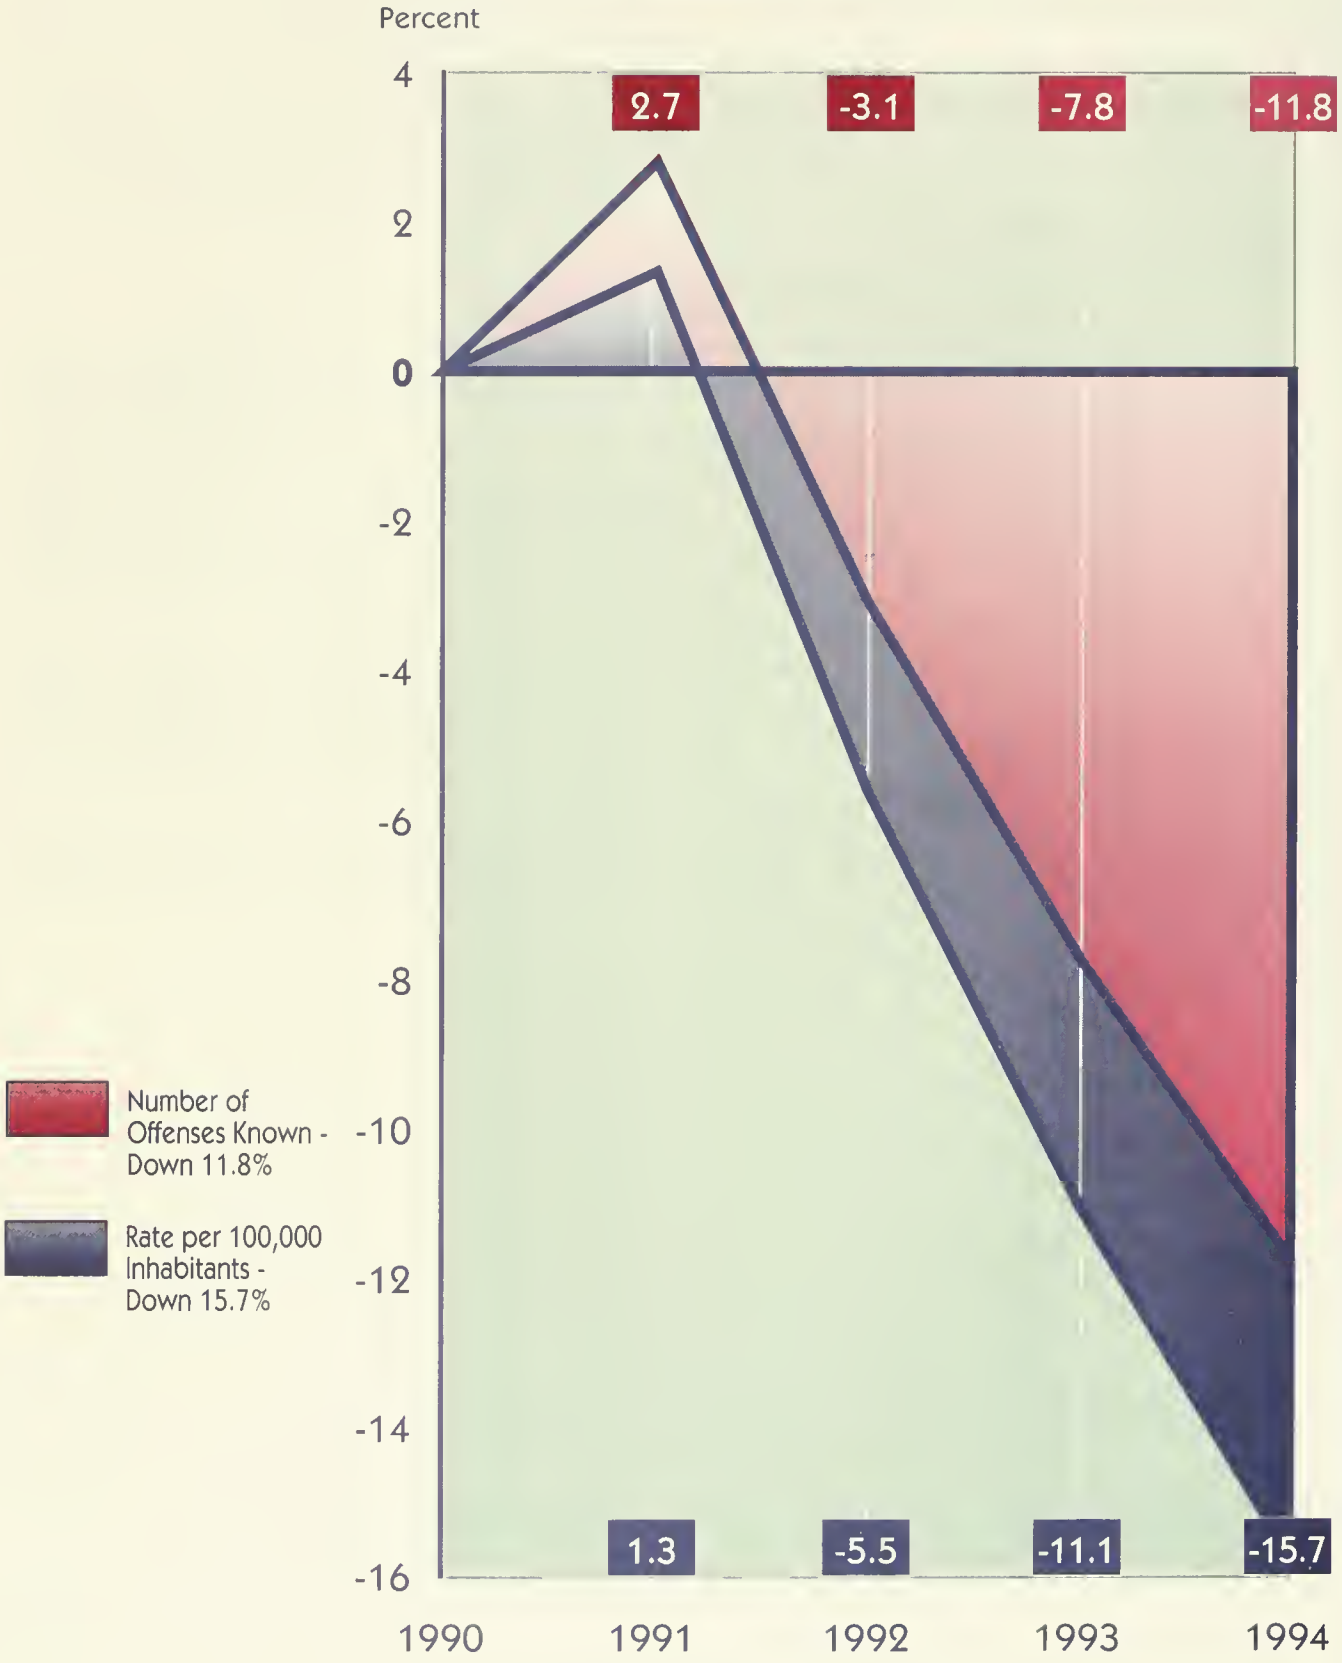
The volume of property stolen in burglaries was estimated at $3.6 billion in 1994, and the average dollar loss per burglary was $1,311. The average loss for residential offenses was $1,296 and for nonresidential offenses, $1,341. Compared to 1993, the 1994 average loss for both residential and nonresidential property increased.

Both residential and nonresidential burglary volumes also showed declines from 1993 to 1994, 4 and 6 percent, respectively. (See Table 23.)

BURGLARY

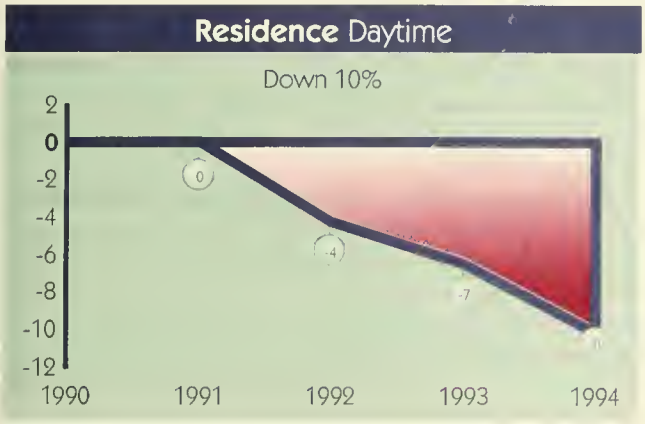
CHART 2.12

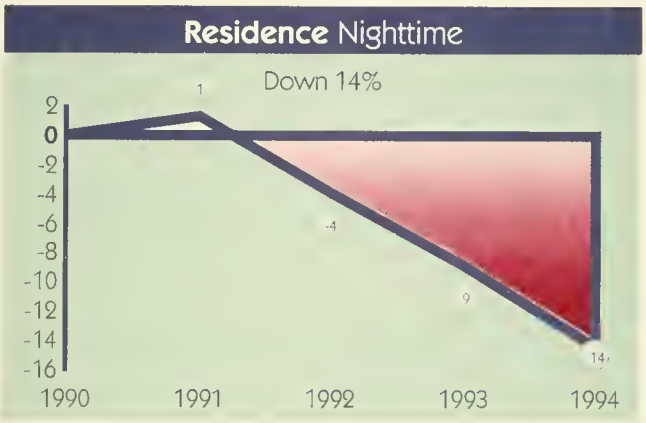
PERCENT CHANGE FROM 1990

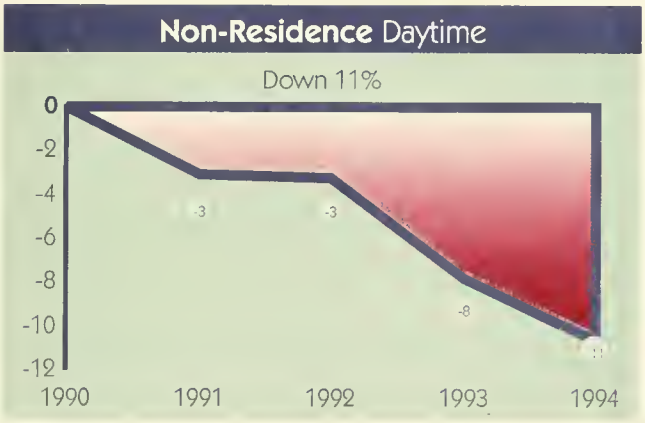


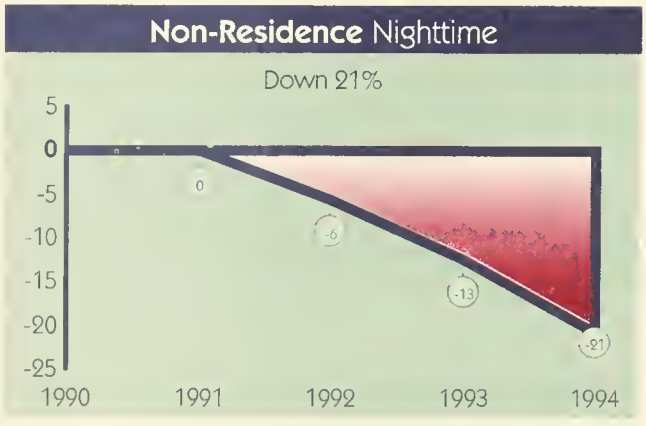
BURGLARY Percent Change from 1990

CHART 2.13









Law Enforcement Response

Nationwide in 1994, a 13-percent clearance rate was recorded for burglaries brought to the attention of law enforcement agencies across the country. Geographically, in the South, the clearance rate was 15 percent; in the Northeast, 13 percent; and in both the Midwest and West, 12 percent. (See Table 26.)

Rural county law enforcement agencies cleared 17 percent of the burglaries in their jurisdictions. Agencies in suburban counties cleared 14 percent, and those in cities, 13 percent. (See Table 25.)

Adults were involved in 79 percent of all burglary offenses cleared; the remaining 21 percent involved only young people under 18 years of age. Persons under age 18 accounted for 20 percent of the burglary clearances in cities, 22 percent of those in rural counties, and 24 percent of those in suburban counties. The highest degree of juvenile involvement was recorded in the Nation's smallest cities (under 10,000 in population) where young persons under 18 years of age accounted for 27 percent of the clearances. (See Table 28.)

In the UCR Program, several persons may be arrested in connection with the clearance of one crime, or the arrest of one individual may clear numerous offenses. The latter is often true in cases of burglary, for which an estimated 396,100 arrests were made in 1994.

Arrest trends between 1993 and 1994 show total burglary arrests were down 4 percent. Arrests of adults were down 6 percent, while those of persons under 18 years of age increased 1 percent. For the same 2-year time period, total burglary arrest trends showed decreases of 4 percent in cities; 3 percent in rural counties; and 1 percent in suburban counties.

Ninety percent of the burglary arrestees during 1994 were males, and 63 percent of the total were under 25 years of age. Among all burglary arrestees, whites accounted for 67 percent, blacks for 31 percent, and other races for the remainder.

LARCENY-THEFT

DEFINITION

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1993	7,820,909	3,032.4
1994	7,876,254	3,025.4
Percent change	+.7	-.2

Larceny-theft, estimated at nearly 7.9 million offenses during 1994, comprised 56 percent of the Crime Index total and 65 percent of the property crimes. Similar to the experience in previous years, larceny-thefts were recorded most often during August and least frequently in February.

Table 2.27—Larceny-Theft by Month, 1990-1994
[Percent distribution]

Months	1990	1991	1992	1993	1994
January	8.2	7.8	8.2	7.7	7.4
February	7.4	7.5	7.8	6.8	7.1
March	8.2	8.2	8.3	8.0	8.1
April	7.9	8.1	8.1	8.0	8.1
May	8.3	8.4	8.2	8.2	8.5
June	8.3	8.5	8.5	8.7	8.6
July	8.9	9.2	9.1	9.2	9.2
August	9.1	9.3	9.1	9.3	9.5
September	8.2	8.3	8.4	8.3	8.5
October	8.7	8.7	8.6	8.6	8.9
November	8.1	7.9	7.9	8.0	8.3
December	8.4	8.2	8.0	9.1	7.9

Viewed geographically, the Southern States, the most populous region, recorded 38 percent of the larceny-theft total. The Western States recorded 24 percent; the Midwestern States, 22 percent; and the Northeastern States, 15 percent. (See Table 3.)

The 1994 volume of larceny-thefts was 1 percent higher than the 1993 total. The Nation's cities collectively showed no change for the 2-year period, while increases of 3 percent were experienced in both the rural and suburban counties.

Larceny volumes increased in three of four geographic regions. The West showed a 2-percent rise and the Midwest and the South, both 1-percent increases. In the Northeast, the number of larceny-thefts dropped 3 percent. (See Table 4.)

The 5- and 10-year national trends indicated larceny was down 1 percent when compared to the 1990 total but 14 percent above the 1985 level.

Rate

Virtually unchanged from 1993, the 1994 larceny-theft rate was 3,025 per 100,000 United States inhabitants. The rate was 5 percent lower than in 1990 but 4 percent above the 1985 rate. The 1994 rate was 3,268 per 100,000 inhabitants of metropolitan areas; 3,623 per 100,000 population in cities outside metropolitan areas; and 1,046 per 100,000 people in the rural counties. (See Tables 1 and 2.)

By region, the 1993 larceny-theft rate per 100,000 inhabitants in the Northeast was 2,280, down 3 percent; and the South's rate of 3,329 declined less than 1 percent. Increasing 1 percent were the rates in the West, at 3,384, and the Midwest, at 2,869. (See Table 4.)

Nature

During 1994, the average value of property stolen due to larceny-theft was $505, up from $504 in 1993. When the average value was applied to the estimated number of larceny-thefts, the loss to victims nationally was $4 billion for the year. This estimated dollar loss is considered conservative since many offenses in the larceny category, particularly if the value of the stolen goods is small, never come to law enforcement attention. Losses in 39 percent of the thefts reported to law enforcement were under $50. Twenty-three percent involved losses ranging from $50 to $200, while in 37 percent, they were over $200.

Losses of goods and property reported stolen as a result of pocket-picking averaged $428; purse-snatching, $279; and shoplifting, $133. Thefts from buildings resulted in an average loss of $851; from motor vehicles, $542; and from coin-operated machines, $228. The average value loss due to thefts of motor vehicle accessories was $312 and for thefts of bicycles, $252. (See Table 23.)

Thefts of motor vehicle parts, accessories, and contents made up the largest portion of reported larcenies—37 percent. Also contributing to the high volume of thefts were shoplifting, accounting for 15 percent; thefts from buildings, 13 percent; and bicycle thefts, 6 percent. The remainder was distributed among pocket-picking, purse-snatching, thefts from coin-operated machines, and all other types of larceny-thefts. Table 2.28 presents the distribution of larceny-theft by type and geographic region.

Table 2.28—Larceny Analysis by Region, 1994
[Percent distribution]

	United States Total	North-eastern States	Mid-western States	Southern States	Western States
Total[1]	100.0	100.0	100.0	100.0	100.0
Pocket-picking	.8	2.8	.3	.5	.4

LARCENY-THEFT

Percent Distribution by Type of Theft

1994

Law Enforcement Response

A 20-percent larceny-theft clearance rate was recorded nationally and in cities during 1994. The highest rate, 26 percent, was reported by law enforcement agencies in cities from 10,000 to 24,999 in population. Suburban and rural counties recorded 17-percent and 18-percent clearance rates, respectively.

All geographic regions recorded 20-percent larceny-theft clearance rates in 1994. (See Table 26.)

Twenty-five percent of the larceny-theft clearances nationally and in cities involved only offenders under 18 years of age. Twenty-seven percent of those in suburban counties and 21 percent of those in rural counties were accounted for by persons in this age group.

The number of persons arrested for larceny rose 2 percent from 1993 to 1994. By gender, arrests for males increased 1 percent and those of females, 4 percent. During this same period, arrests of persons under 18 years of age were up 8 percent, while those of adults were down 1 percent.

For the 5-year period, 1990-1994, total larceny-theft arrests declined 4 percent and those of adults dropped 9 percent. Arrests of persons under the age of 18 were, however, up 10 percent. During this same timespan, male arrests declined 6 percent, while female arrests rose 1 percent.

Larceny-theft not only comprised the largest portion of Crime Index offenses reported to law enforcement, but this offense also accounted for 52 percent of the arrests for Index crimes and 71 percent of those for property crimes in 1994. Forty-six percent of the larceny arrests were of persons under 21 years of age, and 33 percent of the arrestees were under 18. Females, who were arrested for this offense more often than for any other in 1994, comprised 33 percent of all larceny-theft arrestees.

Whites accounted for 64 percent of the total larceny-theft arrestees, blacks for 33 percent, and all other races for the remainder.

MOTOR VEHICLE THEFT

DEFINITION

Defined as the theft or attempted theft of a motor vehicle, this offense category includes the stealing of automobiles, trucks, buses, motorcycles, motorscooters, snowmobiles, etc. The definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

TREND

Year	*Number of offenses*	*Rate per 100,000 inhabitants*
1993	1,563,060	606.1
1994	1,539,097	591.2
Percent change	-1.5	-2.5

The over 1.5 million thefts of motor vehicles occurring in the United States during 1994 comprised 13 percent of all property crimes. The regional distribution of thefts showed 32 percent of the volume was in the Southern States, 30 percent in the Western States, 20 percent in the Northeastern States, and 18 percent in the Midwestern States. (See Table 3.)

The 1994 monthly figures show that the greatest numbers of motor vehicle thefts were recorded during the months of July and August, while the lowest count was in February.

Table 2.29—Motor Vehicle Theft by Month, 1990-1994
[Percent distribution]

Months	1990	1991	1992	1993	1994
January	8.5	8.3	8.8	8.5	8.2
February	7.6	7.5	7.9	7.3	7.4
March	8.4	8.2	8.2	8.2	8.5
April	7.9	7.8	7.8	7.8	8.0
May	8.1	8.1	8.1	7.9	8.2
June	8.1	8.2	8.2	8.4	8.3
July	8.8	8.7	8.8	8.9	8.9
August	8.8	8.9	8.9	8.9	9.1
September	8.4	8.3	8.2	8.4	8.4
October	8.8	8.7	8.6	8.6	8.8
November	8.3	8.5	8.3	8.3	8.4
December	8.4	8.8	8.2	8.8	7.8

Motor vehicle thefts declined 2 percent nationally and in the cities overall from 1993 to 1994. Among the city groupings, percent changes ranged from an 8-percent decline in cities with populations of 1 million or more to a 3-percent increase in those with populations from 100,000 to 249,999. During the same 2-year period, increases occurred in the suburban counties, 3 percent, and the rural counties, 6 percent.

Geographically, decreases in motor vehicle thefts were recorded in the Northeast, 10 percent, and in the South, 1 percent. The West and Midwest regions showed increases, 2 and 1 percent, respectively. (See Table 4.)

The accompanying chart shows that the volume of motor vehicle thefts in 1994 declined 6 percent from the 1990 volume.

Rate

The 1994 national motor vehicle theft rate—591 per 100,000 people—was 2 percent lower in 1993 and 10 percent below the 1990 rate. The 1994 rate was 28 percent above the 1985 rate.

For every 100,000 inhabitants living in metropolitan areas, there were 701 motor vehicle thefts reported in 1994. The rate in cities outside metropolitan areas was 230 and in rural counties, 119. As in previous years, the highest rates were in the Nation's most heavily populated municipalities, indicating that this offense is primarily a large-city problem. For every 100,000 inhabitants in cities with populations over 250,000, the 1994 motor vehicle theft rate was 1,414. The Nation's smallest cities, those with fewer than 10,000 inhabitants, recorded a rate of 244 per 100,000.

Among the regions, the motor vehicle theft rates ranged from 800 per 100,000 people in the Western States to 460 in the Midwestern States. The Northeastern States' rate was 599 and the Southern States' rate, 545. From 1993 to 1994, the Midwest and West registered rate increases of 1 percent. Both the South and Northeast reported decreases of 2 and 10 percent, respectively.

An estimated average of 1 of every 130 registered motor vehicles was stolen nationwide during 1994. Regionally, this rate was greatest in the West where 1 of every 98 motor vehicles registered was stolen. The other three regions reported lesser rates—1 per 179 in the Midwest, 1 per 141 in the South, and 1 per 113 in the Northeast.

Nature

The estimated value of motor vehicles stolen nationwide in 1994 was nearly $7.6 billion. At the time of theft, the average value per vehicle was $4,940. The recovery percentage for the value of vehicles stolen was higher than for any other property type. Relating the value of vehicles stolen to the value of those recovered resulted in a 61-percent recovery rate for 1994. (See Tables 23 and 24.)

Seventy-nine percent of all motor vehicles reported stolen during the year were automobiles, 16 percent were trucks or buses, and the remainder were other types.

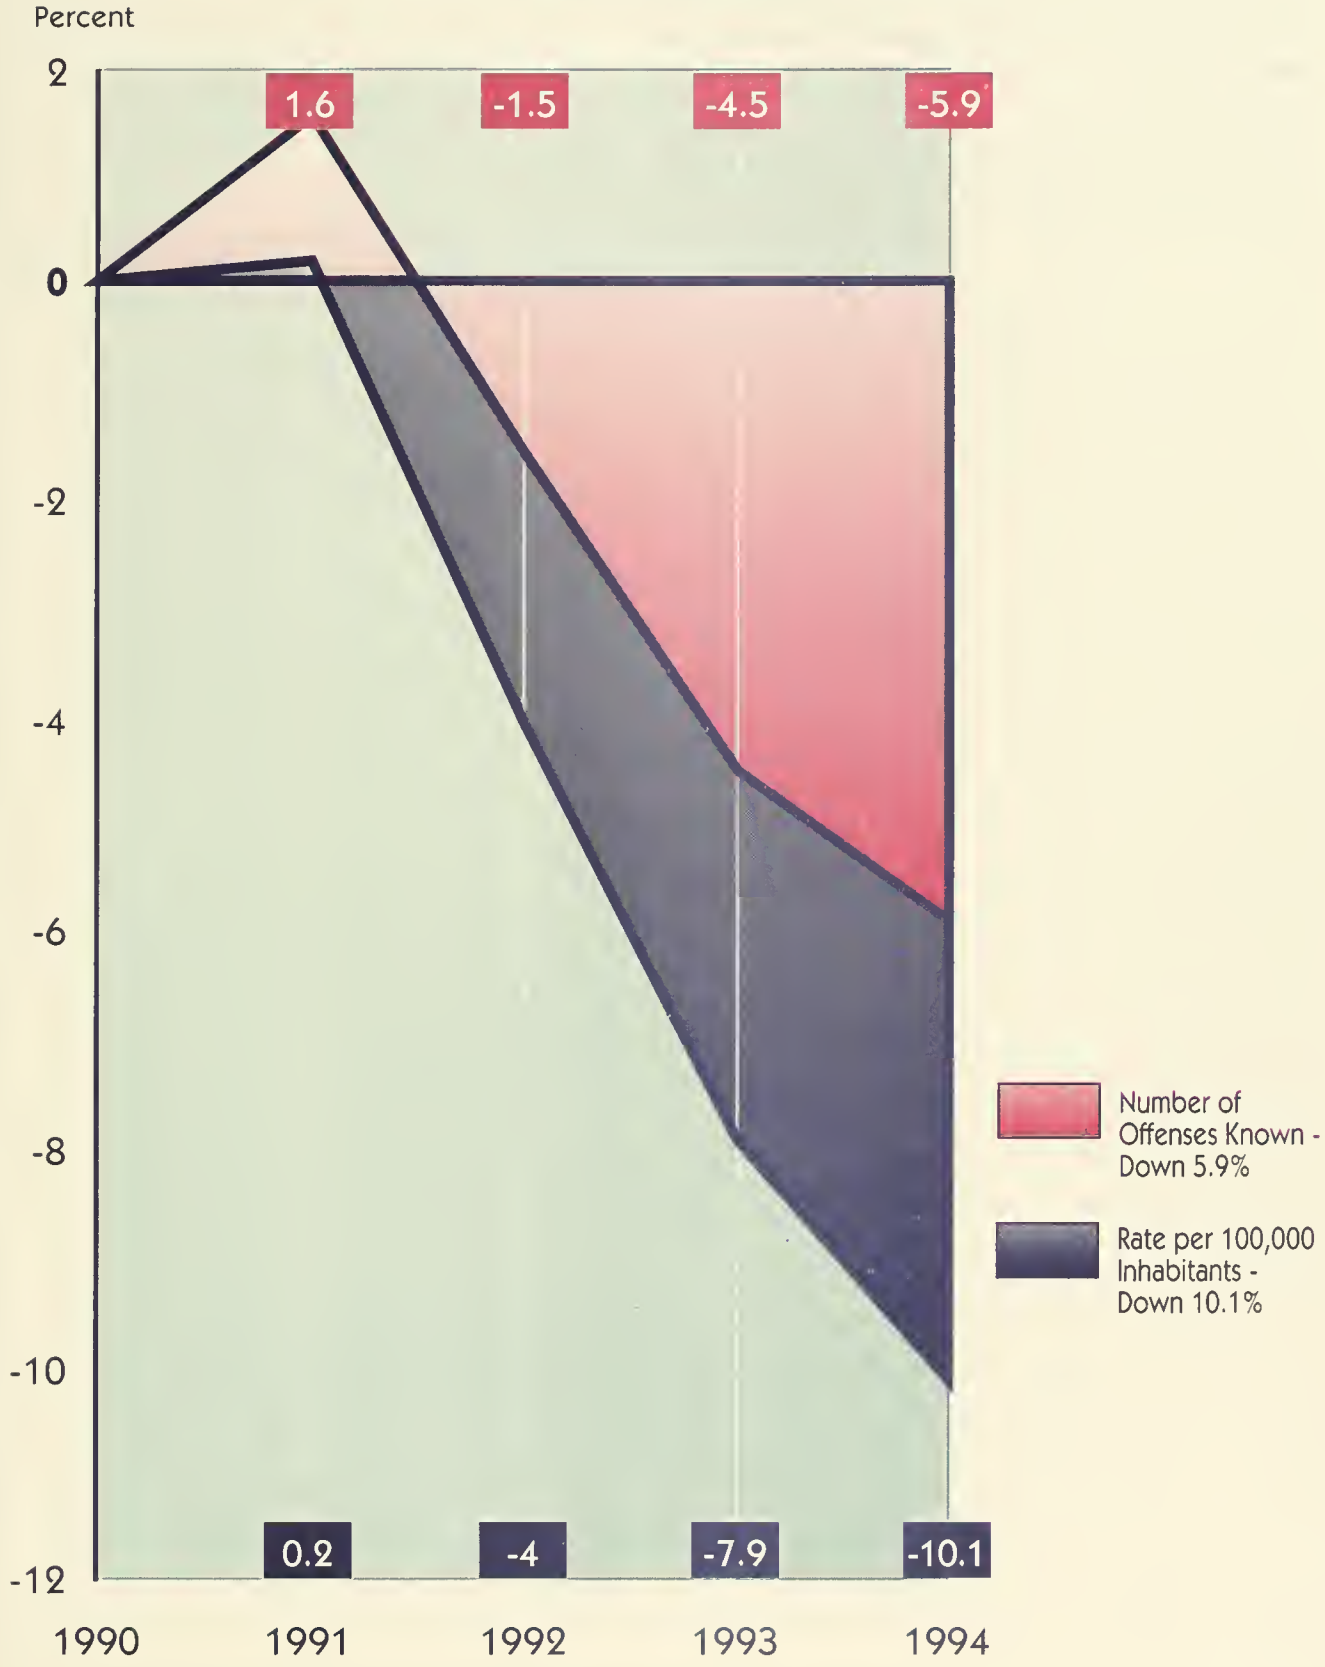
Table 2.30—Motor Vehicle Theft, 1994
[Percent distribution by region]

Region	Total	Autos	Trucks and buses	Other vehicles
Total	100.0	79.0	15.6	5.4
Northeastern States	100.0	92.3	4.5	3.2
Midwestern States	100.0	83.4	11.6	5.0
Southern States	100.0	75.0	18.1	6.9
Western States	100.0	72.3	22.2	5.5

MOTOR VEHICLE THEFT

CHART 2.17

PERCENT CHANGE FROM 1990



Law Enforcement Response

Law enforcement agencies nationwide recorded a 14-percent motor vehicle theft clearance rate for 1994. Those in cities cleared 13 percent; those in suburban counties cleared 17 percent; and rural county agencies cleared 32 percent.

Regional clearance percentages for motor vehicle theft were 18 percent in the Southern States, 16 percent in the Midwestern States, 12 percent in the Western States, and 10 percent in the Northeastern States.

Persons in the under-18 age group accounted for 25 percent of the motor vehicle thefts cleared both nationally and in cities. They comprised 23 percent of the clearances in the suburban counties and 22 percent of those in the rural counties.

During 1994, law enforcement agencies nationwide made an estimated 200,200 arrests for motor vehicle theft. Males accounted for 88 percent of those arrested. Fifty-seven percent of the arrestees were white, 40 percent were black, and the remainder were of other races.

A large proportion of motor vehicle theft arrestees was accounted for by the younger segment of the population. In 1994, 60 percent of all persons arrested for this offense were under 21 years of age, and those under 18 comprised 44 percent of the total. Between 1993 and 1994, overall arrests of persons under age 18 were down 2 percent. Arrests of juvenile males decreased 2 percent, while those of young females were up 2 percent.

Total motor vehicle theft arrests in 1994 were down 1 percent from the 1993 level and 10 percent lower than in 1990. Since 1985, however, the arrest total increased 48 percent.

ARSON

DEFINITION

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

A total of 102,139 arson offenses was reported by 12,311 law enforcement agencies across the country; these agencies furnished from 1 to 12 months of reports during 1994. Among these reporting agencies, 11,932 provided the detailed information—type of structure, estimated monetary value of the property damaged, etc.—from which the tables on the accompanying pages were tabulated. Further information regarding arson offenses and trends is presented in Tables 12 through 15 and arson clearances in Tables 25 through 28. Since only 9,409 agencies, covering 78 percent of the United States population, submitted reports for all 12 months of the year, the data user should be aware that, while conservative indicators, the figures do not represent the Nation's total arson experience.

The number of arson offenses reported nationally and overall in the Nation's cities increased 5 percent in 1994 as compared to the 1993 total. Changes in counts for the Nation's cities ranged from a 13-percent increase in cities with populations between 10,000 and 24,999 to a 2-percent decline in those with populations of 1,000,000 or more. The rural and suburban counties registered increases of 6 and 5 percent, respectively. (See Table 12.)

Geographically, arson increased 17 percent in the Northeast, 6 percent in the Midwest, and 5 percent in the South. The Western region experienced the only decline, 2 percent.

By property type nationally, increases were shown in the number of arsons of mobile property, 3 percent; structures, 4 percent; and all other property, 12 percent. (See Table 15.)

Caution is recommended when viewing arson trend information. The percent change figures may have been influenced by improved arson reporting procedures during the collection's relatively limited timespan. It is expected that year-to-year statistical comparability will improve as collection continues.

Table 2.31—Arson Rate, Population Group, 1994
[9,409 agencies; 1994 estimated population 203,461,000; rate per 100,000 inhabitants]

Group	Rate
Total	46.6
Total cities	55.3
Group I (cities 250,000 and over)	83.8
(cities 1,000,000 and over)	83.1
(cities 500,000 to 999,999)	79.7
(cities 250,000 to 499,999)	88.9
Group II (cities 100,000 to 249,999)	66.3
Group III (cities 50,000 to 99,999)	43.2
Group IV (cities 25,000 to 49,999)	36.5
Group V (cities 10,000 to 24,999)	28.3
Group VI (cities under 10,000)	31.4
Suburban counties	32.0
Rural counties	19.4
Suburban area	31.2

Rate

Since population coverage for arson data is lower than for the other Crime Index offenses, arson rates per 100,000 inhabitants are tabulated independently. Based only on figures from law enforcement agencies supplying 12 months of statistics for all Index crimes, including arson, the 1994 rates are shown in Table 2.31.

The rates ranged from 89 per 100,000 inhabitants in cities with populations 250,000 to 499,999 to 19 per 100,000 rural county inhabitants. The suburban counties and all cities collectively recorded rates of 32 and 55 per 100,000 inhabitants, respectively. Overall, the 1994 national arson rate was 47 per 100,000 population.

Regionally, the highest arson rate was registered in the Western States with 53 offenses per 100,000 population. Following were the Northeastern States with a rate of 51 per 100,000, the Midwestern States with 49 per 100,000, and the Southern States with 39 per 100,000.

Nature

As in previous years, structures were the most frequent targets of arsonists in 1994 and comprised 52 percent of the reported incidents. Twenty-five percent of the arsons were directed at mobile property (motor vehicles, trailers, etc.), while other types of property (crops, timber, etc.) accounted for the remainder.

Table 2.32—Arson, Type of Property, 1994
[11,932 agencies; 1994 estimated population 202,943,000]

Property classification	Number of offenses	Percent distribution[1]
Total	83,928	100.0
Total structure	43,870	52.3
Single occupancy residential	18,515	22.1
Other residential	7,597	9.1
Storage	3,813	4.5
Industrial/manufacturing	719	.9
Other commercial	4,576	5.5
Community/public	5,230	6.2
Other structure	3,420	4.1
Total mobile	21,261	25.3
Motor vehicles	19,816	23.6
Other mobile	1,445	1.7
Other	18,797	22.4

[1]Because of rounding, percentages may not add to totals.

Residential property was involved in 60 percent of the structural arsons during the year, with 42 percent of such offenses directed at single-family dwellings. Eighteen percent of all targeted structural property was either uninhabited or abandoned at the time the arson occurred.

Motor vehicles comprised 93 percent of all mobile property at which arsons were directed.

Table 2.33—Arson, Structures Not in Use, 1994
[11,932 agencies; 1994 estimated population 202,943,000]

Type of structure	Number of offenses	Percent not in use
Total	43,870	18.3
Single occupancy residential	18,515	21.8
Other residential	7,597	13.9
Storage	3,813	22.2
Industrial/manufacturing	719	27.1
Other commercial	4,576	12.7
Community/public	5,230	8.9
Other structure	3,420	24.3

The monetary value of property damaged due to reported arsons averaged $9,761 per incident in 1994. The overall average for all types of structures was $16,495. Mobile properties averaged $3,883 per incident, and other targets averaged $728.

The overall average value of other targets was down significantly in 1994 from 1992 and 1993. Damages in these previous years were influenced by arsons during the Los Angeles riots in 1992 and of forested areas of California in 1993.

Table 2.34—Arson, Monetary Value of Property Damaged, 1994
[11,932 agencies; 1994 estimated population 202,943,000]

Property classification	Number of offenses	Average damage
Total	83,928	$ 9,761
Total structure	43,870	16,495
Single occupancy residential	18,515	12,570
Other residential	7,597	15,563

Industrial/manufacturing	719	67,135
Other commercial	4,576	38,363
Community/public	5,230	11,651
Other structure	3,420	7,762
Total mobile	21,261	3,883
Motor vehicles	19,816	3,694
Other mobile	1,445	6,480
Other	18,797	728

Law Enforcement Response

The 1994 arson clearance rate was 15 percent nationally and 14 percent in cities. Agencies in cities with fewer than 10,000 inhabitants showed the highest rate, clearing 25 percent of the arson offenses brought to their attention. Rural county law enforcement agencies cleared 22 percent; and those in suburban counties, 19 percent. (See Table 25.)

Regionally, the Southern States recorded a clearance rate of 21 percent; the Western States, 15 percent; the Midwestern States, 14 percent; and the Northeastern States, 10 percent.

Forty-eight percent of all 1994 arson clearances involved only young people under age 18, a higher percentage of juvenile involvement than for any other Index crime. Persons in this age group accounted for 31 percent of structural arson clearances, 30 percent of the clearances for arsons of mobile property, and 63 percent of those of all other property.

By population grouping, juveniles were the offenders in 50 percent of the city, 46 percent of the suburban county, and 31 percent of the rural county arson clearances.

The accompanying tables show clearance data only for those 11,932 law enforcement agencies which were able to furnish breakdowns by type for the structural and mobile classifications. As can be seen, the highest clearance rate (33 percent) was recorded for arsons of community/public structures, while the lowest rate (8 percent) was registered for motor vehicles.

Table 2.35—Arson Offenses Cleared by Arrest[1], 1994
[11,932 agencies[2]; 1994 estimated population 202,943,000]

Property classification	Number of offenses	Percent cleared by arrest
Total	83,928	18.5
Total structure	43,870	23.0
Single occupancy residential	18,515	23.7
Other residential	7,597	24.5
Storage	3,813	17.0
Industrial/manufacturing	719	13.9
Other commercial	4,576	15.9
Community/public	5,230	32.9
Other structure	3,420	18.2
Total mobile	21,261	8.7
Motor vehicles	19,816	8.1
Other mobile	1,445	16.3
Other	18,797	19.1

[1]Includes offenses cleared by exceptional means.
[2]To be included in this table, it was necessary that arson clearances be reported by property classification.

An estimated 20,900 arrests for arson were made during 1994. Fifty-five percent of the arrestees were under 18 years of age and 70 percent were under 25. Males comprised 85 percent of all arson arrestees. Seventy-five percent of those arrested were white, 23 percent were black, and the remainder were of other races.

Table 2.36—Arson Offenses Cleared by Arrest[1] of Persons under 18 Years of Age, 1994
[11,932 agencies[2]; 1994 estimated population 202,943,000]

Property classification	Total clearances	Percent under 18
Total	20,510	48.0
Total structure	15,072	45.9
Single occupancy residential	9,387	36.2
Other residential	1,860	40.6
Storage	650	60.6
Industrial/manufacturing	100	44.0
Other commercial	728	38.7
Community/public	1,723	72.5
Other structure	624	50.3
Total mobile	1,844	30.0
Motor vehicles	1,609	28.0
Other mobile	235	43.8
Other	3,594	63.0

[1]Includes offenses cleared by exceptional means.
[2]To be included in this table, it was necessary that arson clearances be reported by property classification.

Trends for 1993 versus 1994 show arson arrests up 5 percent nationally and in cities. Suburban counties recorded the largest increase, 9 percent. An increase of 3 percent occurred in the rural counties.

Nationwide, arrests of juveniles for arson were up 18 percent, while adult arrests showed a 7-percent decrease from 1993 to 1994. During the same period, male arrests for arson increased 5 percent and female arrests rose 4 percent. The 1994 arson arrest total for all ages was 7 percent higher than in 1990 and 3 percent above the 1985 level.

Crime Index Tabulations

This Section's tabular portions present data on crime in the United States as a whole; geographic divisions; individual states; Metropolitan Statistical Areas; cities, towns, and counties; and college and university campuses. Also furnished in the following tables are national averages for the value of property stolen in connection with Crime Index offenses; further breakdowns by type for the robbery, burglary, larceny-theft, and arson classifications; information on the types of weapons used; and data on the type and value of property stolen and recovered.

Although the total number of crimes occurring throughout the Nation is unknown, information on those reported to law enforcement gives a reliable indication of criminal activity. In reviewing the tables in this report, it must be remembered, however, that many factors can cause the volume and type of crime to vary from place to place. Even though population, one of these factors, is used in computing crime rates, all communities are affected to some degree by seasonal or transient populations. Since counts of current, permanent population are used in their construction, crime rates do not account for short-term population variables, such as an influx of day workers, tourists, shoppers, etc. A further discussion of various factors contributing to the amount of crime in a given area is shown on page *iv* of this publication.

National data can serve as a guide for the law enforcement administrator in analyzing the local crime count, as well as the performance of the jurisdiction's law enforcement agency. The analysis, however, should not end with a comparison based on data presented in this publication. It is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

National estimates of volume and rate per 100,000 inhabitants for all Crime Index offenses covering the past two decades are set forth in Table 1, "Index of Crime, United States, 1975-1994."

Table 2, "Index of Crime, United States, 1994," shows current year estimates for MSAs, rural counties, and cities and towns outside metropolitan areas. See Appendix III for the definitions of these community types.

Provided in Table 3, "Index of Crime, Regional Offense and Population Distribution, 1994," are data showing the geographical distribution of estimated Index crimes and population. When utilizing figures presented on a regional basis in this publication, the reader is cautioned to consider each region's proportion of the total United States population. For example, although the Southern States accounted for the largest volume of Crime Index offenses in 1994, they also represented the greatest regional population.

Note

The collection of statistics on arson as a Crime Index offense began in 1979. However, 1994 annual figures are not available for inclusion in tables presenting statistics for the total United States. Arson totals reported by individual law enforcement agencies are displayed in Tables 8 through 11. Two-year arson trends are shown in Tables 12 through 15.

[1]Populations are Bureau of the Census provisional estimates as of July 1, except 1980 and 1990 which are the decennial census counts.

[2]Because of rounding, the offenses may not add to totals.

[3]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[4]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5]The forcible rape, robbery, aggravated assault, and motor vehicle theft categories have been adjusted for 1993. See "Crime Trends," page 378 for details.

Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

All rates were calculated on the offenses before rounding.

[1]Populations are Bureau of the Census provisional estimates as of July 1, 1994, and are subject to change.

[2]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]The percentage representing area actually reporting will not coincide with the ratio between reported and estimated crime totals, since these data represent the sum of the calculations for individual states which have varying populations, portions reporting, and crime rates.

Complete data were not available for 1994 for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

Table 3.—Index of Crime, Regional Offense and Population Distribution, 1994

[1]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[3]Because of rounding, percentages may not add to totals.

Complete data were not available for 1994 for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

Table 4.—Index of Crime: Region, Geographic Division, and State, 1993-1994

[1]Populations are Bureau of the Census provisional estimates as of July 1 and are subject to change and may not add to totals due to rounding.

[2]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

[5]The forcible rape, robbery, aggravated assault, and motor vehicle theft categories have been adjusted for 1993. See "Crime Trends," page 378 for details.

[6]Includes offenses reported by the Zoological Police.

[7]The 1994 Bureau of the Census population estimate for Puerto Rico was not available prior to publication; therefore, no population or rates per 100,000 inhabitants are provided. Data for Puerto Rico are not included in totals.

Offense totals are based on all reporting agencies and estimates for unreported areas.

[1]Although arson data were included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Includes offenses reported by the Zoological Police.

[5]Complete data were not available for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

[6]The 1994 Bureau of the Census population estimate for Puerto Rico was not available prior to publication; therefore, no population or rates per 100,000 inhabitants are provided

[1]Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense. Arson data for individual cities are shown in Table 8.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]The 1994 Bureau of the Census population estimates for the individual Puerto Rico M.S.A.'s were not available prior to publication; therefore, no population or rates per 100,000 inhabitants are provided.

Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

Because of rounding, offenses may not add to totals.

Table 8.—Number of Offenses Known to the Police, Cities and Towns 10,000 and over in Population, 1994

*Arson is shown only if 12 months of arson data were received. Leaders (..) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

City by State	Population	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggra-vated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1]Due to reporting changes or annexations, figures are not comparable to previous years.

[2]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

[3]Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana. See "Offense Estimation," pages 377-378 for details.

[4]Indianapolis/Marion County, Indiana, is a unified city-county government with a total population of 771,796.

[5]The Charlotte, N.C., Police Department and Mecklenburg County, N.C., Police Department merged into one department in 1994.

Table 9.—Number of Offenses Known to the Police, Universities and Colleges, 1994

*Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data.

University/College	Student enrollment[1]	Violent[2] crime total	Violent crime				Property[3] crime total	Property crime			
			Murder and nonnegligent manslaughter	Forcible rape	Robbery	Aggravated assault		Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1]The student enrollment figures provided by the United States Department of Education are for 1992, the most recent year available. The enrollment figure includes full-time and part-time students. See Appendix 1 for details.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Student enrollment figures were not available.

[5]Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. "See Offense Estimation," pages 377-378 for details.

NOTE: Caution should be exercised in making any inter-campus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include: demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

Table 10.—Number of Offenses Known to the Police, Suburban Counties, 1994

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]

* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

County by State	Crime Index total	Modified* Crime Index total	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggra-vated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson*

[1]Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois Department of State Police were not in accordance with national UCR guidelines. Therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

[2]Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana. See "Offense Estimation," pages 377-378 for details.

[3]Indianapolis/Marion County, Indiana, is a unified city-county government with a total population of 771,796.

[4]Due to reporting changes, figures are not comparable to previous years.

Table 11.—Number of Offenses Known to the Police, Rural Counties 25,000 and over in Population, 1994

[The data shown in this table do not reflect county totals but are the number of offenses reported by the sheriff's office, county police department, or state police.]

* Arson is shown only if 12 months of arson data were received. Leaders (...) indicate zero data. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[1]The number of agency reports used in arson trends is less than used in compiling trends for other Crime Index offenses. It is not necessary to report arson by property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Includes state police agencies with no county breakdowns.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

[6]Less than one-tenth of 1 percent.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

[1]The number of agency reports used in arson trends is less than used in compiling trends for the other Crime Index offenses.

[2]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape categories.

Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

Table 16.—Crime Rates, Offenses Known to the Police, Population Group, 1994

[1994 estimated population. Rate: Number of crimes per 100,000 inhabitants]

Population group	Crime Index total	Modified Crime Index total[1]	Violent crime[2]	Property crime[3]	Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson[4]

SUBURBAN AREA[5]												
5,614 agencies; population 91,812,000:												
Number of offenses known	3,898,132		406,517	3,491,615	4,402	28,129	97,258	276,728	779,090	2,347,051	365,474	
Rate	4,245.8		442.8	3,803.0	4.8	30.6	105.9	301.4	848.6	2,556.4	398.1	

[1]Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 54 of this publication.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Includes state police agencies with no county breakdown.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by Illinois State Police were not in accordance with national UCR guidelines. See Appendix 1 for details.

Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

Table 17.-Crime Rates, Offenses Known to the Police, Suburban and Nonsuburban Cities[1], Population Group, 1994

[1994 estimated population. Rate. Number of crimes per 100,000 inhabitants]

Nonsuburban Cities												
TOTAL NONSUBURBAN CITIES: 2,918 cities; population 20,478,000:												
Number of offenses known	**1,193,435**		**123,482**	**1,069,953**	**1,184**	**8,546**	**22,324**	**91,428**	**218,208**	**794,238**	**57,507**	
Rate	**5,827.8**		**603.0**	**5,224.9**	**5.8**	**41.7**	**109.0**	**446.5**	**1,065.6**	**3,878.5**	**280.8**	
GROUP IV												
190 cities, 25,000 to 49,999, population 6,765,000:												
Number of offenses known	474,411		51,950	422,461	466	3,622	12,096	35,766	88,090	307,753	26,618	
Rate	7,012.3		767.9	6,244.4	6.9	53.5	178.8	528.7	1,302.1	4,548.9	393.4	
GROUP V												
382 cities, 10,000 to 24,999, population 6,015,000:												
Number of offenses known	369,650		36,844	332,806	368	2,691	6,455	27,330	66,244	249,751	16,811	
Rate	6,145.0		612.5	5,532.5	6.1	44.7	107.3	454.3	1,101.2	4,151.8	279.5	
GROUP VI												
2,346 cities under 10,000; population 7,697,000:												
Number of offenses known	349,374		34,688	314,686	350	2,233	3,773	28,332	63,874	236,734	14,078	
Rate	4,539.0		450.7	4,088.3	4.5	29.0	49.0	368.1	829.8	3,075.6	182.9	

[1]Suburban places are within Metropolitan Statistical Areas (MSAs) and include suburban city and county law enforcement agencies within the metropolitan area. Central cities are excluded. Nonsuburban places are outside MSAs.

[2]Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 54 of this publication.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines. See Appendix I for details.

Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

Table 18.—Crime Rates, Offenses Known to the Police, Suburban and Nonsuburban Counties, Population Group, 1994

[1994 estimated population. Rate: Number of crimes per 100,000 inhabitants]

Population group	Crime Index total	Modified[1] Crime Index total	Violent crime[2]	Property crime[3]	Murder and nonnegligent manslaughter	Forcible rape	Robbery	Aggravated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson[1]
Suburban Counties[4]												
100,000 and over												
123 counties;												
population 30,499,000:												
Number of offenses known	1,417,097		172,334	1,244,763	1,990	10,965	45,210	114,169	302,091	790,089	152,583	
Rate	4,646.4		565.0	4,081.3	6.5	36.0	148.2	374.3	990.5	2,590.5	500.3	
25,000 to 99,999												
330 counties;												
population 16,568,000:												
Number of offenses known	416,263		43,545	372,718	758	4,518	4,892	33,377	114,731	232,646	25,341	
Rate	2,512.5		262.8	2,249.6	4.6	27.3	29.5	201.5	692.5	1,404.2	152.9	
Under 25,000												
773 counties;												
population 2,635,000:												
Number of offenses known	123,855		14,402	109,453	218	1,519	1,534	11,131	26,331	59,886	23,236	
Rate	4,700.7		546.6	4,154.1	8.3	57.7	58.2	422.5	999.4	2,272.9	881.9	
Nonsuburban Counties[4]												
25,000 and over												
248 counties;												
population 9,748,000:												
Number of offenses known	209,614		23,020	186,594	407	2,262	2,165	18,186	64,335	110,631	11,628	
Rate	2,150.4		236.2	1,914.2	4.2	23.2	22.2	186.6	660.0	1,134.9	119.3	
10,000 to 24,999												
618 counties;												
population 9,673,000:												
Number of offenses known	170,963		20,036	150,927	461	1,986	1,318	16,271	56,258	85,436	9,233	
Rate	1,767.4		207.1	1,560.3	4.8	20.5	13.6	168.2	581.6	883.3	95.5	
Under 10,000												
1,289 counties;												
population 3,882,000:												
Number of offenses known	107,725		14,202	93,523	318	2,086	668	11,130	31,783	53,984	7,756	
Rate	2,775.3		365.9	2,409.4	8.2	53.7	17.2	286.7	818.8	1,390.8	199.8	

[1]Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 54 of this publication.

[2]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[3]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[4]Offenses include sheriffs' and county law enforcement agencies. State police offenses are not included.

Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines. See Appendix I for details.

Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana, therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

Table 19.—Crime Rates, Offenses Known Breakdown, Population Group, 1994

[1994 estimated population. Rate: number of crimes per 100,000 inhabitants]

Population group	Forcible rape		Robbery				Aggravated assault				Burglary			Motor vehicle theft			Arson[1]		
	Rape by force	Assault to rape-attempts	Firearm	Knife or cutting instrument	Other weapon	Strong-armed	Firearm	Knife or cutting instrument	Other weapon	Hands, fists, feet, etc.	Forcible entry	Unlawful entry	Attempted forcible entry	Autos	Trucks and buses	Other vehicles	Structure	Mobile	Other
TOTAL ALL AGENCIES: 11,035 agencies; population 222,019,000:																			
Number of offenses known	**80,124**	**11,595**	**245,776**	**56,004**	**57,075**	**232,575**	**245,886**	**182,188**	**327,337**	**267,840**	**1,632,415**	**606,482**	**190,546**	**1,140,465**	**224,505**	**78,242**

See footnotes at end of table.

Table 19.-Crime Rates, Offenses Known Breakdown, Population Group, 1994—Continued

Population group	Forcible rape		Robbery				Aggravated assault				Burglary			Motor vehicle theft			Arson[1]		
	Rape by force	Assault to rape-attempts	Firearm	Knife or cutting instrument	Other weapon	Strong-armed	Firearm	Knife or cutting instrument	Other weapon	Hands, fists, feet, etc.	Forcible entry	Unlawful entry	Attempted forcible entry	Autos	Trucks and buses	Other vehicles	Structure	Mobile	Other
GROUP IV																			
610 cities, 25,000 to 49,999; population 21,042,000:																			
Number of offenses known	6,636	865	10,886	2,785	3,593	14,784	12,874	12,527	24,065	27,248	131,869	57,494	18,722	78,410	14,199	7,556			
Rate	31.5	4.1	51.7	13.2	17.1	70.3	61.2	59.5	114.4	129.5	626.7	273.2	89.0	372.6	67.5	35.9			
GROUP V																			
1,379 cities, 10,000 to 24,999; population 21,803,000:																			
Number of offenses known	5,893	868	6,978	1,893	2,643	9,570	11,146	11,425	18,819	26,658	114,637	50,814	16,540	56,635	10,094	5,812			
Rate	27.0	4.0	32.0	8.7	12.1	43.9	51.1	52.4	86.3	122.3	525.8	233.1	75.9	259.8	46.3	26.7			
GROUP VI																			
5,088 cities under 10,000; population 17,984,000:																			
Number of offenses known	4,057	686	4,016	1,229	1,138	6,083	7,214	8,426	13,007	27,278	86,140	46,756	12,988	32,590	6,921	4,762			
Rate	22.6	3.8	22.3	6.8	6.3	33.8	40.1	46.9	72.3	151.7	479.0	260.0	72.2	181.2	38.5	26.5			
SUBURBAN COUNTIES																			
1,201 agencies; population 48,587,000:																			
Number of offenses known	15,017	1,809	22,363	3,595	6,566	18,747	33,291	23,075	54,551	45,768	292,233	114,523	29,621	143,366	38,904	17,447			
Rate	30.9	3.7	46.0	7.4	13.5	38.6	68.5	47.5	112.3	94.2	601.5	235.7	61.0	295.1	80.1	35.9			
RURAL COUNTIES																			
2,220 agencies; population 22,791,000:																			
Number of offenses known	5,999	612	1,716	407	502	1,675	9,370	6,265	11,880	19,512	108,111	40,152	8,966	17,514	6,041	6,410			
Rate	26.3	2.7	7.5	1.8	2.2	7.3	41.1	27.5	52.1	85.6	474.3	176.2	39.3	76.8	26.5	28.1			
SUBURBAN AREA[2]																			
5,465 agencies; population 89,751,000:																			
Number of offenses known	24,623	3,190	37,682	7,341	11,866	38,599	49,675	39,920	87,241	94,262	490,945	213,054	60,028	270,783	60,940	29,445			
Rate	27.4	3.6	42.0	8.2	13.2	43.0	55.3	44.5	97.2	105.0	547.0	237.4	66.9	301.7	67.9	32.8			

[1]Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear on page 54 of this publication.
[2]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.
Population figures were rounded to the nearest thousand. All rates were calculated on the population before rounding.
Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines. See Appendix I for details.
Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

Table 20.—Murder, State, Type of Weapon, 1994

State	Total murders[1]	Total firearms	Handguns	Rifles	Shotguns	Firearms (type unknown)	Knives or cutting instruments	Other weapons	Hands, fists, feet, etc.

SECTION III

Crime Index Offenses Cleared

For UCR purposes, law enforcement agencies clear or solve an offense when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. Clearances recorded in 1994 may be for offenses which occurred in prior years. Several crimes may be cleared by the arrest of one person, while the arrest of many persons may clear only one offense. Law enforcement agencies may clear a crime by exceptional means when some element beyond law enforcement control precludes the placing of formal charges against the offender. Examples of circumstances allowing such clearances are the death of the offender (suicide, justifiably killed by police or private citizen, etc.); the victim's refusal to cooperate with prosecution after the offender has been identified; or the denial of extradition because the offender committed another crime and is being prosecuted in a different jurisdiction. In all exceptional clearance cases, law enforcement must have identified the offender, have enough evidence to support arrest, and know the offender's location.

Law enforcement agencies nationwide recorded a 21-percent Crime Index clearance rate for 1994. Collectively, 45 percent of violent crimes were cleared. Among the violent offenses, the rates were 64 percent for murder, 52 percent for forcible rape, 24 percent for robbery, and 56 percent for aggravated assault. Clearances for crimes against persons (murder, forcible rape, and aggravated assault) are generally higher as these offenses are often given more intensive investigative efforts and the victims and/or witnesses can frequently identify the perpetrators.

The overall property crime clearance rate was 18 percent. Thirteen percent of the burglaries, 20 percent of the larceny-thefts, 14 percent of motor vehicle thefts, and 15 percent of arsons were cleared during the year.

When considering the Modified Crime Index total which includes arson, the overall clearance rate remained the same, 21 percent.

Geographically, the highest total Crime Index clearance rate was registered in the Southern States, with 22 percent. In the remaining three regions, 21-percent clearance rates were recorded. For violent crime, the highest clearance rate, 48 percent, was also recorded in the South. In the West, the rate was 46 percent; in the Northeast, 43 percent; and in the Midwest, 39 percent. Property crime clearance rates were 18 percent in the South and Midwest and 17 percent in the Northeast and West.

By community type, city law enforcement agencies and those in suburban counties showed clearances for 21 percent of the Crime Index offenses brought to their attention. Rural county agencies cleared 24 percent. Among the city population groups, those with 10,000 to 24,999 inhabitants registered the highest total Crime Index clearance rate, 26 percent. The highest violent crime clearance rate was recorded in the rural counties with 61 percent. Like the Crime Index clearance rate, the property crime clearance rate was highest for cities with populations from 10,000 to 24,999, 24 percent. (See Table 25.)

Clearances Involving Only Persons under 18 Years of Age

Involvement of juveniles in crime can be measured by the number of crimes in which they have been identified as the offenders. Even though no physical arrest may have been made, a clearance by arrest is recorded when an offender under 18 years of age is cited to appear in juvenile court or before other juvenile authorities. Since the juvenile clearance percentages shown in this publication indicate only those offenses where no adults were involved, they should be considered a slight underestimation of juvenile involvement in crime. Juveniles (persons under 18 years of age) account for 26 percent of the United States population, according to 1994 Bureau of the Census estimates.

Twenty-two percent of the Crime Index offenses cleared by law enforcement during 1994 involved only young people under age 18. Persons in this age group accounted for 14 percent of the violent crime clearances and 25 percent of those for property crimes. Murder showed the lowest percentage of juvenile involvement (11 percent), while the highest percentage was shown for arson (48 percent).

Geographically, the Midwestern States recorded the largest percentage of Crime Index offense involvement by the under 18 age group—24 percent. Juveniles alone were the offenders in 22 percent of the clearances in the Western States, 21 percent of those in the Southern States, and 20 percent of those in the Northeastern States.

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

Table 26.—Offenses Known and Percent Cleared by Arrest[1], Geographic Region and Division, 1994

[1994 estimated population]

Geographic region/ division	Crime Index total	Modified Crime Index total[2]	Violent crime[3]	Property crime[4]	Murder and non-negligent man-slaughter	Forcible rape	Robbery	Aggra-vated assault	Burglary	Larceny-theft	Motor vehicle theft	Arson[2]

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than used in compiling clearance rates for other Crime Index offenses.

[3]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

[1]Includes offenses cleared by exceptional means.

[2]The number of agency reports used in arson clearance rates is less than those used in compiling clearance rates for other Crime Index offenses. It is not necessary to report clearances by detailed property classification to be included in this table. The Modified Crime Index total is the sum of the Crime Index offenses, including arson.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Data are not included for the property crime of arson.

[5]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities are also included in other groups.

Forcible rape figures furnished by the state-level Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines and were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Complete data for 1994 were not available for the states of Illinois, Kansas, and Montana; therefore, it was necessary that their crime counts be estimated. See "Offense Estimation," pages 377-378 for details.

SECTION IV

Persons Arrested

Primarily a gauge of law enforcement's response to crime, arrest counts also provide definitive data concerning the age, sex, and race of perpetrators. Arrest practices, policies, and enforcement emphases vary from place to place and even within a community from time to time as, for example, during a local police campaign against residential burglary. While the practices for certain unlawful conduct such as drunkenness, disorderly conduct, vagrancy, and related violations may differ among agencies, those for robbery, burglary, and other serious crime arrests are more likely to be uniform and consistent throughout all jurisdictions. The Program's procedures require that an arrest be counted on each separate occasion a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals arrested since one person may be arrested several times during the year for the same or different offenses.

Nationwide, law enforcement agencies made an estimated 14.6 million arrests in 1994 for all criminal infractions except traffic violations. The highest arrest counts among the specific crime categories were for larceny-theft, 1.5 million, and drug abuse violations and driving under the influence, each 1.4 million. Simple assault arrests numbered 1.2 million. (See Table 29.)

When the overall arrest volume was related to the total United States population, the rate was 5,715 arrests per 100,000 inhabitants. Among the city population groupings, those with more than 250,000 inhabitants recorded the highest arrest rate, 7,824, while those with populations from 25,000 to 49,999 recorded the lowest rate, 5,341. (See Table 31.) For suburban county agencies overall, the arrest rate was 4,278, and for rural county law enforcement, it was 3,795 per 100,000 inhabitants. Regionally, the arrest rates per 100,000 population ranged from 5,435 in the Northeast to 5,918 in the South. (See Table 30.)

Due to NIBRS conversion efforts, no arrest data for Kansas, Montana, and most Illinois law enforcement agencies were available for 1994. Therefore, tables showing the age, sex, or race of persons arrested contain limited or no data for these states. Arrest totals were, however, estimated for inclusion in Table 29, "Total Estimated Arrests, United States, 1994."

Arrest Trends

The number of arrests for all offenses except traffic violations increased 6 percent in 1994 as compared to the 1993 volume. An increase of 1 percent was reported for violent and property crime arrests.

During the same time period, adult arrests for all offenses increased 5 percent, and those of juveniles were up 11 percent. Violent crime arrests showed virtually no change for adults and increased 7 percent for juveniles. For the 2-year period, property crime arrests declined 2 percent for adults but were up 5 percent for juveniles. (See Table 36.)

Two-year arrest trends showed a 6-percent increase in overall arrests for cities and 4-percent increases in arrests for suburban and rural counties. (See Tables 44, 50, and 56.)

For the 5-year period, 1990 versus 1994, total arrests were up 1 percent and juvenile arrests rose 21 percent. Adult arrests declined 2 percent for the same timeframe. (See Table 34.) Total Crime Index arrests declined 3 percent, and those of adults, 8 percent; but those of juveniles rose 9 percent. During the same years, 1990-1994, total violent crime arrests increased 4 percent, but property crime arrests fell 6 percent.

For the decade, 1985-1994, increases in arrest volumes were recorded for all offenses, 20 percent; Crime Index arrests, 17 percent; violent crime arrests, 52 percent; and property crime arrests, 8 percent.

The 1994 drug abuse violation arrest total was up 18 percent above the 1993 level, 20 percent higher than in 1990, and 61 percent higher than in 1985. The following table shows the types of drugs involved in violations resulting in arrests during 1994 by geographic region.

Table 4.1—Arrests for Drug Abuse Violations, 1994
[Percent distribution]

	United States total	Northeastern States	Midwestern States	Southern States	Western States
Total[1]	100.0	100.0	100.0	100.0	100.0
Sale/manufacture:	26.7	37.4	27.8	23 6	21.5
Heroin or cocaine and their derivatives	16.8	30.0	9.3	15.5	10.8

Other dangerous nonnarcotic drugs	12.0	2.1	12.7	4 7	25.9

[1]Because of rounding, percentages may not add to totals.

Age

Seven percent of all persons arrested nationally in 1994 were under the age of 15; 19 percent were under 18; 31 percent were under 21; and 45 percent were under 25. Persons in the under-25 age group accounted for 46 percent of arrests in the cities and 41 percent of those in the suburban and rural counties.

Age distribution figures for persons arrested for Crime Index offenses showed 31 percent were under the age of 18; 44 percent, under 21; and 56 percent, under 25. The under-25 age group was also responsible for 47 percent of the violent crime arrests and 59 percent of property crime arrests in 1994.

Larceny-theft was the offense resulting in the most arrests of persons under age 18, while adults were most often arrested for driving under the influence. (See Table 38.)

Sex

Eighty percent of the persons arrested in the Nation during 1994 were males. (See Table 42.) They accounted for 77 percent of Index crime arrests, 86 percent of those for violent crimes, and 73 percent of the property crime arrests. Men were most often arrested for drug abuse violations and driving under the influence, which jointly accounted for 20 percent of all male arrests.

As in past years, larceny-theft was the crime for which females were most often arrested. This single offense accounted for 74 percent of arrests of women for Index crimes and 17 percent of all female arrests. Fifty-five percent of all female larceny-theft arrestees were under 25 years of age.

Two-year trends showed a 5-percent increase in the number of male arrests from 1993 to 1994, and a 7-percent rise in female arrests for the same period. (See Table 37.) Arrests of males declined 1 percent, while those of females were up 9 percent for the 5-year period from 1990 to 1994.

Race

Race distribution figures for the total number of arrests in the United States during 1994 showed 67 percent of the arrestees were white, 31 percent were black, and the remainder were of other races. (See Table 43.) Whites accounted for 61 percent of the Index crime arrests, 53 percent of the arrests for violent crimes, and 64 percent of those for property crimes.

Table 29.—Total Estimated Arrests[1], United States, 1994

Total[2]	**14,648,700**
Murder and nonnegligent manslaughter	22,100

Drunkenness	713,200
Disorderly conduct	746,200
Vagrancy	25,300
All other offenses	3,743,200
Suspicion (not included in totals)	14,000
Curfew and loitering law violations	128,400
Runaways	248,800

[1]Arrest totals are based on all reporting agencies and estimates for unreported areas.
[2]Because of rounding, figures may not add to totals.
[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.
[4]Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.
[5]Includes arson.

Table 30.—Arrests, Number and Rate, Regions, 1994

[Rate: Number of arrests per 100,000 inhabitants]

Offense charged	United States Total (10,654 agencies; population 207,624,000)	Northeast (2,301 agencies; population 42,933,000)	Midwest (2,086 agencies; population 36,652,000)	South (4,647 agencies; population 76,322,000)	West (1,620 agencies; population 51,716,000)

[1]Includes only suburban county law enforcement agencies.

[2]Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

[3]Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

[4]Property crimes are offenses of burglary, larceny-theft, motor vehicle theft, and arson.

[5]Includes arson. Population figures were rounded to the nearest thousand. All rates were calculated before rounding.

SECTION V

Prostitution Arrest Trends

The vast majority of criminal justice research pertaining to the crime of prostitution has been centered on behavioral issues. In other words, there are volumes of studies that attempt to address why individuals engage in this illegal activity. The focus of this analysis, however, is more quantitative. Specifically, the study examines the movement in the Nation's prostitution arrest trends since 1970. The study does not attempt to associate empirically any social developments with the arrest trends observed.

Within the Uniform Crime Reporting (UCR) Program, the "prostitution and commercialized vice" offense category is defined as sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. It should be noted that in UCR only arrest data are reported for this offense.

Trend

The fastest growing individual arrest category in America from 1970 to 1983 was prostitution, which increased 143 percent. At an estimated 125,600, the number of prostitution arrests peaked in 1983. It then declined consistently and was down 22 percent by 1993. Consequently, this crime is now one of the fastest declining arrest categories. The Nation's prostitution arrest trend is delineated in Chart 5.1. There are no existing data to determine the causal factors associated with the radical change. Some factors to be considered are the degree of law enforcement emphasis, changes in sexual attitudes, and a change in the modus operandi used by prostitutes.

Sex

When considering the gender of prostitution arrestees, the decline in the number of female arrests have far outpaced the decline in the number of male arrests. Arrests of females and males dropped 29 percent and 7 percent, respectively from 1983 - 1993. Chart 5.2 depicts the arrest trend for each gender group during the 24-year period, 1970 to 1993. While, graphically, both trends have undulated in similar ways, prostitution arrestees are becoming increasingly male as shown in Table 5.11. It should be noted that arrests for prostitution-related offenses such as "procurement" are included in the counts.

Table 5.11

Percent Distribution of Prostitution Arrests by Sex, United States, 1970 - 1993

Year	Total	Male	Female
1970	100.0	20.7	79.3
1975	100.0	25.7	74.3
1980	100.0	31.2	68.8
1985	100.0	30.0	70.0
1990	100.0	36.0	64.0
1993	100.0	35.7	64.3

Race

The Nation's racial composition of prostitution arrestees has made a complete reversal since 1970. An examination of Table 5.12 reveals that in 1970, blacks constituted the majority of prostitution arrestees, accounting for 64 percent; but in 1993, whites represented the predominant racial group by increasing to 62 percent. Chart 5.3 graphically illustrates the movement in prostitution arrests by race. It is evident that with the advent of the 1980s, the shift between white and black arrestees accelerated. In fact, between the peak year 1983 and 1993, the estimated number of black prostitution arrestees declined 40 percent, whereas arrests for whites decreased only 8 percent. The decline for blacks contributed greatly to the overall 22-percent decrease in prostitution arrests nationwide during the 1983 - 1993 timeframe.

Table 5.12

Percent Distribution of Prostitution Arrests by Race, United States, 1970 - 1993

Year	Total	White	Black	Other
1970	100.0	34.6	64.4	1.0
1975	100.0	42.9	55.5	1.6
1980	100.0	45.4	53.2	1.4
1985	100.0	55.5	43.0	1.5
1990	100.0	59.8	38.9	1.3
1993	100.0	62.0	35.9	2.1

PROSTITUTION ARRESTS

CHART 5.1

ESTIMATED NUMBER OF PROSTITUTION ARRESTS IN THE UNITED STATES **1970–1993**

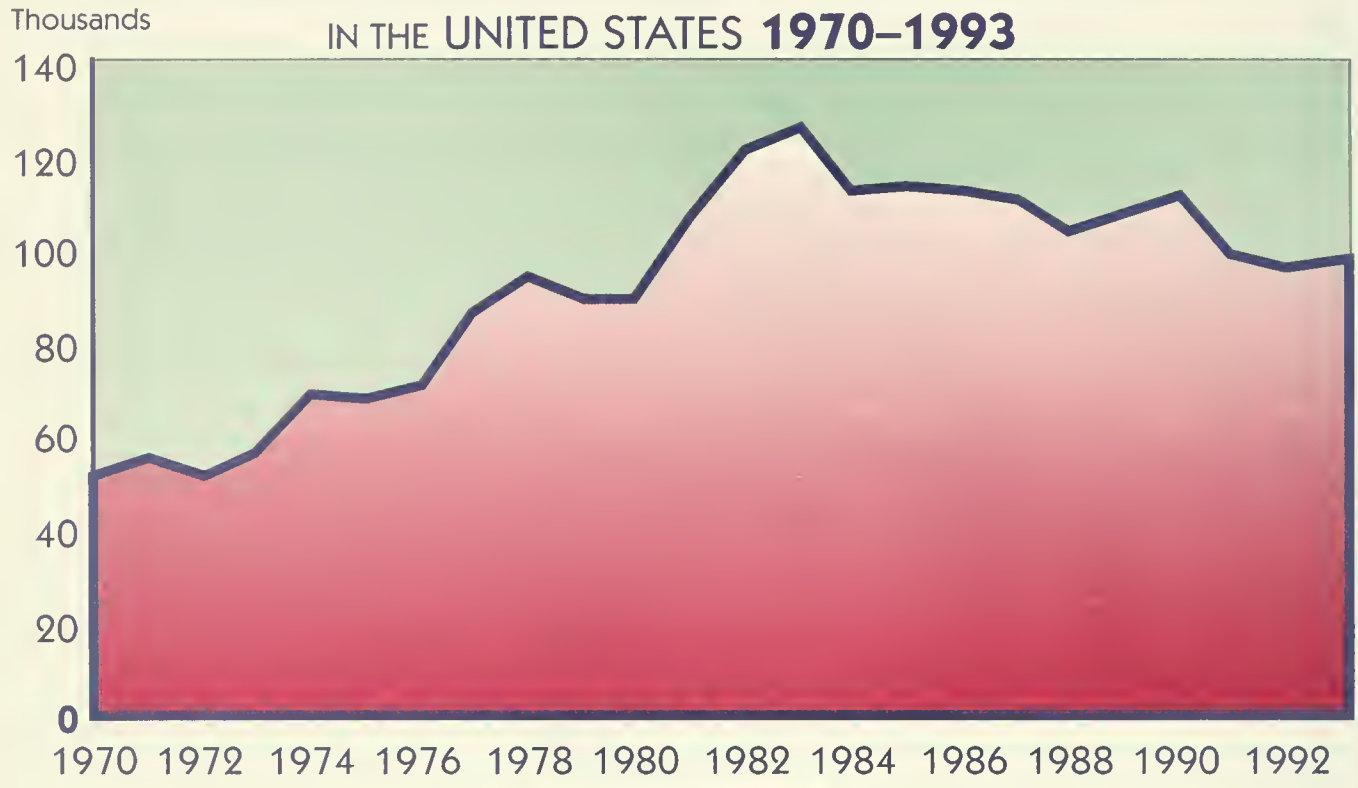

CHART 5.2

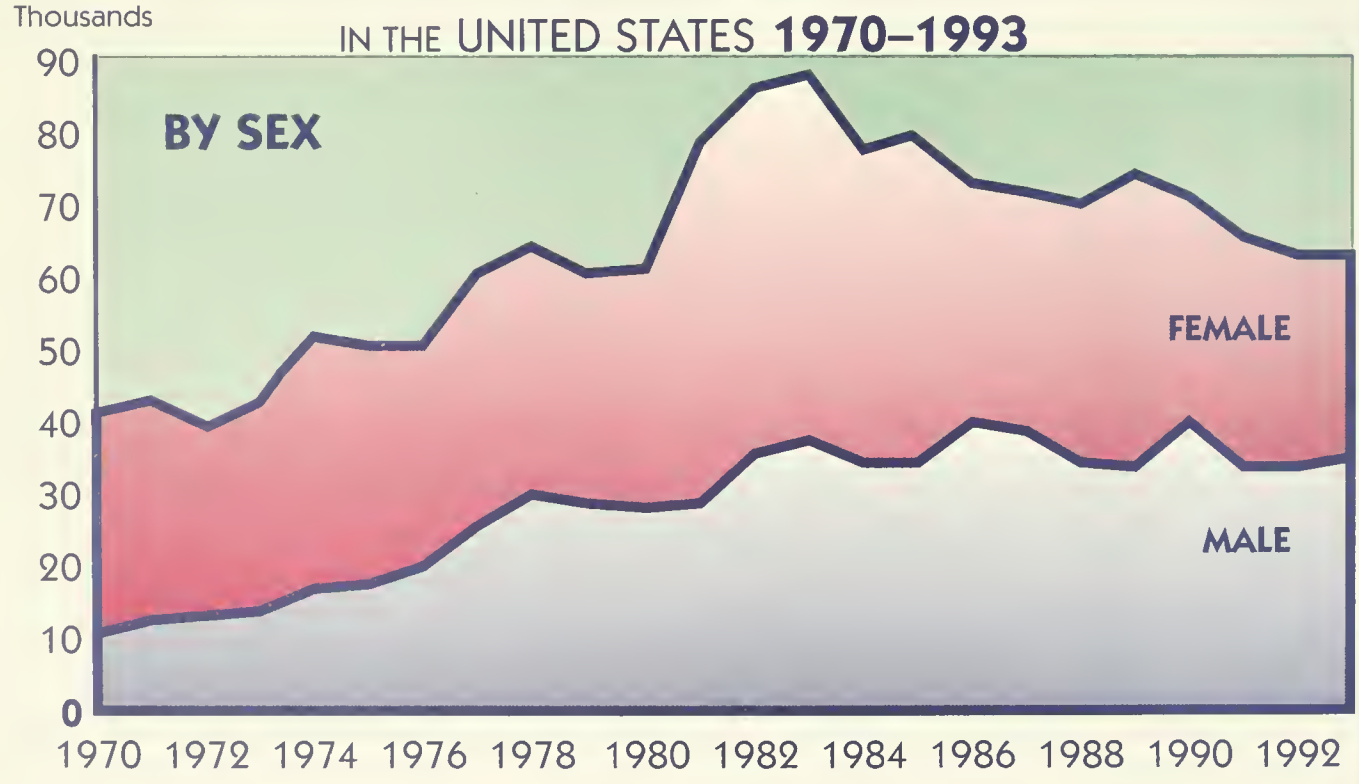
ESTIMATED NUMBER OF PROSTITUTION ARRESTS IN THE UNITED STATES **1970–1993**



Age

Although the total arrests for prostitution started to decline after 1983, the juvenile arrest statistics show an earlier point of decline: juvenile involvement in prostitution in terms of arrests reached its peak in 1978. More precisely, between 1970 and 1978, juvenile arrests for prostitution increased 257 percent. The corresponding adult category increased only 78 percent. At that time, it appeared that the Nation was headed for an explosion in prostitution arrests in the future years. But, on the contrary, during the period 1978 to 1993, juvenile arrests for this crime fell 76 percent. This dramatic decline is portrayed in Chart 5.4. As a result, the juvenile prostitution arrests constituted only 1 percent of total arrests for the crime by 1993.

In conjunction with the above-mentioned trend, Table 5.13 reveals that the average age of participants in prostitution is increasing. This upward tendency in average ages holds both for male and female arrestees. This information is noteworthy in that for the first time the average age of female prostitution arrestees has approached 30.

Table 5.13

Average Age of Prostitution Arrestees, United States, 1970 - 1993

Year	Total	Male	Female
1970	26.3	32.3	24.7
1975	25.1	30.3	23.3
1980	26.2	30.3	24.3
1985	27.2	30.6	25.7
1990	29.9	32.3	28.5
1993	31.1	33.3	29.9

Demography

Overwhelmingly, prostitution arrests occur within city limits, particularly in larger cities. This dynamic was constant throughout the study period. For example, in 1970 and 1993, 96 and 95 percent, respectively, of prostitution arrests occurred in United States cities. Moreover, cities over 100,000 in population accounted for 82 percent of prostitution arrestees in 1993.

Regionally, as shown in Table 5.14, prostitution arrest rates per 100,000 inhabitants were significantly higher in the Northeastern and Western regions when compared to the remaining regions during 1993.

Table 5.14

Prostitution Arrest Rates by Region, United States, 1993

	Rate per 100,000
United States	41.5
Northeast	50.5
Midwest	35.6
South	31.9
West	53.4

Discussion

The volume of prostitution arrests has shown a definitive pattern of decline, an age shift to older arrestees, and a reversal in the racial composition of arrestees. The current patterns of this crime, as indicated by prostitution charges lodged by law enforcement, seem to point toward a continuing downward trend in the future.

Although the number of prostitution arrests are, like other crimes, affected to some degree by law enforcement emphases, the prostitution arrest patterns started the current trends during the middle 1980s. Concurrently, the Nation was experiencing the initial stages of the Acquired Immune Deficiency Syndrome (AIDS) disease and the crack cocaine problem. Both of these events have had profound ramifications with regard to societal conditions. First, AIDS has influenced sexual attitudes, particularly with regard to safe sex. Second, the proliferation of crack cocaine has led to the formation of so-called "crack" houses where in some instances sex is exchanged for crack cocaine. A possible consequence of this is a reduction in the number of street prostitutes who are more likely to be subject to arrest. While no direct relationship can be established between the downward prostitution arrest trend and these social factors, further examination of the issues may play an integral role in understanding the future movement in the Nation's prostitution arrest trend.

PROSTITUTION ARRESTS

CHART 5.3

ESTIMATED NUMBER OF PROSTITUTION ARRESTS
IN THE UNITED STATES **1970–1993**

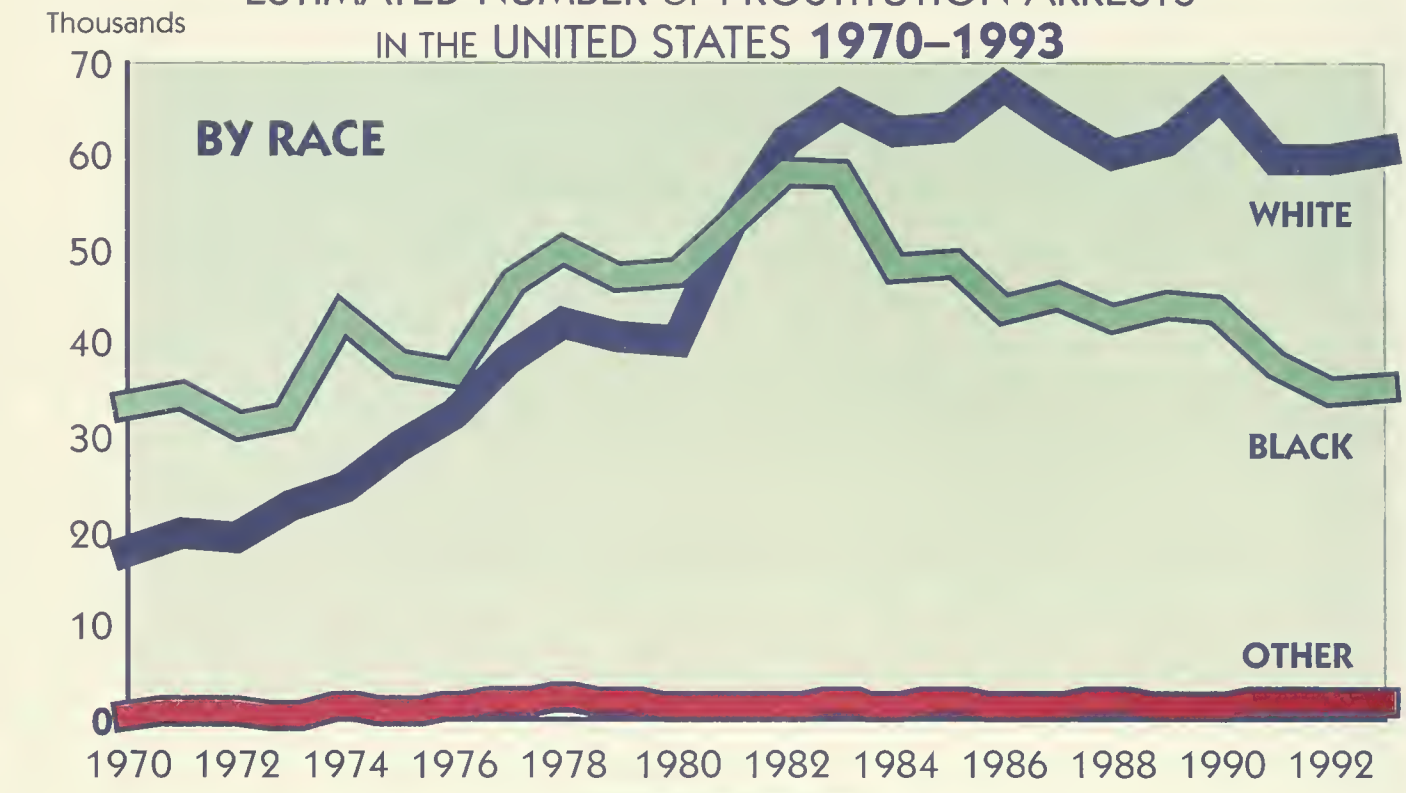


CHART 5.4

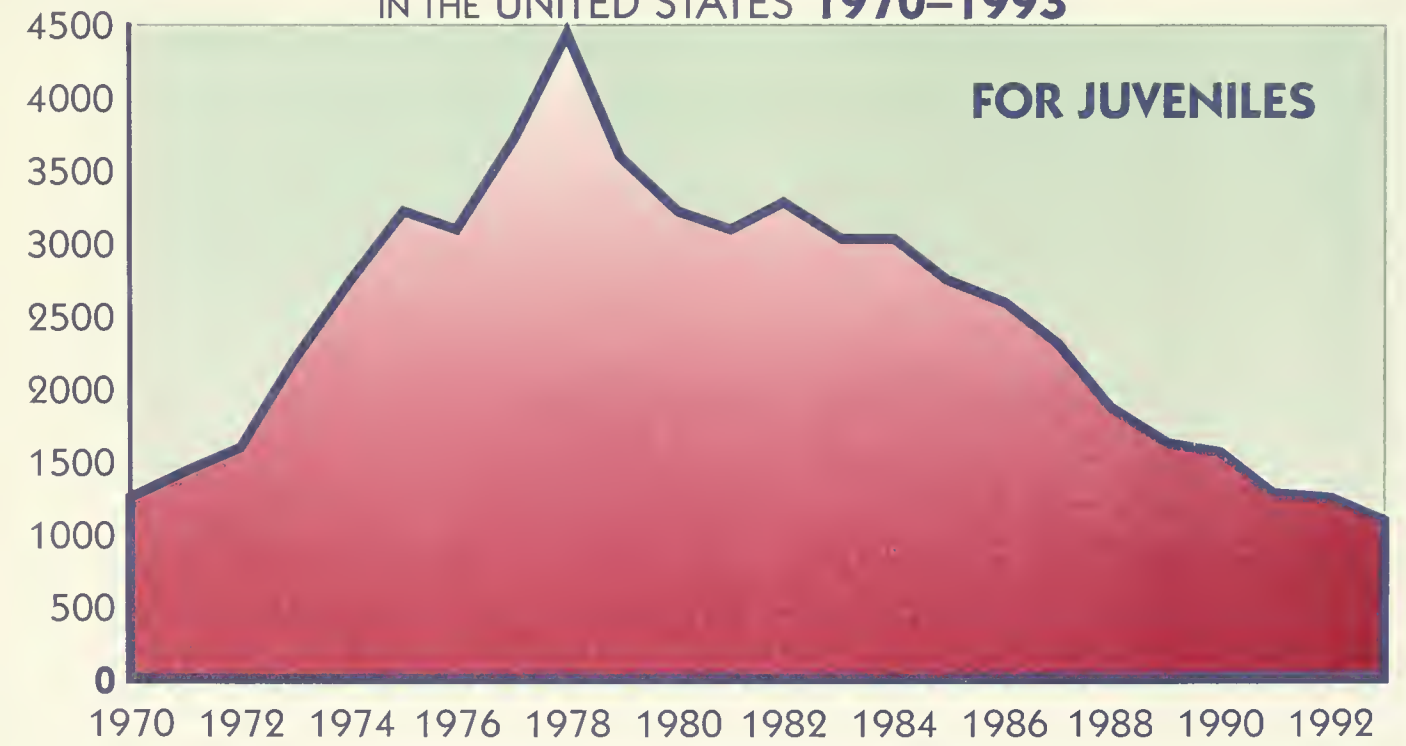
ESTIMATED NUMBER OF PROSTITUTION ARRESTS
IN THE UNITED STATES **1970–1993**



Child Homicide Victims, 1980-1994

An analysis of murder and nonnegligent manslaughter incidents in the United States from 1980 to 1994 indicates that nearly 13,600 children were victimized. For purposes of this study, children are considered to be aged 12 and under. In 1994, 950 homicides of children were reported to the Nation's law enforcement agencies. These data are based upon Supplementary Homicide Reports (SHRs) which are gathered as part of the FBI's Uniform Crime Reporting (UCR) Program. Law enforcement agencies which participate in the UCR Program submit SHRs for homicides which occurred in their jurisdictions.

It is estimated that children aged 12 and under comprised just over 4 percent of all homicide victims known to police from 1980 to 1994. While the homicide rate for victims of all ages has decreased by 12 percent over the past 15 years, the homicide rate of children increased by 6 percent during the same time period.

Victim Profile

For the 15-year period, the largest age group of victims were children 1 year of age and younger. They constituted 45 percent of all child homicide victims. (See Table 5.21.) Within this age group, newborns and infants (babies under 1 year of age) accounted for 29 percent of all children murdered between 1980 and 1994.

Table 5.21

Age and Sex of Child Homicide Victims, Percent Distribution, United States, 1980-1994

Age	Male	Female	Total
1 and Under	24.3%	20.7%	45.0%
2 to 4	15.1	12.0	27.1
5 to 8	7.0	6.9	13.9
9 to 12	7.4	6.6	14.0
Total	53.8	46.2	100.0

Males, who accounted for 54 percent of victims aged 12 and younger, were at slightly more risk of becoming a child homicide victim than females. Males of all ages constituted 76 percent of murder victims by gender from 1980-1994. While the majority of child victims (56 percent) were white, a disproportionate number (41 percent) were black. Children of other races accounted for 3 percent of homicide victims during the same timeframe.

Offender Profile

A family member was most often the offender in the murder of a child. Domestic or within-family murders of children accounted for 54 percent of all cases studied from 1980-1994 (see Table 5.22). In 80 percent of the cases, the offender(s) either knew or was acquainted with the child victim. According to this analysis, only a small percentage (3 percent) of children were killed by someone who was babysitting for them. Victimization of children by strangers was infrequent and represented 6 percent of the total number of child murder cases. Incidents in which the victim-to-offender relationship was unknown accounted for another 15 percent of the total.

Table 5.22

Relationship of Child Homicide Victims to Offenders, Percent Distribution, United States, 1980-1994

Victim to Offender Relationship	Percent
Within Family	**54.2**
Brother	.7
Sister	.6
Daughter	20.7
Son	24.4
Step-Daughter	1.5
Step-Son	1.9
In-Law	.1
Other Family	4.3
Outside Family But Known to Victim	**25.3**
Acquaintance	12.3
Friend	2.3
Neighbor	1.3
Other Known	9.4
Stranger	**6.0**
Unknown	**14.5**

A sex offense either occurred simultaneously with or preceded the murder of a child in 3 percent of the cases studied from 1980-1994. Acquaintances and strangers were identified in 23 and 20 percent, respectively, of all sex-related murders of children. In 10 percent of sex-related murders, neighbors were the offenders.

Victimization of children by strangers between 1980 and 1994 increased steadily with the victim's age, reaching its highest point with 9-year-olds, after which the rate begins a slight decrease. Children victimized by strangers were evenly split by gender for all races. Within racial categories by gender,

however, a higher percentage of black male children (60 percent) were victimized than were black females. In cases where the offender was a stranger, the offender was a male in 95 percent of the murders.

Weapons Usage

Types of weapons used by the offender were influenced by both the age of the child as well as the relationship of the child to the offender. In cases where a child was a homicide victim and the weapon was known, 47 percent of the victims were killed with personal weapons (hands, fists, feet, etc.). Following were firearms, accounting for 20 percent of the cases in which a child was murdered (see Table 5.23). Firearms were the weapons of choice for strangers. A firearm was used in 57 percent of the cases where a stranger was the offender.

Table 5.23

Weapons Used Against Child Homicide Victims, Percent Distribution, United States, 1980-1994

Weapon Type	Percent
Firearms	20.3
Knives or Cutting Instruments	7.2
Blunt Objects	8.2
Personal Weapons (hands, feet, etc.)	47.0
Poison/Narcotics	.8
Explosives/Fire	5.2
Strangulation/Asphyxiation/Drowning	10.8
Other	.5

As the age of the child victims increased, their likelihood of being killed with a firearm increased. Most newborns and infants (babies under 1 year of age) were killed with personal weapons (63 percent), while only 5 percent were killed with firearms. In contrast, 60 percent of 12-year-old murder victims were killed with firearms, while only 8 percent were killed with personal weapons. Similarly, 62 percent of murder victims across all ages were killed with firearms and 6 percent were killed with personal weapons over the same 15-year period.

SECTION VI

Law Enforcement Personnel

The Nation's law enforcement community employed an average of 2.3 full-time officers for every 1,000 inhabitants as of October 31, 1994. Including full-time civilians, the overall law enforcement employee rate was 3.2 per 1,000 inhabitants according to 13,124 city, county, and state police agencies reporting in 1994. These agencies collectively employed 561,543 officers and 220,567 civilians, giving law enforcement service to nearly 245 million U.S. inhabitants. A listing of reported full-time law enforcement officers and civilian employees by state is shown in Table 77.

Varying demographic and other jurisdictional characteristics greatly affect the requirements for law enforcement service from one locale to another. The needs of a community having a highly mobile or seasonal population, for example, may be very different from those of a city whose population is relatively stable. Similarly, a small community situated between two large cities may require a greater number of law enforcement personnel than a community of the same size which has no urban centers nearby.

The functions of law enforcement are also significantly diverse throughout the Nation. In certain areas, sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the county jail facilities. Likewise, the responsibilities of state police and highway patrol agencies vary from one jurisdiction to another.

In view of these differing service requirements and responsibilities, care should be used when attempting any comparison of law enforcement employee rates. The rates presented in the following tables represent national averages; they should be viewed as guides or indicators, not as recommended or desirable police strengths. Adequate personnel for a specific locale can be determined only after careful study and analysis of the various conditions affecting service requirements in that jurisdiction.

The Nation's cities collectively reported an average of 2.9 law enforcement employees per 1,000 inhabitants. The highest average, 3.7 employees per 1,000 population, was recorded in both the Nation's smallest cities, those with fewer than 10,000 inhabitants, and in its largest cities (over 250,000 population). Rural and suburban county law enforcement agencies averaged full-time law enforcement employee rates of 4.1 and 3.7 per 1,000 population, respectively. (See Table 70.)

Regionally, the law enforcement employee rate was highest in the South with 3.4, and lowest in the West, 2.4. (See Table 70.)

Sworn Personnel

Rates based solely on sworn law enforcement personnel (excluding civilians) showed the national average for all cities was 2.2 officers per 1,000 inhabitants. By city population grouping, the rates ranged from 1.7 for cities with populations of 50,000 to 99,999 to 2.9 in cities with 250,000 or more inhabitants. Suburban county law enforcement agencies averaged 2.3 officers per 1,000 population, while agencies in rural counties averaged 2.6. (See Table 71.)

Geographically, the highest rate of officers to population was recorded in the Southern States where there were 2.6 officers per 1,000 inhabitants. Following were the Northeastern States with 2.5, the Midwestern States with 2.1, and the Western States with 1.7.

Males comprised 91 percent of all sworn employees nationally and in cities. Ninety-three percent of those in rural counties and 90 percent in suburban counties were males.

Civilian Employees

Civilians made up 28 percent of the total United States law enforcement employee force in 1994. They represented 22 percent of the police employees in cities, 35 percent in rural counties, and 38 percent of the suburban county law enforcement strength. Sixty-two percent of all civilian employees were females.

Law Enforcement Officers Killed and Assaulted

Seventy-six law enforcement officers were feloniously slain in the line of duty during 1994, 6 more than in 1993. Accidents occurring while performing official duties claimed the lives of an additional 62 officers in 1994. The 1994 total for officers accidentally killed was 3 higher than the 1993 total of 59.

Extensive data on line-of-duty deaths and assaults on city, county, state, and federal officers can be found in the Uniform Crime Reporting publication, *Law Enforcement Officers Killed and Assaulted.*

SECTION VII

APPENDIX I

Methodology

The information compiled by UCR contributors is forwarded to the FBI either directly from local law enforcement agencies or through state-level UCR Programs in 44 states and the District of Columbia. Agencies submitting directly to the FBI are provided continuing guidance and support on an individual basis.

State-level UCR Programs are very effective intermediaries between local contributors and the FBI. Many of the Programs have mandatory reporting requirements and collect data beyond the national UCR scope to address crime problems germane to their particular locales. In most cases, these agencies are also able to provide more direct and frequent service to participating law enforcement agencies, to make information more readily available for use at the state level, and to contribute to more streamlined operations at the national level.

With the development of a state UCR Program, the FBI ceases direct collection of data from individual law enforcement agencies within the state. Instead, information from local agencies is forwarded to the national Program through the state data collection agency.

The conditions under which these systems are developed ensure consistency and comparability in the data submitted to the national Program, as well as provide for regular and timely reporting of national crime data. These conditions are: (1) The state Program must conform to national Uniform Crime Reports' standards, definitions, and information requirements. The states are not, of course, prohibited from collecting other statistical data beyond the national requirements. (2) The state criminal justice agency must have a proven, effective, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by the national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tapes. (6) The state agency must have the proven capability (tested over a period of time) to supply all the statistical data required in time to meet national Uniform Crime Reports' publication deadlines.

To fulfill its responsibilities in connection with the UCR Program, the FBI continues to edit and review individual agency reports for both completeness and quality; has direct contact with individual contributors within the state when necessary in connection with crime reporting matters, coordinating such contact with the state agency; and upon request, conducts training programs within the state on law enforcement records and crime reporting procedures. Should circumstances develop whereby the state agency does not comply with the aforementioned requirements, the national Program may reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Reporting Procedures

Based on records of all reports of crime received from victims, officers who discover infractions, or other sources, law enforcement agencies across the country tabulate the number of Crime Index or Part I offenses brought to their attention each month. Specifically, the crimes reported to the FBI are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson.

Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from an agency's count. The number of "actual offenses known" is reported to the FBI regardless of whether anyone is arrested for the crime, stolen property is recovered, or prosecution is undertaken.

Another integral part of the monthly submission is the total number of actual Crime Index offenses cleared. Crimes are "cleared" in one of two ways: (1) at least one person is arrested, charged, and turned over to the court for prosecution; or (2) by exceptional means when some element beyond law enforcement control precludes the arrest of an offender. Law enforcement agencies also report the number of Index crime clearances which involve only offenders under the age of 18; the value of property stolen and recovered in connection with the offenses; and detailed information pertaining to criminal homicide and arson.

In addition to its primary collection on Crime Index (Part I) offenses, the UCR Program solicits monthly data on persons arrested for all crimes except traffic violations. The age, sex, and race of arrestees are reported by crime category, both Part I and Part II. Part II offenses include all crimes not classified as Part I.

Various data on law enforcement officers killed or assaulted are collected on a monthly basis. The number of full-time sworn and civilian personnel are reported as of October 31 each year.

Editing Procedures

Each report submitted to the UCR Program is thoroughly examined for arithmetical accuracy and for deviations which may indicate errors. To identify any unusual fluctuations in an agency's crime counts, monthly reports are compared with previous submissions of the agency and with those for similar agencies. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in the jurisdiction's geopolitical structure.

Data reliability is a high priority of the Program and noted deviations or arithmetical adjustments are brought to the attention of the state UCR Program or the submitting agency through correspondence. A standard procedure of the FBI is to study the monthly reports and to evaluate periodic trends prepared for individual reporting units. Any significant increase or decrease is made the subject of a special inquiry. When it is found that changes in crime reporting procedures or annexations are influencing the level of crime, the figures for specific crime categories, or if necessary, totals are excluded from trend tabulations.

To assist contributors in complying with UCR standards, the national Program provides training seminars and instructional materials in crime reporting procedures. Throughout the country, liaison with state Programs and law enforcement personnel is maintained, and training sessions are held to explain the purpose of the Program, the rules of uniform classification and scoring, and the methods of assembling the information for reporting. When an individual agency has specific problems in compiling its crime statistics and remedial efforts are unsuccessful, FBI Headquarters' personnel may visit the contributor to aid in resolving the difficulties.

The *Uniform Crime Reporting Handbook,* which details procedures for classifying and scoring offenses, is supplied to all contributors as the basic resource document for preparing reports. Since a good records system is essential for accurate crime reporting, the FBI also furnishes the *Manual of Law Enforcement Records.*

To enhance communication among Program participants, letters to UCR contributors and State UCR Program "Bulletins" are utilized. They address Program policy, as well as present information and instructional material, and are produced as needed.

The final responsibility for data submissions rests with the individual contributing law enforcement agency. Although the Program makes every effort through its editing procedures, training practices, and correspondence to assure the validity of the data it receives, the statistics' accuracy depends primarily on the adherence of each contributor to the established standards of reporting. Deviations from these established standards which cannot be resolved by the national UCR Program may be brought to the attention of the Committee on Uniform Crime Records of the International Association of Chiefs of Police or the Committee on Uniform Crime Reporting of the National Sheriffs' Association.

NIBRS Conversion

Several states provided their UCR data in the expanded NIBRS format. For presentation in this book, NIBRS data were converted to the historical summary UCR formats. The NIBRS data base was constructed to allow for such conversion so that UCR's long-running time series could continue.

Offense Estimation

Tables 1 through 5 and 7 of this publication contain statistics for the entire United States. Because not all law enforcement agencies provide data for complete reporting periods, estimated crime counts are included in these presentations. Offense estimation occurs within each of three areas: Metropolitan Statistical Areas (MSAs), cities outside MSAs, and rural counties. Using the known crime experiences of similar areas within a state, the estimates are computed by assigning the same proportional crime volumes to nonreporting agencies. The size of agency; type of jurisdiction, e.g., police department versus sheriff's office; and geographic location are considered in the estimation process.

Because of efforts to convert to the National Incident-Based Reporting System, it has become necessary to estimate totals for some states during the transitional period. Crime counts for the states of Iowa in 1991, Kansas and Illinois in 1993 and 1994, and Montana in 1994 were estimated using procedures based on data availability specific to each state. The Iowa conversion was successful and post-1991 state figures were available. Kansas, Illinois, and Montana are continuing conversion efforts. Within these states, complete 1993 and 1994 jurisdictional data are only available for Wichita, Kansas, and approximately 60 Illinois agencies still reporting under the summary format. The 1994 jurisdictional figures are shown in Tables 8 through 11.

For Iowa (1991) and Kansas (1993), state totals were estimated by updating previous valid annual totals for individual jurisdictions, subdivided by population group. For the year in question, percent changes for each offense within each population group of the geographic division in which the state resides were applied to the previous annual valid figures. The state totals were compiled from the sums of the population group estimates. (This same method was used to estimate Florida and Kentucky totals for 1988 when there were reporting problems at the state levels.)

A different method was used to estimate 1993 Illinois totals. Since valid figures were available for some Illinois individual jurisdictions, those counts were maintained. The counts for the remaining jurisdictions were replaced with the most recent valid annual totals for previous years or were generated using standard estimation procedures. The results of all sources were then combined to arrive at the 1993 state total for Illinois.

State estimates for 1994 were generated for Kansas, Illinois, and Montana using only the valid crime rates for the geographic division in which the state resides. Within each population group, each state's offense totals were estimated based on the rate per 100,000 inhabitants within the remainder of the division.

The inability of some state UCR Programs to provide forcible rape figures in accordance with the UCR guidelines also required unique estimation procedures. The 1985 through 1994 Illinois and 1993 Michigan and Minnesota forcible rape totals were estimated using national rates per 100,000 inhabitants within the eight population groups and assigning the forcible rape volumes proportionally to each state.

Crime Trends

Showing fluctuations from year to year, trend statistics offer the data user an added perspective from which to study crime. Percent change tabulations in this publication are computed only for reporting units which have provided comparable data for the periods under consideration. Exclusions from trend computations are made when figures from a reporting agency are not received for comparable timeframes or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures, annexations, etc.

Care should be exercised in any direct comparison between data in this publication and those in prior issues of *Crime in the United States*. For example, the 1993 estimates for Minnesota and Nebraska were updated in certain offense categories. These updates also affected the U.S. totals. Valid percent changes for 2-, 5-, and 10-year periods are presented in this book's tabular portions.

Table Methodology

Although most law enforcement agencies submit crime reports to the UCR Program, data are sometimes not received for complete annual periods. To be included in this publication's Tables 8 through 11, showing specific jurisdictional statistics, figures for all 12 months of the current year must have been received at the FBI prior to established publication deadlines. Other tabular presentations are aggregated on varied levels of submission. Unless consisting of estimates for the total United States population, each table in this publication shows the number of agencies reporting and the extent of population coverage.

Designed to assist the reader, this appendix explains the construction of many of this book's tabular presentations. The following key refers to the columnar headings used throughout the appendix.

Key: A) Column 1 shows the table numbers. Included are Tables 1 through 69, *Crime in the United States - 1994*.

B) Column 2 indicates the level of submission necessary for an agency's statistics to be included in a table.

C) Column 3 explains how each table was constructed. Data adjustments, if any, are discussed along with various definitions of data aggregation.

D) Column 4 contains general comments regarding the potential use and misuse of the statistics presented.

(1) Table	(2) Data Base	(3) Table Construction	(4) General Comments
1	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1994 statistics are consistent with Table 2. Pre-1994 crime statistics may have been updated, and hence, may not be consistent with prior publications. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year. Population statistics represent July 1 provisional estimations for each year except 1970, 1980, and 1990, which are Bureau of the Census decennial census data (see App. III). Crime volume statistics are rounded to the nearest 10 for violent crime and the nearest 100 for property crime. Percent changes and rates are computed prior to rounding.	Represents an estimation of national reported crime activity from 1975 to 1994.
2	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1994).	Statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent July 1, 1994, Bureau of the Census provisional estimates. See Appendix III for UCR population breakdowns.	Represents an estimation of national reported crime activity in 1994.
3	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1994).	Regional offense distributions are computed from volume figures as shown in Table 4. Population distributions are based on July 1, 1994, Bureau of the Census provisional estimates (see App. III).	Represents the 1994 geographical distribution of estimated Crime Index offenses and population.
4	All law enforcement agencies in the UCR Program (including those submitting less than 12 months).	The 1994 statistics are aggregated from individual state statistics as shown in Table 5. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for 1993 and 1994. Population statistics represent July 1 provisional estimates for both years (see App. III).	Represents an estimation of reported crime activity for Index offenses at the: 1. national level 2. regional level 3. division level 4. state level Any comparison of UCR statistics should take into consideration demographic factors.
5	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1994).	Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports. Population statistics represent 1994 estimates (see App. III). Statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting 12 months of offense reports and estimated totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading"Estimated Totals" represent the above plus estimated offense totals for agencies having less than 3 months of offense reports.	Represents an estimation of reported crime activity for Index offenses at the state level. Any comparison of UCR statistics should take into consideration demographic factors.
6	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1994).	Statistics are published for all Metropolitan Statistical Areas (MSAs) having at least 75% reporting and for which the central city/cities submitted 12 months of data in 1994. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense statistics for 1994. Population statistics represent July 1, 1994, Bureau of the Census provisional estimates. The statistics under the heading "Area Actually Reporting" represent reported offense totals for agencies submitting all 12 months of offense reports plus estimated offense totals for agencies submitting less than 12 but more than 2 months of offense reports. The statistics under the heading "Estimated Total" represent the above plus the estimated offense totals for agencies submitting less than 3 months of offense reports. The tabular breakdowns are according to UCR definitions (see App. II).	Represents an estimation of the reported crime activity for Index offenses at individual MSA level. Any comparison of UCR statistics should take into consideration demographic factors.

(1) Table	(2) Data Base	(3) Table Construction	(4) General Comments
7	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1994).	Offense totals are for all Index offense categories other than aggravated assault. Crime statistics include estimated offense totals for agencies submitting less than 12 months of offense reports for each year.	Represents an estimation of national reported crime activity from 1990 to 1994. Aggravated assault is excluded from Table 7, because if money or property is taken in connection with an assault the offense is robbery.
8	All law enforcement agencies submitting complete reports for 12 months in 1994.	"Cities and Towns" are defined to be agencies in Population Groups I through V (App. III). The agency populations are 1994 estimates for each agency (see App. III).	Represents reported crime activity of individual agencies in cities and towns 10,000 and over in population. Any comparison of UCR statistics should take into consideration demographic factors.
9	All university/college law enforcement agencies submitting complete reports for 12 months in 1994.	The 1992 student enrollment figures, which are provided by the U.S. Department of Education, are the most recent available. They include full- and part-time students. No adjustments to equate part-time enrollments into full-time equivalents have been made.	Represents reported crime from those individual university/college law enforcement agencies contributing to the UCR Program. These agencies are listed alphabetically by state. Any comparison of these UCR statistics should take into consideration size of enrollment, number of on-campus residents, and other demographic factors.
10	All law enforcement agencies submitting complete reports for 12 months in 1994.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III). Population estimates of suburban counties are as of July 1, 1994, (see App. III).	Represents crime reported to individual law enforcement agencies in suburban counties, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic factors.
11	All law enforcement agencies submitting complete reports for 12 months in 1994.	"Rural Counties" are those outside MSAs and whose jurisdictions are not covered by city police agencies (App. III). Population classifications of rural counties are based on 1994 estimates for individual agencies (see App. III).	Represents crime reported to individual rural county law enforcement agencies covering populations 25,000 and over, i.e., the individual sheriff's office, county police department, highway patrol, and/or state police. These figures do not represent the county totals since they exclude city crime counts. Any comparison of UCR statistics should take into consideration demographic factors.
12-15	All law enforcement agencies submitting complete reports for at least 6 common months in 1993 and 1994.	The 1994 crime trend statistics are 2-year comparisons based on 1994 reported crime activity. Only common reported months for individual agencies are included in 1994 trend calculations. Populations represent July 1, 1994, estimates for individual agencies. See Appendix III for UCR population breakdowns. Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	Slight decrease in national coverage for Table 15 due to editing procedure and lower submission rate.
16-19	All law enforcement agencies submitting complete reports for 12 months in 1994.	The 1994 crime rates are the ratios of the aggregated 1994 crime volumes and the aggregated 1994 populations of the contributing agencies. Population statistics represent 1994 estimates for individual agencies. See Appendix III for UCR population breakdowns. Note that "Suburban and Nonsuburban Cities" are all municipal agencies other than central cities in MSAs.	The forcible rape figures furnished by the Illinois state-level UCR Program were not in accordance with national guidelines. For inclusion in these tables, the Illinois forcible rape figures were estimated by using the national rates for each population group applied to the population by group for Illinois agencies supplying all 12 months of data. Slight decrease in national coverage for Table 19 due to editing procedure and lower submission rate.
20	All law enforcement agencies submitting Supplementary Homicide Report (SHR) data in 1994.	The weapon totals are the aggregate for each murder victim recorded on the SHRs for calendar year 1994.	The SHR is the monthly report form concerning homicides. It details victim and offender characteristics, circumstances, weapons used, etc.
21,22	All law enforcement agencies submitting complete reports for 12 months in 1994.	The weapon totals are aggregated 1994 totals. Population statistics represent 1994 estimates.	
23,24	All law enforcement agencies submitting complete reports for at least 6 months in 1994.	Offense total and value lost total are computed for all Index offense categories other than aggravated assault. Percent distribution is derived based on offense total of each Index offense. Trend statistics are derived based on agencies with at least 6 common months complete for 1993 and 1994.	Aggravated assault is excluded from Table 23. For UCR Program purposes, the taking of money or property in connection with an assault is reported as robbery.

(1) Table	(2) Data Base	(3) Table Construction	(4) General Comments
25-28	All law enforcement agencies submitting complete reports for at least 6 months in 1994.	The 1994 clearance rates are based on offense and clearance volume totals of the contributing agencies for 1994. Population statistics represent 1994 estimates. See Appendix III for UCR population breakdowns	
29	All law enforcement agencies in the UCR Program (including those submitting less than 12 months in 1994).	The arrest totals presented are national estimates based on the arrest statistics of all law enforcement agencies in the UCR Program (including those submitting less than 12 months). The "Total Estimated Arrests" statistic is the sum of estimated arrest volumes for each of the 29 offenses. Each individual arrest total is the sum of the estimated volumes within each of the eight population groups (App. III). Each group's estimate is the reported volume (as shown in Table 26) divided by the percent of total group population reporting (according to 1994 Bureau of the Census provisional estimates, see App. III).	
30,31	All law enforcement agencies submitting complete reports for 12 months in 1994.	The 1994 arrest rates are the ratios, per 100,000 inhabitants, of the aggregated 1994 reported arrest statistics and population. The population statistics represent July 1, 1994, estimates. See Appendix III for UCR population classifications/geographical configuration.	
32,33	All law enforcement agencies submitting complete reports for 12 months in 1985 and 1994	The arrest trends are the percentage differences between 1985 and 1994 arrest volumes aggregated from all common agencies. Population statistics represent July 1, 1994, estimates (see App. III).	
34,35	All law enforcement agencies submitting complete reports for 12 months in 1990 and 1994	The arrest trends are the percentage differences between 1990 and 1994 arrest volumes aggregated from common agencies. Population statistics represent 1994 estimates (see App. III).	
36,37	All law enforcement agencies submitting complete reports for 12 months in 1993 and 1994.	The arrest trends are 2-year comparisons between 1993 and 1994 arrest volumes aggregated from common agencies. Population statistics represent 1994 estimates (see App. III).	
38-43	All law enforcement agencies submitting complete reports for 12 months in 1994.		Slight decrease in coverage for Table 43 due to editing procedure and lower submission of race data.
44,45	All city law enforcement agencies submitting complete reports for 12 months in 1993 and 1994	The 1994 city arrest trends represent the percentage differences between 1993 and 1994 arrest volumes aggregated from common city agencies. "City Agencies" are defined to be all agencies within Population Groups I-VI (App. III).	
46-49	All city law enforcement agencies submitting complete reports for 12 months in 1993 and 1994.	"City Agencies" are defined as agencies within Population Groups I-VI (App. III).	Slight decrease in coverage for Table 49 due to editing procedure and lower submission of race data.
50,51	All suburban county law enforcement agencies submitting complete reports for 12 months in 1993 and 1994	The 1994 suburban county arrest trends represent percentage differences between 1993 and 1994 volumes aggregated from contributing agencies. "Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	
52-55	All suburban county law enforcement agencies submitting complete reports for 12 months in 1994.	"Suburban Counties" are defined as the areas covered by noncity agencies within an MSA (App. III).	Slight decrease in coverage for Table 55 due to editing procedure and lower submission of race data
56,57	All rural county law enforcement agencies submitting complete reports for 12 months in 1993 and 1994	The 1994 rural county arrest trends represent percentage differences between 1993 and 1994 volumes aggregated from contributing agencies. "Rural Counties" are defined as noncity agencies outside MSAs (App. III).	
58-61	All rural county law enforcement agencies submitting complete reports for 12 months in 1994	"Rural Counties" are defined as noncity agencies outside MSAs (App. III).	Slight decrease in coverage for Table 61 due to editing procedure and lower submission of race data

(1) Table	(2) Data Base	(3) Table Construction	(4) General Comments
62,63	All suburban area law enforcement agencies submitting complete reports for 12 months in 1993 and 1994.	The 1994 suburban area arrest trends represent percentage differences between 1993 and 1994 arrest volumes aggregated from contributing agencies. "Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	
64-67	All suburban area law enforcement agencies submitting complete reports for 12 months in 1994.	"Suburban Area" is defined as cities with fewer than 50,000 inhabitants and all counties within MSAs (App. III).	Slight decrease in coverage for Table 67 due to editing procedure and lower submission of race data.
68	All law enforcement agencies submitting complete reports for 12 months in 1994.	Arrest totals are aggregated for individual agencies within each state. Population figures represent July 1, 1994, estimates (see App. III).	Any comparison of statistics should take into consideration variances in arrest practices, particularly for Part II crimes.
69	All law enforcement agencies submitting complete reports for 12 months in 1994.	Population statistics represent July 1, 1994, estimates for individual agencies. See Appendix III for definitions of the population classifications presented.	Data furnished are based upon individual state age definitions for juveniles.

APPENDIX II

Offenses in Uniform Crime Reporting

Offenses in Uniform Crime Reporting are divided into two groupings, Part I and Part II. Information on the volume of Part I offenses known to law enforcement, those cleared by arrest or exceptional means, and the number of persons arrested is reported monthly. Only arrest data are reported for Part II offenses.

The Part I offenses are:

Criminal homicide.—a. Murder and nonnegligent manslaughter: the willful (nonnegligent) killing of one human being by another. Deaths caused by negligence, attempts to kill, assaults to kill, suicides, accidental deaths, and justifiable homicides are excluded. Justifiable homicides are limited to: (1) the killing of a felon by a law enforcement officer in the line of duty; and (2) the killing of a felon, during the commission of a felony, by a private citizen. b. Manslaughter by negligence: the killing of another person through gross negligence. Traffic fatalities are excluded. While manslaughter by negligence is a Part I crime, it is not included in the Crime Index.

Forcible rape.—The carnal knowledge of a female forcibly and against her will. Included are rapes by force and attempts or assaults to rape. Statutory offenses (no force used—victim under age of consent) are excluded.

Robbery.—The taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Aggravated assault.—An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Simple assaults are excluded.

Burglary-breaking or entering.—The unlawful entry of a structure to commit a felony or a theft. Attempted forcible entry is included.

Larceny-theft (except motor vehicle theft).—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Examples are thefts of bicycles or automobile accessories, shoplifting, pocket-picking, or the stealing of any property or article which is not taken by force and violence or by fraud. Attempted larcenies are included. Embezzlement, "con" games, forgery, worthless checks, etc., are excluded.

Motor vehicle theft.—The theft or attempted theft of a motor vehicle. A motor vehicle is self-propelled and runs on the surface and not on rails. Specifically excluded from this category are motorboats, construction equipment, airplanes, and farming equipment.

Arson.—Any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

The Part II offenses are:

Other assaults (simple).—Assaults and attempted assaults where no weapon is used and which do not result in serious or aggravated injury to the victim.

Forgery and counterfeiting.—Making, altering, uttering, or possessing, with intent to defraud, anything false in the semblance of that which is true. Attempts are included.

Fraud.—Fraudulent conversion and obtaining money or property by false pretenses. Included are confidence games and bad checks, except forgeries and counterfeiting.

Embezzlement.—Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

Stolen property; buying, receiving, possessing.—Buying, receiving, and possessing stolen property, including attempts.

Vandalism.—Willful or malicious destruction, injury, disfigurement, or defacement of any public or private property, real or personal, without consent of the owner or persons having custody or control.

Weapons; carrying, possessing, etc.—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Included are attempts.

Prostitution and commercialized vice.—Sex offenses of a commercialized nature, such as prostitution, keeping a bawdy house, procuring, or transporting women for immoral purposes. Attempts are included.

Sex offenses (except forcible rape, prostitution, and commercialized vice).—Statutory rape and offenses against chastity, common decency, morals, and the like. Attempts are included.

Drug abuse violations.—State and/or local offenses relating to the unlawful possession, sale, use, growing, and manufacturing of narcotic drugs. The following drug categories are specified: opium or cocaine and their derivatives (morphine, heroin, codeine); marijuana; synthetic narcotics—manufactured narcotics that can cause true addiction (demerol, methadone); and dangerous nonnarcotic drugs (barbiturates, benzedrine).

Gambling.—Promoting, permitting, or engaging in illegal gambling.

Offenses against the family and children.—Nonsupport, neglect, desertion, or abuse of family and children.

Driving under the influence.—Driving or operating any vehicle or common carrier while drunk or under the influence of liquor or narcotics.

Liquor laws.—State and/or local liquor law violations, except "drunkenness" and "driving under the influence." Federal violations are excluded.

Drunkenness.—Offenses relating to drunkenness or intoxication. Excluded is "driving under the influence."

Disorderly conduct.—Breach of the peace.

Vagrancy.—Vagabondage, begging, loitering, etc.

All other offenses.—All violations of state and/or local laws, except those listed above and traffic offenses.

Suspicion.—No specific offense; suspect released without formal charges being placed.

Curfew and loitering laws (persons under age 18).—Offenses relating to violations of local curfew or loitering ordinances where such laws exist.

Runaways (persons under age 18).—Limited to juveniles taken into protective custody under provisions of local statutes.

APPENDIX III

Uniform Crime Reporting Area Definitions

The presentation of statistics by reporting area facilitates analyzing local crime counts in conjunction with those for areas of similar geographical location or population size. Geographically, the United States is divisible by regions, divisions, and states. Further breakdowns rely on population figures and proximity to metropolitan areas. As a general rule, sheriffs, county police, and state police report crimes committed within the limits of counties but outside cities, while local police report crimes committed within the city limits.

Community Types

UCR data are often presented in aggregations representing three types of communities:

1. Metropolitan Statistical Areas (MSAs)—Each MSA includes a central city of at least 50,000 people or an urbanized area of at least 50,000. The county containing the central city and other contiguous counties having strong economic and social ties to the central city and county are also included. Counties in an MSA are designated "suburban" for UCR purposes. An MSA may cross state lines. The MSA concept facilitates the analysis and presentation of uniform statistical data on metropolitan areas by establishing reporting units which represent major population centers. Due to changes in the geographic composition of MSAs, no year-to-year comparisons of data for those areas should be attempted.

New England MSAs are comprised of cities and towns instead of counties. In this publication's tabular presentations, New England cities and towns are assigned to the proper MSAs. Some counties, however, have both suburban and rural portions. Data for state police and sheriffs in those jurisdictions are included in statistics for the rural areas.

MSAs made up approximately 80 percent of the total U.S. population in 1994. Some presentations in this book refer to "suburban area." A suburban area includes cities with less than 50,000 inhabitants in addition to counties (unincorporated areas) within the MSA. The central cities are, of course, excluded. The concept of suburban area is especially important because of the particular crime conditions which exist in the communities surrounding the Nation's largest cities.

2. Cities Outside MSAs—Cities outside MSAs are mostly incorporated. They comprised 8 percent of the 1994 population of the United States.

3. Rural Counties Outside MSAs—Rural counties are comprised of mostly unincorporated areas. Law enforcement agencies in rural counties cover areas that are not under the jurisdiction of city police departments. Rural county law enforcement agencies served 12 percent of the national population in 1994.

The following is an illustration of the community types:

<table>
<tr><th></th><th>MSA</th><th>NON-MSA</th></tr>
<tr><td rowspan="2">CITIES</td><td>CENTRAL CITIES 50,000 AND OVER</td><td rowspan="2">CITIES OUTSIDE METROPOLITAN AREAS</td></tr>
<tr><td>SUBURBAN CITIES</td></tr>
<tr><td>COUNTIES (including unincorporated areas)</td><td>SUBURBAN COUNTIES</td><td>RURAL COUNTIES</td></tr>
</table>

Population Groups

The population group classifications used by the UCR Program are:

Population Group	*Political Label*	*Population Range*
I	City	250,000 and over
II	City	100,000 to 249,999
III	City	50,000 to 99,999
IV	City	25,000 to 49,999
V	City	10,000 to 24,999
VI	City[1]	Less than 10,000
VIII (Rural County)	County[2]	N/A
IX (Suburban County)	County[2]	N/A

[1]Includes universities and colleges to which no population is attributed
[2]Includes state police to which no population is attributed.

The major source of UCR data is the individual law enforcement agency. The number of agencies included in each population group will vary slightly from year to year due to population growth, geopolitical consolidation, municipal

incorporation, etc. Population figures for individual jurisdictions are estimated by the UCR Program in noncensus years. In this edition, the state and national population figures used are 1994 Bureau of the Census provisional estimates. Population figures for individual jurisdictions were updated by applying 1994 state growth rates to 1993 city and county estimates. The estimate of United States population showed a 1-percent increase from 1993 to 1994.

The following table shows the number of UCR contributing agencies within each population group for 1994.

Population Group	*Number of Agencies*	*Population Covered*
I	66	47,165,230
II	142	20,861,396
III	379	25,884,470
IV	720	24,884,343
V	1,738	27,389,952
VI[1]	7,962	25,659,140
VIII (Rural County)[2]	3,630	32,017,953
IX (Suburban County)[2]	2,011	56,478,516
Total[3]	16,648	260,341,000

[1]Includes universities and colleges to which no population is attributed.
[2]Includes state police to which no population is attributed.
[3]Because of Bureau of the Census rounding, the population covered does not add to total.

Regions and Divisions

As shown in the accompanying map, the United States is comprised of four regions: the Northeastern States, the Midwestern States, the Southern States, and the Western States. These regions are further divided into nine divisions. The following table delineates the regional, divisional, and state configuration of the country.

NORTHEASTERN STATES

New England
- Connecticut
- Maine
- Massachusetts
- New Hampshire
- Rhode Island
- Vermont

Middle Atlantic
- New Jersey
- New York
- Pennsylvania

MIDWESTERN STATES

East North Central
- Illinois
- Indiana
- Michigan
- Ohio
- Wisconsin

West North Central
- Iowa
- Kansas
- Minnesota
- Missouri
- Nebraska
- North Dakota
- South Dakota

SOUTHERN STATES

South Atlantic
- Delaware
- District of Columbia
- Florida
- Georgia
- Maryland
- North Carolina
- South Carolina
- Virginia
- West Virginia

East South Central
- Alabama
- Kentucky
- Mississippi
- Tennessee

West South Central
- Arkansas
- Louisiana
- Oklahoma
- Texas

WESTERN STATES

Mountain
- Arizona
- Colorado
- Idaho
- Montana
- Nevada
- New Mexico
- Utah
- Wyoming

Pacific
- Alaska
- California
- Hawaii
- Oregon
- Washington

APPENDIX V

National Uniform Crime Reporting Program Directory

Administration ..... (202) 324-2608
Program administration; management; policy

Information Dissemination ..... (202) 324-5015
Requests for published and unpublished data; printouts, magnetic tapes, books

Send correspondence to: Uniform Crime Reports
Criminal Justice Information Services Division
FBI/GRB
Washington, D.C. 20535

Training/Education ..... (202) 324-2614
Requests for training of law enforcement; information on police reporting systems; technical assistance

Statistical Analysis/Processing ..... (202) 324-3821
Statistical models; special studies and analyses; crime forecasting; processing of summary and incident-based reports from data contributors; reporting problems; requests for reporting forms; data processing; data quality

APPENDIX VI

Uniform Crime Reporting Publications List

Crime in the United States (annual)

Law Enforcement Officers Killed and Assaulted (annual)

Hate Crime Statistics (annual)

Killed in the Line of Duty: A Study of Selected Felonious Killings of Law Enforcement Officers (special report)

UCR Preliminary Release, January-June (semiannual)

UCR Preliminary Annual Report (semiannual)

Uniform Crime Reporting Handbook:
- Summary System
- National Incident-Based Reporting System (NIBRS)

NIBRS:
- Volume 1—*Data Collection Guidelines*
- Volume 2—*Data Submission Specifications*
- Volume 3—*Approaches to Implementing an Incident-Based Reporting (IBR) System*
- Volume 4—*Error Message Manual*
- *Supplemental Guidelines for Federal Participation*

Manual of Law Enforcement Records

Hate Crime:
- *Hate Crime Data Collection Guidelines*
- *Training Guide for Hate Crime Data Collection*
- *Hate Crime Statistics, 1990: A Resource Book*

Age-Specific Arrest Rates and Race-Specific Arrest Rates for Selected Offenses

Population-at-Risk Rates and Selected Crime Indicators

Periodic Press Releases:
- *Crime Trends* (semiannual)
- *Law Enforcement Officers Killed* (semiannual)
- *Hate Crime* (annual)

Evaluation Form For
Crime in the United States - 1994

1. For what purpose did you use this issue of *Crime in the United States?*

2. Was the publication adequate for that purpose?

____ Quite adequate ____ Somewhat adequate ____ Quite inadequate
____ Adequate ____ Not Adequate

3. Are there presentations not included that you would find particularly useful?

4. What changes, if any, would you recommend for subsequent issues?

5. Can you point out specific table notes or presentations which are not clear or additional terms which need to be defined?

6. In what capacity did you use *Crime in the United States?*

____ Criminal justice/law enforcement agency employee *(specify functional area)*
____ Other government employee
____ Private citizen
____ Educator
____ Researcher
____ Student
____ Legislator
____ Media
____ Other *(specify)*

7. Add any additional comments you care to make.
